NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS (continued)
as at and for Quarter I ended 31 March 2025

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

2.3 *Fiscal year and accounting currency*

The Bank's fiscal year starts on 01 January and ends on 31 December.

These interim separate financial statements are prepared for the 1st Quarter of 2025 which starts on 01 January and ends on 31 March 2025.

Monetary unit used in accounting is Vietnamese Dong (VND). For the purpose of preparing the separate financial statements, all amounts are rounded to the nearest million and presented in VND million (million dong).

2.4 *Accounting estimates and assumptions*

The preparation of the Separate financial statements requires the Bank to make estimates and assumptions which affect the reported figures of assets and liabilities as well as the disclosure of contingent liabilities. These estimates and assumptions also affect income, expenses and the resultant provisions. Such estimates are necessarily based on assumptions involving varying degrees of subjectivity and uncertainty. Therefore, actual results may lead to the adjustments of such provisions in the future.

2.5 *Cash and cash equivalents*

Cash and cash equivalents consist of cash, gold and gemstones, balances with the State Bank of Vietnam, government bills and other short-term valuable papers eligible for SBV discount, current account and deposits with other credit institutions with maturity of less than 90 days from the date of granting and short-term investments with original terms not exceeding 90 days, with high liquidity and can be easily converted into defined amount of cash and do not have much risk in conversion into cash.

2.6 *Deposits with and loans to other credit institutions*

Deposits with and loans to other credit institutions are disclosed and presented at the amount of principal outstanding at the end of the accounting period.

The credit risk classification for deposits with and loans to other credit institutions is made in accordance with Circular No. 31/2024/TT-NHNN dated 30 June 2024 provides for the classification of assets in operations of commercial banks, non-bank credit institutions and foreign bank branches ("Circular 31/2024").

Provisions for deposits with and loans to other credit institutions is made in accordance with Decree No. 86/2024/ND-CP dated 11 July 2024 provides for amounts and methods of establishing risk provisions and use of provisions for management of risks arising from operations of credit institutions and foreign bank branches ("Decree 86/2024"). Accordingly, the Bank makes specific provisions for deposits (excluding demand deposits) and loans to other credit institutions.

According to Decree 86/2024, the Bank is not required to make a general provision for deposits with and loans to other credit institutions.

NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS (continued)
as at and for Quarter I ended 31 March 2025

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Loans and advances to customers

Loans and advances to customers are disclosed at the principal amounts outstanding at the end of the accounting period.

29. CONTINGENT LIABILITIES AND COMMITMENTS

In the normal course of business, the Bank is a party to financial instruments which are recorded as off-balance sheet items. These financial instruments mainly comprise financial guarantees and commercial letters of credit. These instruments involve elements of credit risk in excess of the amounts recognized in the separate statement of financial position.

Credit risk for off-balance sheet financial instruments is defined as the possibility of sustaining a loss in case any other parties to a financial instrument fail to perform in accordance with the terms of the contract.

Financial guarantees are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party including guarantee for borrowings, settlement, and performing contracts and bidding. The credit risk involved in issuing guarantees is essentially the same as that involved in extending facilities to other customers.

Commercial at sight letters of credit represent a financing transaction by the Bank to its customer where the customer is usually the buyer/importer of goods and the beneficiary is typically the seller/exporter. Credit risk is limited as the merchandise shipped serves as collateral for the transaction.

Deferred payment letters of credits represent the amounts at risk should the contract be fully drawn upon and the client defaults in repayment to the beneficiary. Deferred payment letters of credit that defaulted by clients are recognized by the Bank as granting of a compulsory loan with a corresponding liability representing the financial obligation of the Bank to pay the beneficiaries and to fulfill the guarantor obligation.

The Bank usually requires customers to place margin deposits for credit related financial instruments. The value of deposits may vary from 0% to 100% of the value of the commitments issued depending on the customers' trustworthiness.

33. MARKET RISK

33.1 Interest rate risk

The real interest rate re-pricing term of the assets and liabilities is the remaining period from the date of financial statements to the latest interest rate re-pricing term.

The following assumptions and conditions are applied in the analysis of real interest rate re-pricing term of the Bank's assets and liabilities:

- ▶ Cash and cash equivalents on hand, investments in equity securities; long-term investments and other assets (fixed assets, real estate investments and other assets) are classified as non-interest bearing items;
- ▶ Deposits at the SBV are considered settlement deposits, thus the real interest repricing term is assumed to be one month;
- ▶ The real interest repricing term of security investments and trading securities which are debt securities is based on actual maturity date at the statement of financial position date of each securities; equity securities are classified as non-interest bearing items;
- ▶ The real interest repricing term of deposits due from other banks and loans to other banks, loans to customers, borrowings from the Government and the SBV, customer deposits are identified as follows:
 - Items with fixed interest rate during the contractual term: the real interest adjustment term is based on the contractual maturity date from the date of the statement of financial position;
 - Items with floating interest rate: the effective interest re-pricing term is determined based on the time to the nearest interest rate re-pricing date from the date of the statement of financial position;
- ▶ The real interest repricing term of other borrowed funds that the Bank bears risks is based on the actual remaining period subsequent to the statement of financial position date; and
- ▶ The real interest repricing term for other liabilities is categorised from one to three months. In reality, these items can have different interest rate repricing terms.

33. MARKET RISK (continued)

33.2 Currency risk

Currency risk is the risk that the value of a financial instrument fluctuates due to changes in foreign exchange rates.

As the Bank was incorporated and operates in Vietnam, VND is the reporting currency. The major currency in which the Bank transacts is also VND. The Bank's loans and advances were mainly denominated in VND with the remainder mainly in USD. However, some of the Bank's other assets are in currencies other than VND and USD. The Bank's management has set limits on positions by currency. Positions are monitored on a daily basis and hedging strategies are used to ensure that the positions are maintained within established limits.

33. MARKET RISK (continued)

33.3 Liquidity risk

Liquidity risk is defined as the risk that the Bank will encounter difficulty in meeting obligations associated with financial liabilities. Liquidity risk arises because of the possibility that the Bank might be unable to meet its payment obligations when they fall due under both normal and stressed circumstances. To limit this risk, the management has arranged diversified funding sources in addition to its core deposit base, and adopted a policy of managing assets with liquidity in mind and of monitoring future cash flows and liquidity on a daily basis. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure additional funding if required.

The maturity term of assets and liabilities represents the remaining period of assets and liabilities as calculated from the statement of financial position date to the point of settlements as stipulated in contracts or in issuance terms and conditions.

The following assumptions and conditions are applied in the analysis of overdue status of the Bank's assets and liabilities:

- ▶ Deposits at the SBV are classified as demand deposits which include compulsory deposits. The balance of compulsory deposits depends on the proportion and terms of the Bank's customer deposits;
- ▶ The maturity term of investment securities is calculated based on the maturity date of each kind of securities;
- ▶ Trading securities and investment equity securities are listed securities, so they are considered as up to one month;
- ▶ The maturity term of placements with and loans to other banks; and loans to customers is determined on the maturity date as stipulated in contracts. The actual maturity term may be altered because loan contracts may be extended. Besides, loans to customers are reported at the principal amounts, which do not include provision for credit losses;
- ▶ The maturity term of equity investments is considered as more than one year because these investments do not have specific maturity date;
- ▶ The maturity term of deposits and borrowings from other banks; and customer's deposits is determined based on features of these items or the maturity date as stipulated in contracts. Vostro account and demand deposits is transacted as required by customers, and therefore, being classified as current accounts. The maturity term of borrowings and term deposits is determined based on the maturity date in contracts. In fact, these amounts may be rotated, and therefore, they last beyond the original maturity date; and
- ▶ The maturity term of fixed assets is determined on the remaining useful life of assets.
