

REPORT OF THE BOARD OF DIRECTORS

To the Annual General Meeting of Shareholders

Based on the provisions of law, the Charter, internal regulations on corporate governance, and the audited financial statements of 2024 of Quang Ngai Sugar Joint Stock Company, the Board of Directors reports to the 2025 Annual General Meeting of Shareholders on the activities in 2024 and the orientation for 2025 as follows:

I. The Board of Directors' Assessment of Business Performance in 2024

In 2024, the global political landscape remained complex and unpredictable, with intense strategic competition, escalating conflicts in Ukraine, the Middle East, and the Red Sea, as well as rising tensions on the Korean Peninsula and in the Taiwan Strait. Oil prices, essential commodities, and transportation costs fluctuated significantly. Economic and trade recovery was slow and unstable, with declining global demand and investment. Exchange rates and interest rates remained highly volatile, while natural disasters, climate change, and concerns over energy security, food security, and cybersecurity continued to pose significant challenges.

Domestically, political stability was maintained, and economic growth remained relatively strong. Vietnam's GDP grew by 7.09% in 2024 compared to 2023, while inflation was controlled at 3.63%. However, despite high GDP growth, domestic demand remained low (the lowest since 2022) as consumers tightened their spending.

The production and business activities of QNS in 2024 remained stable and experienced growth, exceeding the targets approved at the 2024 Annual General Meeting of Shareholders. Specifically, the results are as follows:

Items	Unit	Actual 2023	Planned 2024	Actual 2024	Percentage (%)	
					Compared to Actual 2023	Compared to Plan 2024
Share capital	VND billion	3,569	3,676	3,676	103%	100%
Total revenue	VND billion	10,516	9,000	10,678	102%	119%
Total net profit before tax	VND billion	2,447	1,500	2,645	108%	176%

1. Sugar and Biomass power Segments

Vietnam's Sugar Industry Overview:

Since 2021, after Vietnam implemented trade defense measures against certain imported sugarcane products, the domestic sugar industry has experienced a revival.

According to the Vietnam Sugarcane and Sugar Association, the total harvested sugarcane area nationwide for the 2023-2024 season reached 163,000 hectares, an increase of 11.4%. The total sugarcane output was 11,204,789 tons, up 17.9%, producing 1,107,777 tons of sugar, an increase of 18.4% compared to the previous season. Compared to the 2020/2021 crushing season, over four consecutive seasons, sugarcane crushing output has increased by 66%, while sugar production has risen by 61%.

Domestic sugar prices remained relatively stable.

QNS's Sugar Business Performance:

- In 2024, QNS's sugar business operations remained stable. The results of the 2023-2024 crushing season were as follows:

+ The sugarcane cultivation area continues to expand, total raw material area of the 2023-2024 crushing season: 29,057 hectares, up 12% compared to the 2022-2023 season.

+ Sugarcane supplied for processing: 1.97 million tons, up 15% compared to the 2022-2023 season.

+ Crushing capacity has increased and remained stable, and processing efficiency has been maintained at 8.8 tons of sugarcane per ton of sugar.

+ Sugar production from sugarcane: 215,272 tons, an increase of 12%, accounting for 19.4% of Vietnam's total sugar output.

- Sugar consumption volume in 2024: 210,000 tons, down 6% compared to 2023. During the year, the Company did not produce and consume sugar from imported raw sugar due to excessively high import quota auction fees.

- Packaged sugar products (0.5kg and 1kg) have achieved nationwide distribution across modern retail channels. QNS's sugar products are increasingly favored by industrial customers using sugar as a raw material for processing. The Company has also met the quality standards of major food processing enterprises, including Vinamilk, Coca-Cola, Dutch Lady, and Tan Hiep Phat....

- In 2024, total electricity consumption reached 210 million kWh, an increase of 2% compared to 2023. Electricity production from bagasse increased, ensuring a sufficient and timely supply of steam energy for processing, which played a crucial role in maintaining high and stable crushing capacity and ensuring smooth production processes.

2. Soymilk and Plant-Based Nutrition Segments

The fast-moving consumer goods (FMCG) sector faced many challenges as consumer purchasing power remained low.

In 2024, the Company implemented significant changes in its business strategy to upgrade, expand, and revitalize its core product categories, stimulating growth and optimizing investment efficiency. Specifically:

- Renewing and optimizing Vinasoy's flagship products, upgrading the soymilk category with the introduction of Fami GreenSoy, featuring groundbreaking technology.

- Reaffirming Vinasoy's position as a leading plant-based nutrition brand, restructuring Veyo fermented yogurt drink made from five types of nuts, and launching a premium nut milk product line (including Veyo 5 Nuts and Veyo Oat Milk).

- Investing in sales management and distribution system upgrades, as well as enhancing the management system to ensure consistent quality control capabilities across all three factories.

Results in 2024:

- Total soymilk consumption in 2024 reached 255 million liters, a 5.6% increase, while revenue grew 4.3% compared to 2023.

- + Certain soymilk product groups with long-term growth potential, such as Fami Low Sugar, recorded an 8% increase compared to 2023. Notably, the Fami Flavored and Fami Go product lines sustained double-digit annual growth, achieving an impressive 31% increase in 2024 compared to the previous year.

- + The Nut Milk category experienced outstanding revenue growth, surging 104% compared to 2023.

- Vietnam Market: Vinasoy's market share in the soymilk segment continued to grow, solidifying its leading position while maintaining its rank as the second-largest brand in the ready-to-drink milk category in 2024.

- Export Market:

- + Vinasoy expanded its global footprint, seeking new partnerships and market opportunities. Current export markets include Japan, South Korea, the U.S., Taiwan, and others, with five distributors and a network of 2,900 retail outlets.

- + Export revenue has shown consistent growth over the years. In 2024 alone, export revenue increased by 80% compared to 2023.
