*** Reasons for not completing the plan assigned by the General Meeting of Shareholders:**

- Super typhoon YAGI (Storm No. 03) made landfall directly in Quang Ninh province on September 7, 2024, causing severe damage to people and businesses in Quang Ninh province, including Vinacomin - Vang Danh Coal Joint Stock Company.

Although the Company implemented various storm prevention measures as directed by TKV and Quang Ninh Province, the storm's extreme strength, with wind gusts reaching level 17, caused a power outage and disrupted the communication system. At the same time, prolonged heavy rainfall from September 7, 2024, through the early morning of September 8, 2024, led to flooding incidents at the Pumping Station and several underground tunnels in the Vang Danh Mine shaft area (elevation +0/-175) and the Canh Ga Mine shaft area (elevation +115/-50).

The company had to stop production at the Canh Ga Mine area and the -175 level Vang Danh Mine to fix the problem and restore production, thus failing to complete the plan according to the Resolution of the General Meeting of Shareholders.

- Regarding open-pit mining of seam 4-8A: During the year, the Company has not yet obtained a mining license, so the Company has not been able to implement it.

Part II

PLAN AND MEASURES FOR MANAGING AND OPERATING PRODUCTION AND BUSINESS IN 2025

1. General situation.

In 2025, the global situation is forecasted to continue evolving in a complicated and unpredictable manner, with intensified geopolitical conflicts and great-power competition posing numerous risks. Global economic growth is expected to recover slowly, exports will face difficulties, and global foreign direct investment is projected to decline with a strong trend of relocation. Domestically, the economy continues to face the dual impacts of unfavorable external factors and unresolved internal difficulties, along with newly arising challenges, posing significant pressure on the management and implementation of socio-economic development tasks.

The ongoing conflict between Russia and Ukraine shows no sign of ending, making it increasingly difficult to source coal imports. Meanwhile, energy demand in general—and domestic coal consumption in particular—continues to rise. In addition, labor recruitment is facing many difficulties. Although mining technology has been improved, the progress remains limited, making the implementation of increased production targets assigned by TKV to the Company highly challenging. The Company's production areas are becoming increasingly wider and deeper, while input prices—such as fuel, materials, taxes, and fees—are all trending upward, significantly affecting the Company's financial balance and cost management operations.

2. Business Plan Management Objectives for 2025

Officers, employees, and workers of the Company will uphold the tradition of "Discipline and Unity," demonstrating strong determination to overcome difficulties, adapt flexibly, and maintain stable production and business operations. By the Independent Member of the Board of Directors

To: Esteemed Shareholders

Pursuant to the Charter on the Organization and Operation of Vang Danh Coal Joint Stock Company – Vinacomin;

Pursuant to the Regulation on the operation of the Board of Directors approved by the General Meeting of Shareholders on April 23, 2021;

Pursuant to Resolution No. 17/NQ-HDQT dated 24/04/2025 of the Board of Directors of Vang Danh Coal Joint Stock Company – Vinacomin.

In accordance with the duties assigned by the Board of Directors, the independent Board member reports the evaluation of the Board of Directors' activities in 2024 as follows:

The Board of Directors of the Company has worked with a sense of responsibility and transparency in governance, fully complying with the regulations for public companies. The Board meetings have been convened in a timely manner and conducted according to the procedures set out in the Company's Charter and Internal Governance Regulations. The contents of the meetings were fully discussed and carefully evaluated by the Board members to propose directions and solutions that bring the highest benefits to the Company.

Issues related to production and business plans, investment in construction, organization and personnel work, and the development of management regulations were all considered and assessed by the Board in regular meetings.

The decisions made by the Board at these meetings were approved by the majority vote. The meeting minutes were prepared in full and signed by the attending Board members.

1. Board of Directors' Organizational Structure:

The Board of Directors of the Company for the term 2023-2028 consists of 05 members, including 02 members holding executive positions, 02 non-executive members, and 01 independent member, ensuring the number and structure are in accordance with the Company's Charter and legal regulations.

All members of the Board of Directors actively and fully participate in strategic planning, compliance monitoring, strategic review, and ensuring the best corporate governance practices.

2. Operational Mechanism:

In 2024, the Board of Directors held 33 direct meetings. The meetings were convened and conducted according to a specific schedule, with all necessary documents prepared, in compliance with the Company's Charter and legal regulations. The content of the meetings was thoroughly discussed, debated, and carefully evaluated by the Board members.

Issues related to strategy, business plans, finance, corporate culture, and the development of the management system within the Company were closely discussed and controlled between the Board of Directors and the Management Board.

Changes to production and business plans, investment plans, and new strategies were independently studied, based on scientific grounds, with critical review and feedback between the Board of Directors and the Executive Board.

3. Results of Governance and Supervision:

Overall, the Board of Directors has effectively fulfilled its role in implementing the plans, policies, and strategic directions set by the General Meeting of Shareholders.

The Board of Directors has complied with corporate governance regulations, convened regular and extraordinary meetings to provide timely guidance and make decisions that are appropriate for the current situation.

4. Conclusion:

The Board of Directors has fully performed its function as a representative of the shareholders in overseeing the Company's operations, providing appropriate guidance, and giving timely instructions to ensure the effective use of resources in achieving the targets set by

the General Meeting of Shareholders (GMS), in compliance with legal regulations and the Company's Charter.

In addition to performing its management and supervision functions, the Board of Directors has worked closely with the Executive Board to find solutions to overcome difficulties in production and business in 2024.

Overall, in 2024, the Company was severely impacted by Typhoon No. 3 (Typhoon Yagi), which caused flooding in the -175m level at Vang Danh Mine and in the -50m level Canh Ga Mine. As a result, the Company had to halt production to address the issue and restore operations. Furthermore, the Company faced significant challenges due to rising raw material costs, increasingly difficult mining conditions, and the growing complexity of procedures for exploring/renewing exploration and mining permits, planning approvals, investment policies, land clearance, and land leasing, which delayed construction progress and led to underperformance in extraction output compared to the designed capacity. The geological conditions, complex seams, intercalated rocks, high water levels, and great mine pressure further exacerbated these challenges. However, with a high sense of responsibility, solidarity, and cooperation, the Board of Directors took decisive action in overseeing and directing the Executive Board to implement the resolutions of the General Meeting of Shareholders and the Board of Directors. Despite not meeting the targets set by the GMS, the unity, discipline, and shared determination of the Board of Directors, the management team, and the Company's employees enabled the Company to overcome these challenges and achieve effective production and business results for 2024, ensuring the best interests of the Company and its shareholders. *RM*
