Hanoi, April, 2025

REPORT ON THE ACTIVITIES OF THE BOARD OF DIRECTORS

To: 2025 Annual General Meeting of Shareholders

Part 1:

EVALUATION OF BUSINESS RESULTS IN 2024

I. Characteristics of the situation.

1. Advantages:

- In 2024, Vietnam's economy will recover strongly and achieve positive results. The GDP growth rate in 2024 will reach 7.09%, exceeding the target of 6.5%, reflecting the people's trust and consensus on the Party's policies, the drastic administration of the Government and the Prime Minister.

- The Government has taken key solutions to maintain macroeconomic stability, control inflation, and ensure major balances of the economy; at the same time, orient specific solutions and policies to promote growth, remove difficulties and obstacles for businesses.

- The Prime Minister has issued Directive No. 28/CT-TTg dated August 26, 2024 on a number of solutions to remove difficulties and obstacles, promote the production and consumption of cement, iron and steel and construction materials to improve production and business efficiency; Official Telegram No. 121/CD-TTg dated 26/11/2024 on continuing to promote the development of the domestic market and stimulate consumer demand.

2. Difficulties:

- The world situation continues to evolve rapidly, complicated, unpredictable, with many risk factors, uncertainties, and new developments arising beyond the ability to forecast; financial and monetary policies are generally still tight in many countries, putting pressure on borrowing costs and increasing the risk of economic recession; geopolitical conflicts, especially the tense situation in the Middle East, threaten to disrupt supply chains and global energy markets; the global economy is recovering slowly, unclear and unstable...

- Although Vietnam's economy has had positive changes. However, it still faces many difficulties and challenges: The disbursement of public investment capital is still slow; the financial and monetary markets still have potential risks, the economy's ability to absorb capital is not high; production and business activities in some fields are still difficult;

natural disasters, floods, landslides, climate change are complicated...

- The building materials industry in general and cement production in particular have faced many difficulties in recent years, production, consumption and revenue have decreased, mainly due to: Mechanisms and policies to support cement and building materials enterprises applying science and technology have not been specifically promulgated; fuel costs: coal, FO oil, electricity... increased; The domestic consumption and export markets face many difficulties due to the decline in total domestic and world demand, the supply chain is broken, the domestic real estate market is growing slowly, many construction works and key infrastructure projects are slow to be implemented, etc having to postpone or extend the schedule, transportation costs have increased; Clinker and cement exports declined due to fierce competition in product prices from major manufacturers in the world, plus regulations on technical barriers in export markets; the financial situation of cement production enterprises faces many difficulties due to the large ratio of loans from banks and credit institutions, high loan interest, leading to pressure to repay both principal and interest; difficulties in the consumption market have caused many businesses to stop some production lines, leading to difficulties in cash flow to repay debts due and maintain production and business activities...

- In 2024, cement supply will continue to far exceed demand (cement supply is 117.8 million tons, while domestic cement demand is only about 58.5 - 59 million tons, up 3.3% - 4.2% compared to 2023 (56.6 million tons); cement and clinker exports are about 30 million tons, down 3.8% compared to 2023 (31.2 million tons).

- Excess supply of cement leads to increasingly fierce competition among cement production companies, reducing selling prices, increasing sales policies, introducing many new cement brands with low selling prices to increase consumption and expand market share. The selling price of cement tends to decrease while the price of raw materials and input fuels for production remains high; The average retail price of electricity increased by 4.8% from October 11, 2024, increasing the cost of producing cement and clinker, reducing the efficiency of companies.

- The trend of shifting demand from cement bags to bulk cement is increasing, while the price of bulk cement is not commensurate with cement bags, reducing the efficiency of cement production companies.

- The export market faces many difficulties due to: China almost does not import cement and clinker; Bangladesh imports clinker from excess clinker sources from Pakistan, UAE, Indonesia; The Philippines imposes anti-dumping duties on cement imported from Vietnam (application period of 5 years from March 20, 2023), initiates safeguard investigations for imported cement products in the period from 2019 to June 2024... The export price of cement to the Philippines under FOB conditions at the end of 2024 is from 40-40.5 USD/ton, down 2.0-3.0 USD/ton compared to the beginning of 2024 (from 42.5-43 USD/ton), down 8.0-9.0 USD/ton compared to the beginning of 2023 (from 48.5-49 USD/ton); the export price of clinker to Bangladesh at the end of 2024 is from 28.5-29 USD/ton, down 2.5 USD/ton compared to the beginning of 2024 (30-31.5 USD/ton), down 10.0-10.5 USD/ton compared to the beginning of 2023 (39 USD/ton).

- Domestic cement consumption and cement and clinker exports have decreased, causing inventories to increase, leading to some factories having to reduce productivity or stop furnaces to limit clinker dumping into the yard, reducing production and business efficiency.

II. Business results in 2024.

Although the cement business situation in 2024 faces many difficulties, with the drastic attention and direction of the leaders of Vietnam Cement Corporation (VICEM), the Board of Directors of the Company, along with the solidarity and efforts to overcome difficulties of all employees and employees, from the beginning of the year, Vicem Cement Trading Joint Stock Company has implemented synchronous and drastic solutions for business activities. The results achieved are as follows:

1. Main indicators:

Other areas	18.000	14.089	24.291	78,3	58,0

3. Assess the consumption situation in localities.

a. Hanoi area:

Consumption in 2024 in Hanoi will reach 362,715 tons, reaching 98.8% of the year plan and down 0.3% over the same period in 2023 (down 1,195 tons, of which Pen Son cement decreased by 35,061 tons, Hoang Thach cement increased by 28,582 tons, Tam Diep cement increased by 5,284 tons).

* For Vicem Hoang Thach cement:

- The delivery price of building materials stores for PCB30 and PCB40 Hoang Thach bags of cement in some areas is still very high, while the market share and coverage account for a relatively low percentage, which reduces the competitiveness of Hoang Thach cement with other types of cement other than VICEM.

- From the last months of 2023, the Company has implemented SuperGreen Hoang Thach bag cement products for consumption in a number of districts in the South of the Red River and Ha Tay areas and deployed for consumption in the North of the Red River from April 1, 2024 and has been well received by consumers (the selling price is competitive with other types of cement other than VICEM, the profit of the distribution channel is guaranteed...).

- In March 2024, the Company has implemented the consumption of Hoang Thach LionKing cement bags in Dan Phuong District – Hanoi City, initially putting into a number

of distribution systems because the store delivery price for PCB40 Hoang Thach Lionking cement products is lower than the traditional PCB40 Hoang Thach cement products about 30,000 VND/ton, meanwhile, the selling price to consumers remained the same (distribution channel profit increased).

- From the end of 02/2024, the Company has approached and consumed cement from Hoang Thach into Muong Thanh Cienco5 Concrete Station – Thanh Ha urban area, Ha Dong, Hanoi with an average output of 150 tons/day, but from 05/2024, due to the completion of the project, the output of bulk cement also did not meet the set expectations.

*** For Vicem Pen Son cement:**

In 2024, Vicem Cement Trading Joint Stock Company is only assigned by Vicem Butson to consume in Hoang Mai and Hanoi areas, mainly consuming cement for construction packaging, so some projects have completed the schedule or switched to consuming cheap Hoang Long cement, so the consumption output decreases.

*** For Vicem Tam Diep cement:**

Since the beginning of 2024, the Company has signed a cement consumption contract with Vicem Tam Diep and deployed Tam Diep multi-purpose cement products at projects in Hanoi; deploying SmartCement Tam Diep cement products to be sold directly at Giap Nhi warehouse, Black Ferry Port 3, Binh Doan Port, initially being sold at a number of households and some projects directly competing with Hoang Long cement, especially PCB40 cement products.

b. Thai Nguyen area:

Consumption in 2024 in Thai Nguyen will reach 72,333 tons, reaching 131.5% of the year plan and increasing by 41.8% over the same period in 2023 (up 21,318 tons).

- This is the main area for consuming cement products in Quang Son, La Hien, Quan Trieu. Hoang Thach cement consumed in Thai Nguyen is mainly PCB40 products - specializing in pouring roof foundations, while in the area mainly uses commercial concrete.

- The output of Hoang Thach cement in Thai Nguyen area increased sharply in the plastering segment because the price formed to the area of Hoang Thach SuperGreen cement products was lower than that of PCB30 Quang Son, La Hien, Quan Trieu cement types from 100,000 to 150,000 VND/ton, distribution channel profits are ensured...

- In March 2024, the Company has deployed the consumption of Huangshi LionKing cement bags in Thai Nguyen, Cao Bang, Bac Kan. Initially, it received a lot of positive feedback from the distribution system because the store delivery price for PCB40 Hoang Thach Lionking cement products is about 70,000 VND/ton compared to the traditional PCB40 Hoang Thach cement products, meanwhile, the selling price to consumers remained the same (distribution channel profit increased).

c. Other areas:

In addition to the two main consumption areas, Hanoi and Thai Nguyen, the Company has sought and exploited many new customers in other areas such as Hung Yen, Hai Duong, Lang Son, Bac Ninh,... contributing to increasing the company's consumption output.

4. Market work and product consumption:

- Selling price and sales policy:

+ The Company has maintained the promulgation of sales policies associated with the output of each distributor/customer in the regions on a monthly, quarterly and annual basis in order to increase the consumption volume of the whole Company.

+ The company has issued additional discounts (short-term) depending on the time and each area for NPPs/customers to compete with other types of cement in the market.

- Marketing and customer care programs:

+ Every month, the Company has implemented an online marketing plan (advertising via website, social networking sites, etc.) which has been known by many customers and contacted the Hotline number to sign a contract to buy cement.

+ Organizing customer care programs: Giving gifts to customers on birthdays, March 8, Tet holidays,...

+ Successfully organized the Customer Gratitude Conference combined with vacation for employees for 03 days and 02 nights at Vinpearl Ha Long from June 18-20, 2024 and the Conference to review and evaluate the cement consumption situation in 2024 in Hanoi on December 18, 2024, awarding NPPs with high output consumption achievements combined with giving Tet gifts to NPPs/customers/building materials stores; Discuss measures to boost consumption and prepare to sign contracts in 2025, as well as meet and thank customers to create solidarity and attachment.

- Management of transportation, loading and unloading:

+ Closely monitor the situation of shipment and transportation of cement from manufacturing companies to unloading points at ports in Hanoi.

+ Promptly solve inadequacies in the process of loading and unloading and transporting, transferring and rotating means of transport between wharves for convenience.

+ Timely support for heat protection to encourage workers to drive cranes, load and unload at warehouses during the hot season.

+ Closely monitor the situation of weather developments, especially the flood season, to propose policies and regulate vehicles to ensure that there are enough goods to meet the demand for consumption in the localities.

+ Successfully organized the bidding and negotiation, signed the contract for transportation, loading and unloading, and cement yard in 2025 with the units.

+ Organized Tet gifts for transporting, loading and unloading, yards, transport vehicle owners, loading and unloading workers, crane drivers,...

5. Financial work:

Part 2:

PLAN BUSINESS 2025 & IMPLEMENTATION SOLUTIONS

I. FORECAST OF THE SITUATION IN 2025

1. Advantages

- 2025 is the last year of Vietnam's 5-year socio-economic development plan for the 2021-2025 period, so the Government has also determined that 2025 is the year of acceleration, breakthrough, and finish line to bring the economy into a new era; strive to achieve the highest results of the goals, targets of the 5-year Plan 2021-2025. Some major socio-economic development targets in 2025: Vietnam's GDP growth in 2025 is expected to be about 6.5%-7% and strives to be about 7%-7.5%; The average growth rate of the consumer price index (CPI) is about 4.5%; Public investment is expected by the Government at more than VND 790,000 billion (*Source: Resolution No. 158/2024/QH15 dated November 12, 2024 of the National Assembly and the Inspection Newspaper*).

- The Government continues to maintain major public investment programs in infrastructure, especially traffic, housing and public works such as projects on highways, airports, roads and bridges and urban areas; The real estate market continues to recover from the end of the fourth quarter of 2024 to the first months of 2025 and is forecast to prosper from the second quarter of 2025... will promote an increase in domestic cement consumption. In addition, the trend of building green buildings and developing renewable energy will also be a factor supporting sustainable cement consumption and growth in 2025.

2. Difficulties

- In 2025, the world situation is forecast to continue to be complicated and unpredictable; political tensions, military conflicts are at risk of escalation and spread, the risk of disruption of supply chains, production chains, and oil prices are at risk of sharp fluctuations; natural disasters, epidemics, climate change... continue to affect the world economy.

- Vietnam's economy has both advantages and continues to suffer from "double negative impacts" from external adverse factors and internal limitations and inadequacies; Many businesses continue to face difficulties and challenges, of which the biggest difficulty for businesses today is the market.

- Domestic cement market:

+ Forecast cement supply in 2025 is about 124.78 million tons (some lines put into operation at the end of 2024: Line 5 of Thanh Thang Cement with a capacity of 2.3 million tons from September 2024; Vissai Ocean 2 cement with a capacity of 2.3 million tons from October 2024; Xuan Son cement with a capacity of 2.3 million tons from December 2024), while domestic cement demand in 2025 is expected to be about 62.5-63.5 million tons (up 6.1% - 7.8% compared to 2024).

+ The domestic cement market continues to face many difficulties and challenges: Supply far exceeds demand; the price of raw materials and input fuel for production remained high; cement companies compete fiercely on selling prices to maintain market share and increase consumption.

- Export markets:

+ Increasing trade barriers in many countries: Taiwan investigates anti-dumping of cement exported from Vietnam; In addition to imposing anti-dumping duties on cement exported from Vietnam, the Philippines has been considering imposing safeguard duties to protect the domestic manufacturing industry.

+ Competition from countries with excess cement such as Indonesia and Thailand with low selling prices and transportation costs.

+ Exporting to the European market will be increasingly difficult due to environmental protection policies, tax barriers, strict regulations on carbon emissions and high quality requirements.

- In the coming time, companies must invest heavily in waste control technology and systems to reduce dust and CO2 emissions from the cement production process according to state regulations, leading to possible cost increases in the coming years.

II. OBJECTIVES AND TASKS AND SOLUTIONS IN 2025

1. Main indicators:

TT	QUOTA	Residents	Plan for 2025	Implementation in 2024	YoY (%)

5	Average salary of employees	Thousand VND/ng/year	14.831	13.616	108,9

2. Implementation solutions:

2.1. Solutions on market and product consumption:

Sticking to the Company's goals assigned to units as a basis for building output in each area assigned to distributors and customers to implement.

- **General Planning Department:**

+ Continue to develop discount policies associated with the output of Hoang Thach and

Pen Son cement for NPPs/customers on a monthly, quarterly, yearly basis... Additional discounts (short-term discounts) for NPPs/customers depending on the time and area...

+ Monthly promulgation of discount policies for tons of consumption volume growth over the same period for each NPP/customer.

- Sales Department:

+ Strengthen the management of the area, supervise the system of building materials stores and customers to take measures to support and propose in a timely manner to meet the needs of customers and market developments.

+ Strengthen the marketing of cement bags with bottoms on projects and Hoang Thach SuperGreen cement bags, Tam Diep multi-purpose cement bags... to compete with other types of cement other than VICEM; promote the consumption of loose cement into works, mixing plants, etc.

+ Continue to implement the online marketing plan (advertising via website, social networking sites, etc.).

- Coordinate with CNTN in implementing the customer care program in 2025.

- Thai Nguyen Branch: continue to find distributors/customers to consume bulk cement, promote the consumption of LionKing Hoang Thach cement bags in Thai Nguyen, Cao Bang, Bac Kan...

+ Encourage and urge NPPs/customers to implement cement consumption according to the signed contract.

+ Continue to search for and open more NPPs with abilities, replacing NPPs with weak abilities.

2.2. Solutions for management and administration of loading and unloading transportation:

- Based on the sales characteristics of each area, find solutions to bring cement to the area to ensure enough goods to meet the demand for cement consumption for the market, optimize the ordering process to bring cement straight from the factory, port to the foot of the project.

- Continue to negotiate with units with river ports in Hanoi to keep rental prices stable, as well as work with port authorities to keep cement loading terminals stable so that cement other than VICEM is not brought by waterway to Dia Ban.

- Working with loading and unloading units to determine the unit price of loading and unloading, arranging enough labor to meet the needs of customers.

- Coordinate with shipping units to increase the delivery of Tam Diep cement to ports (other than the implemented ports) according to the plan agreed with Vicem Tam Diep and report to the Corporation.

2.3. Financial and accounting solutions, debt recovery management:

- Finance and accounting:

+ Monthly balance of cash flow to ensure timely payment of debts due, maximize cash flow efficiency, and ensure the efficiency of capital use.

+ For cost of cost price: The company regularly inspects, reviews, negotiates and negotiates with units providing goods and services in order to save the most cost of cost price. The Company actively monitors and compares the sales, discount, and promotional policies of suppliers to ensure the Company's interests.

+ For management costs and sales expenses: The Company reviews and makes detailed plans for expenses to ensure production and business efficiency. In the process of production and business, the Company continuously monitors and reviews the payment of expenses, closely follows the approved plan, and ensures the efficiency of cost payment.

- Debt management:

+ For revolving debts: The Company continues to direct relevant departments to focus on regularly controlling the collection of money and managing debts according to the prescribed limits. Monthly confirmation of debt reconciliation with distributors and customers as prescribed. Guarantee debts through economic contracts for customers.

+ For bad debts: The Company continues to strengthen measures to recover bad debts and complete legal documents to bring a number of subjects to legal authorities.

2.4. Labor organization:

- Continue to review the current internal regulations, internal rules and regulations of the Company in combination with the application of the provisions of the law to amend and promulgate new regulations to suit the reality of the Enterprise.

- Develop a widespread, simple and easy-to-understand propaganda program on the law in each field, in order to help employees have a basic understanding of first, ensuring their own rights and interests, policies and regimes, and secondly, having basic knowledge of the law to comply well.

- Grasp the changes of the law to promptly adjust and continue to fully implement regimes and policies for employees in terms of salaries, shift meals, labor protection equipment, heat protection, social insurance, health insurance, unemployment insurance, etc.

- Continue to closely follow the plan on labor use, legislation, salary, etc. reported to the Corporation and the Board of Directors of the Company.

- Study and grasp Decrees and circulars guiding the management and review of employees, develop labor use plans and policies to support redundant labor when terminating labor contracts in order to effectively and optimally use labor resources, reduce costs, etc. according to the trend of gradually decreasing, partly helping the Company ensure the efficiency of business operations.

- Perform well the training and retraining for employees according to the plan reported to the Corporation and the Board of Directors of the Company.

2.5. Management of house and land use and asset leasing:

- Continue to coordinate with consulting units to complete dossiers and procedures for the purpose of signing a long-term land lease contract as soon as possible and being granted a land use right certificate for the entire land plot at 348 Giai Phong Street, Phuong Liet Ward, Thanh Xuan District, Hanoi City.

- Surveying, estimating and constructing and repairing items in the Company's fixed asset repair plan in 2025 in Hanoi, Phu Tho, Yen Bai, Lao Cai to ensure the safety of works, people and assets in order to well serve the Company's production and business tasks.

- Grasp the fluctuations in the real estate rental market, continue to exploit and trade the Company's existing real estate that does not need to be used.

- Urge units renting warehouses and offices to work with the Company to be aware of maintaining general hygiene and ensuring the safety of people and property, fire prevention and fighting, especially holidays and the approaching Lunar New Year 2025.

- Inspect houses, objects and structures, if there is any damage, promptly repair them to ensure the safety of people and property, especially in the rainy and stormy season in 2025.

- Expected revenue in 2025: VND 9.3 billion.

In which: + In Hanoi: 8.9 billion VND.

+ In the provinces of Phu Tho, Lao Cai and Yen Bai: 0.4 billion VND.

2.6. Other tasks:

- Ensure the operation of office vehicles to serve the needs of departments, safely and in accordance with regulations.

- Ensure that the IT work and equipment of the departments operate well, serving the needs of production and business.

- Continue to well implement the work of military protection, fire protection and occupational safety, and environment in Thanh Xuan district.

3. Work of the Party, mass organizations and social security

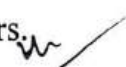

- Fully participate in learning classes, thoroughly implement the Resolutions of the Central Committee and superior Party Committees in accordance with the plan and required contents.

- To organize emulation movements in labor and production with preliminary review, review and commendation.

- Regularly propagate and mobilize employees and employees in the Company to comply with the provisions of the Law, internal rules and regulations of the Company, implement a civilized lifestyle and corporate culture.

- Implement activities to celebrate major holidays.

- Regularly pay attention to and take care of the working life and income of employees, creating the best working environment for employees.

Respectfully report to the General Meeting of Shareholders.

VICEM CEMENT TRADING JOINT STOCK COMPANY**

To: 2025 Annual General Meeting of Shareholders

Pursuant to the Charter of organization and operation of Vicem Cement Trading Joint Stock Company, the Board of Directors reports on activities in 2024 and orientations and tasks in 2025 to submit to the Company's 2025 Annual General Meeting of Shareholders as follows:

I. Characteristics of the situation:

Vicem Trading Cement Joint Stock Company to implement business tasks in 2024 also still has many difficulties.

- The world situation continues to be difficult and challenging, monetary policy tightening, political instability, natural disasters, climate change, etc.
- With the determination to develop the economy, the Government and the Prime Minister have drastically directed to focus on implementing synchronous solutions, making efforts to remove obstacles and accelerate the implementation of projects and works.
- Vicem - The parent company and its member units are promoting the process of restructuring and equitizing the enterprise...
- Along with that, Vicem Cement Trading also promotes restructuring in the direction of increasingly adhering to the functions and tasks of the unit and in accordance with the current business conditions and environment...
- The Board of Directors of the Company consists of members who are capable, qualified, experienced in management, united, enthusiastic and highly responsible in their work.
- A team of experienced employees, with a high sense of responsibility and bravery in business...

In addition, the process of implementing the task in 2024 still has other major obstacles, that is, the cement industry is still in a state of supply far exceeding demand, and the market is fiercely competitive. In particular, the "internal" competition between the Company and other NPPs of cement production companies in Vicem in the same area is sometimes unhealthy and

transparent... consuming resources and reducing the overall efficiency of Vicem as well as its member companies and Vicem Cement Trading is no exception...

Employees are still in the state of "surplus people, shortage of workers", which has affected the synchronous implementation of the Company's tasks.

The Company's financial capacity has improved a lot, but there is still great pressure from bad debts and many consequences to be resolved.

The system of statutes and regulations has been reviewed, amended and supplemented, but it still needs to be improved, especially popularization and application in business practice, etc.

However, thanks to regularly receiving the attention and direction of Vietnam Cement Corporation and the attention and encouragement of shareholders and creating conditions for customers... The Board of Directors, the Board of Directors, employees and employees of the Company have united, made efforts, strived to overcome difficulties, and take advantage of favorable conditions to complete the tasks in 2024.

II. Evaluation of the results of the implementation of business objectives and the situation of the Company's management in 2024:

3. Remuneration of the Board of Directors in 2024:

In 2024, the remuneration paid to the members of the Board of Directors of the Company is equal to the remuneration approved by the General Meeting of Shareholders, the total amount spent is VND 264,000,000.

4. Assessment of the management situation:

The Board of Directors of the Company has held quarterly meetings as well as irregular meetings to review the implementation of production and business plans in the quarter and year, develop goals and work programs for the next quarter and next year; Approving the contents of the Annual General Meeting of Shareholders; Analyze, discuss and come to an agreement on human resources, production and business and other issues of the Company. The Board of Directors has promoted the spirit of democracy, focused on wisdom, discussed directions, tasks and decided on many key issues that need to be focused on directing the

implementation. Therefore, the management has many new steps, contributing to the efficiency of the Company's production and business activities.

The Board of Directors of the Company has operated in accordance with the functions and tasks specified in the Company's Charter, creating favorable conditions for the Board of Directors and related members to operate in the spirit of specific assignment and decentralization, not overlapping and taking the Company's operational efficiency as the top goal. The Board of Directors of the Company regularly supervises the activities of the Director and the Company's Executive Board through the reports of the Director's monthly, quarterly and annual briefings; Approve the reports of the Director in the meetings of the Board of Directors; Approved the report on some important tasks of the Company; Approve the results of the Company's production and business activities.

The Board of Directors of the Company has focused on directing and promoting cement consumption by many measures such as: ensuring the source of goods, consumption mechanisms (selling prices, selling costs, commercial discounts, promotions, etc.) are handled and adjusted quickly, promptly, in accordance with the actual situation of the market at each time, thus contributing to maintaining the area, market share.

The organization is focused, the Company has implemented a restructuring plan, gradually rearranging the organization on the basis of reducing the management apparatus, reducing indirect labor, and increasing direct labor.

Directing the utilization of the Company's facilities by leasing warehouses, the Company's headquarters, the headquarters of offices in the provinces and at the same time directing the saving of circulation costs in permissible conditions in order to increase competitiveness, ensure income for employees and increase the Company's business efficiency, ensuring profits to pay dividends to shareholders.

Put into application a number of regulations on management and administration of the Company such as: Regulations on financial management, regulations on debt management, regulations on personnel management, etc. Due to the strict implementation of the Company's regulations, the management has made positive changes to promptly respond to the operation of the Company's production and business activities. After each meeting, the Board of Directors has promptly made resolutions to direct the CEO and regularly check and urge.

However, in the process of management, the Board of Directors of the Company realizes that there are still certain limitations, namely:

- The management of money, goods and debt collection of the Company in the past year, although the Company's leaders have paid attention to and had many positive changes, the outstanding debt level is still at a high level and the outstanding debts of some subjects and customers have not been fully recovered.

- Training and retraining in order to improve the capacity, professional qualifications and skills of managers in departments and units should be focused on in order to suit the new situation.

- Construction investment: The company continues to complete procedures to sign land lease contracts and land use right certificates at land area No. 348 Giai Phong street.

III. Orientations and tasks in 2025 and the coming time:

It is forecasted that in 2025, the country's economic situation will continue to be difficult due to the general impact of the whole world.

The business environment in 2025 will face many difficulties compared to 2024. The company determines its business goals in 2025, as follows:

- Orientation of the Company's operation: Continue to promote business, exploit all resources to gradually expand market share, improve the Company's competitiveness and position in the market... constantly improve management capacity and business efficiency. - Debt management and bad debt handling:

+ Continue to focus on debt management, on the basis of gradually completing regulations and regulations on debt management and sales management; Develop a system and regime for regular and periodic reporting and reconciliation to monitor in detail the development of the debt situation of customers...

+ For bad debts: Continue to review and consolidate dossiers of bad debts; Regularly urge, compare and grasp the situation of debt customers to take immediate measures; Closely coordinate with legal consultancy units as well as competent agencies in handling debts.

In order to strive to achieve the goals in 2025 and the following years, the Board of Directors and the Board of Directors of the Company need to focus on directing and solving the following issues:

1. Continue to stabilize and promote cement trading, find all measures to direct the implementation of production and business targets in 2025. Trying to ensure that dividends are paid to shareholders according to the company's objectives approved by the General Meeting of Shareholders.

2. Continue to direct the review, formulation and consolidation of internal management regulations, review costs, practice thrift and anti-waste in order to reduce selling costs, improve business efficiency and competitiveness of the company.

3. Continue to restructure the Company in the direction of building an organizational model in accordance with the reality of business activities. Define, arrange and rearrange personnel in the direction of streamlining, quality and efficiency; Regularly urge, inspect and organize the good implementation of labor discipline in association with promoting the assignment and decentralization, closely associating rights with specific responsibilities in performing tasks.

4. Continue to improve the Company's business mechanism and methods; Regularly urge, inspect and supervise the management of money and goods and debt recovery, so as not to cause prolonged and difficult debts. Make adequate provisions in accordance with regulations.

5. **Fully** implement policies and well settle jobs, incomes and lives for employees. Building a salary distribution system, an employee evaluation system associated with productivity and work efficiency; Step by step implement training and retraining to improve the capacity and qualifications of employees at all levels to meet job requirements.

6. Strictly abide by all guidelines and guidelines of the Party, policies and laws of the State as well as regulations and regulations of Vicem...

Above is the 2024 activity report and the orientation of work tasks in 2025 of the Board of Directors of Vicem Cement Trading Joint Stock Company. The Board of Directors closely follows the functions, tasks and powers, continues to promote the achieved results, concentrates collective strength and wisdom, overcomes difficulties and exists to do better the management of the Company that the General Meeting of Shareholders has entrusted to it./.

In 2024, the realized consumption volume will be 449,137.66 tons, net revenue will be VND 489,301 billion, of which cement business revenue is VND

481,392 billion, revenue from office and warehouse leasing business is VND 7,909 billion.

- Total profit before tax in 2024 is 1,953 billion VND in which:
 - + Profit before tax on cement business in 2024 is -628 million copper.
 - + Profit before tax from activities the business of leasing offices and warehouses in 2024 is 304 million VND.
 - + Profit before operating tax financial activities implemented in 2024 are VND 2,298 billion.
 - + Other pre-tax profit realized in 2024 is -21 million copper.
- Profit after corporate income tax in 2024 is VND 1,282 billion.
- The expected dividend payout ratio in 2024 is 2.5%.

II. THE 5-YEAR PRODUCTION AND BUSINESS PLAN FOR THE PERIOD OF 2025 - 2029

1. Market assessment in 2024 and market assessment for the period 2025-2029

In 2024, the real estate market will continue to face difficulties, when capital flows have not yet been cleared, homebuyer sentiment is cautious due to rising housing prices.

In addition, there are difficulties from within the industry when the supply of cement exceeds the demand in 2024, there will continue to be a number of new cement production lines put into operation, bringing the supply of cement to about 120 million tons.

However, the upcoming growth drivers are also huge. It is forecasted that in 2025, GDP growth will be about 6.5-7% and strive to achieve a growth rate of 7.5-8%.

Opportunities to increase domestic cement consumption from public investment projects: North-South expressway project; Lao Cai – Hanoi – Hai Phong railway project; Urban railway projects in Hanoi...

Growth drivers include: Total investment capital of the whole society is about 174 billion USD or more, approximately 33.5% of GDP (higher than 3 billion USD); of which public investment is about 36 billion USD (equivalent to 875 trillion VND, about 84.3 trillion VND higher than the assigned plan in 2025 of 790.7 trillion VND), private investment is about 96 billion USD, FDI is about 28 billion USD, and other investment is about 14 billion USD. Total retail sales of consumer goods and services (current prices) in 2025 will increase by about 12% or more. Total import and export turnover in 2025 will increase by 12% or more; trade surplus is about 30 billion USD.

2025 is the last year of the Medium-term Investment Plan 2021-2025, so the Government requires that in 2025, ministries, central and local agencies prioritize the allocation of state budget capital for projects expected to be completed in the

medium-term plan period; at the same time, allocate capital for the preparation of investment in new start-up projects in the next time.

REPORT

Regarding the approval of the handling of the Company's outstanding construction investment projects

To: GENERAL MEETING OF SHAREHOLDERS

According to the provisions of the Law on Real Estate Business No. 29/2023/QH15, it is necessary to ensure at least 20% of equity (own capital) to invest in the project. Currently, the Company's equity is only sufficient to secure its current business. If the above two projects continue to be implemented, the Company must increase its charter capital. However, the increase in charter capital for real estate investment is not allowed for VICEM (the parent company of the Company) according to the provisions of Decree 32/2018/ND-CP dated 08/03/2018 of the Government amending and supplementing a number of articles of Decree No. 91/2015/ND-CP dated 13/10/2015 of the Government on investment of State capital in enterprises and management, use of capital and assets at the enterprise.

Currently, the Company has not signed land lease contracts for the land plots in the above two construction investment projects, and is leasing land with annual land rent. According to the 2024 Land Law, for land managed by agencies and organizations of the State but not yet assigned, leased or allocated land for management, the land must be handed over to the State for auction of land use rights. Therefore, the possibility of the Company winning the auction of land use rights in these locations is also very difficult.

In previous years, the Company had to make a plan to rearrange and handle houses and land according to Decree No. 67/2021/ND-CP amending and supplementing a number of articles of Decree 167/2017/ND-CP at the request of the Ministry of Construction. Based on the plan for rearrangement and handling of houses and land approved by the competent authority, the Company will carry out legal procedures on land and then there will be an investment plan for the outstanding projects of the Company mentioned above.

From the above reasons, the Board of Directors of the Company proposes to permanently stop the above projects because they do not ensure the legal basis and feasibility according to current regulations. For the expenses incurred in the process of setting up the two projects mentioned above, they will be recorded in the business results in 2025.

The Board of Directors of the Company would like to submit to the General Meeting of Shareholders for approval the handling of backlog construction projects of Vicem Cement Trading Joint Stock Company.

(Attached to the Report backlog of construction investment projects and ask for opinions on project handling).

Thank you very much!
