2.3 The congress discussed the issues presented

Question 1: The business performance has been declining in recent years, and achieving the business targets has been challenging. Aside from external global macroeconomic factors, are there any internal reasons within the company?

Answer: During the 2023–2024 period, the company was determined to resolve its inventory issues. In the past, inventory volume reached up to 20,000 tons, but by the end of 2024, the high-cost inventory had been cleared, reducing the remaining volume to 10,300 tons. Selling this inventory resulted in a loss of about USD 3–5 per kilogram, leading to negative profits over the past two years. In addition, the high cost of certified shrimp production has also contributed to the declining profit.

Question 2: Shareholders are pleased to see that the group's ecosystem (its subsidiaries) is gradually being completed. How confident is the group's leadership in achieving this year's targets, and what is the roadmap for MPG to strongly reaffirm its market position?

Answer: In 2025, the company has basically resolved its inventory issues and will focus on developing value-added products — Minh Phu's key strength — instead of competing on raw material prices with countries like Ecuador and India. At the same time, the company is accelerating automation at new factories and upgrading production lines at existing ones as part of its current strategy. With a flexible approach, Minh Phu is confident in achieving or surpassing this year's profit target.

Question 3: Mitsui has been a long-time partner of the company. What specific and practical support has Mitsui provided to help improve the group's performance?

Answer: In 2013, when Mitsui Singapore invested in Minh Phu Hau Giang, the sales volume through Mitsui reached 1,910 tons. Then, in 2019, when Mitsui invested in the parent company, the volume increased to 2,700 tons, and by 2024, it had reached 6,900 tons. Through Mitsui, Minh Phu expanded its sales to end-consumer companies such as Burger King and Lotteria. Currently, Minh Phu is continuing efforts to expand sales to major consumer companies such as supermarkets, convenience stores, and restaurant chains. Through Mitsui's network and business relationships, Minh Phu hopes to further accelerate the expansion of its sales activities.

Question 4: What is the progress on the construction of the Minh Phat – Khanh An plant?

Answer: The progress is still slow but is expected to be completed by the end of this year. This is a highly automated plant that uses many robots to replace manual labor, which has slightly delayed the timeline. The designed capacity is about 30,000 tons per year.

Question 5: Please share the company's progress in securing its own raw material supply?

Answer: Previously, Minh Phu focused heavily on developing farming areas due to the pressure of having certified shrimp. Now, Minh Phu no longer faces severe raw material pressure, as in addition to its own certified shrimp farms, the company also cooperates with local farmers by encouraging, guiding, and subsidizing them to raise certified shrimp. Minh Phu ensures that its factories have sufficient and surplus raw materials for export processing.

Question 6: What is the company's situation regarding the anti-dumping case on shrimp?

Answer: The U.S. Department of Commerce recently imposed anti-dumping duties of over 35% on shrimp exports from 24 Vietnamese companies. Minh Phu, however, has been exempt from anti-dumping investigations since 2016, meaning the company is not subject to this type of tax.

➤ **The discussion time is up. Shareholders have no further comments.**

2.4 The congress voted to approve the issues discussed as follows:

REPORT FROM BOARD OF MANAGEMENT

Dear valued Shareholders,

2024 remained a challenging year for Minh Phu, as its business operations were negatively affected by both internal and external factors. However, with the mission of delivering peace of mind and a great dining experience to consumers, the entire leadership team and employees of Minh Phu stayed united and committed to continuous efforts to bring Vietnamese shrimp in general—and the Minh Phu brand in particular—further and higher in the global export market.

1. Report on business operation results

In 2024, the Company recorded growth in both revenue and production output. Specifically, net revenue reached over VND 14,731 billion, an increase of 36.85% compared to 2023, achieving 93.23% of the annual target. Production and export volumes in 2024 increased by 24.31% and 35.68%, respectively, compared to the same period last year. However, due to the continued rise in the cost of raw materials and related expenses driven by market supply and demand, profits were affected. As a result, the Company recorded a pre-tax loss of VND 130.45 billion and an after-tax loss of VND 190.62 billion.

| Criteria | Unit | 2023 | 2024 | 2024 plan | Compared to 2023 (%) | Compared to plan (%) |
|----------------------|---------|-----------|-----------|-----------|----------------------|----------------------|
| 1- Export revenue | Mil USD | 445.76 | 556.48 | - | 24.84% | - |
| 2- Production volume | MT | 40,929.00 | 55,805.00 | 56,000.00 | 36.35% | 99.65% |
| 3- Export volume | MT | 40,332.00 | 54,722.00 | - | 35.69% | - |
| 4- Net revenue | Bil VND | 10,767.00 | 14,735.00 | 15,805.80 | 36.85% | 93.23% |
| 5- Profit before Tax | Bil VND | -95.52 | -130.45 | 1,125.60 | 36.57% | - |
| 6- Profit after tax | Bil VND | -105.07 | -190.62 | 1,021.50 | 81.42% | - |

In 2024, the U.S., Japan, Australia & New Zealand, and the EU remained key markets in the Company's revenue structure. However, export volume and value to the EU, Russia, and South Korea saw notable growth, with export value increasing by 40.41%, 167.42%, and 54.69%, respectively. Deeper market penetration and higher sales volumes in these demanding markets—especially the EU—have created more opportunities for Minh Phu to expand its customer base and reduce reliance on other major markets like the U.S., where trade barriers and tariffs remain unpredictable.

2. Assets and Liabilities situation

As of December 31st, 2024, Minh Phu's total assets decreased by 6.58%, to VND 9,536.77 billion, mainly due to asset structure adjustments. Short-term assets accounted for 64.76% of total assets and dropped by 10.36% compared to the same period in 2023. The main reason was a significant reduction in inventory—down by over 21% year-on-year—indicating that sales performance remained stable. On the other hand, long-term assets saw only a slight decrease. Notably, tangible fixed assets increased by over 37%, while construction-in-progress expenses dropped by 28% compared to the same period. This was mainly due to the completion of worker dormitories and the purchase of machinery and equipment for the plant's processing lines.

In Minh Phu's debt structure, short-term debt continued to account for over 90% and decreased slightly by 2.07%, while long-term debt saw a sharp decline of 9.28% compared to 2023. In an unfavorable business environment, the Company settled due debts and restructured its capital sources, limiting new borrowings to reduce interest expense pressure. Given that some loans are in USD and exchange rate fluctuations remain unpredictable, this approach to debt repayment and reduced new borrowing has helped Minh Phu maintain financial stability and align with its business strategy.

3. Report on financial situation

- **About solvency:** Minh Phu's solvency showed slight fluctuations in 2024, with the current ratio decreasing from 1.58 to 1.42 times, while the quick ratio increased from 0.44 to 0.53 times. The main reason for the change in the current ratio was a decline of over 20% in inventory and a reduction of more than VND 100 billion in prepayments to suppliers, which caused the Company's short-term assets to decrease by 10% compared to the same period last year. Meanwhile, short-term liabilities decreased slightly by 2.07% as the Company partially settled its short-term loans. Conversely, Minh Phu's significant reduction in finished goods and merchandise inventory increased the proportion of highly liquid assets relative to total short-term liabilities, resulting in a 0.09-point increase in the quick ratio.

- **About capital structure:** As of December 31st, 2024, the Company's capital structure showed an increase in the debt-to-total-assets ratio from 46.54% to 48.49%, and the debt-to-equity ratio rose from 87.06% to 94.12%. Although Minh Phu significantly reduced both short-term and long-term borrowings (by 14.70% and 32.64%, respectively), these decreases did not fully offset the decline of more than VND 671 billion in total assets—mainly due to a reduction in short-term assets—resulting in no improvement in the debt-to-total-assets ratio. At the same time, the debt-to-equity ratio increased as

year-end equity fell by over 10%, mainly because of business losses and dividend payments, which reduced undistributed after-tax profits.

- **About operational capacity:** Despite an unfavorable business environment, the Company's operational efficiency indicators showed notable growth. Specifically, inventory turnover increased from 1.93 to 3.05 times, and total asset turnover rose from 1.03 to 1.49 times. The rise in inventory turnover was mainly driven by a cost of goods sold increase of over 40% compared to the same period last year, combined with strong sales performance of semi-finished products and merchandise, which represent a large portion of inventory. At the same time, total asset turnover improved due to a significant increase in net revenue of nearly VND 4,000 billion, equivalent to over 36% growth year-on-year, despite the Company's total assets declining by more than 6%.

- **About profitability:** In 2024, the Company's profitability indicators remained negative due to losses in operating profit and net profit amid a highly competitive market and rising input costs. The initial implementation of new technologies also faced challenges and has yet to yield significant results. Minh Phu continued to proactively seek opportunities to expand into new markets and promote deeply processed and value-added products through investment in a batter-coating plant project. Additionally, the Company focused on improving shrimp quality while reducing farming costs by applying biofloc shrimp farming technology.

4. Evaluation of the BOD on Company's activities in 2024

- **Regarding production and business outcomes:** In 2024, despite facing major challenges, the Company's revenue increased by 36.85% year-on-year, reaching 93.23% of the annual target. However, due to fluctuations in domestic raw material supply, the cost of goods sold remained above 90%, resulting in a net loss of approximately VND 190.62 billion.

- **Regarding investment endeavors:** During the year, the Company continued to invest in infrastructure development at its farming areas and in the construction of a new processing plant in Khanh An Industrial Park – Ca Mau. At the same time, it entered the final phase of completing the new batter-coating plant of Minh Phu Hau Giang, aiming to expand production capacity and enhance the quality of Minh Phu's products in the market.

- **Regarding dividend payment and share issuance:** The Board of Directors approved the dividend payment in accordance with the resolution passed at the 2024 Annual General Meeting of Shareholders. Specifically, December 10th, 2024 was the record date for determining the list of shareholders entitled to receive a cash dividend at a rate of 7.5% (equivalent to VND 750 per share).

- **Regarding environmental and social activities:** environmental and social responsibility is one of the important goals in the Company's development policy. Therefore, the Company always monitors and strictly adheres to the policies related to the environment and social security set forth by the law, and at the same time maintains good volunteering activities to support and assist the disadvantaged local communities.

5. Orientation of the BOD in 2025

Minh Phu, with a vision of developing the shrimp value chain towards a circular economy and a green economy on a digital platform, has been digitizing the shrimp value chain, improving efficiency in the value chain and allowing traceability from the hatchery, to the farm, through the processing plant and distribution system, to the consumer. At the same time, Minh Phu focuses on aiming to get the price of Vietnamese raw shrimp equivalent to the price of Ecuador by 2030 in order to boost competitiveness in the global market. Specific solutions include the following:

1) Complete and promote shrimp post larva production according to MPBiO biotechnology, striving to produce 15 billion shrimp post larva by 2035.

2) Complete and promote commercial shrimp farming according to MPBiO biotechnology, striving to provide 50% of raw shrimp needs for its processing factories by 2035.

3) Continue expanding export markets, improving product quality, and enhancing the value of the Minh Phu brand in the international arena.

As we move into 2025, the global economy continues to face unpredictable fluctuations. However, with a long-term vision, clear strategic direction, and the determination of all employees, I am confident that Minh Phu will steadily achieve its goals, bringing Vietnamese shrimp further onto the global stage and elevating the brand's international presence.

We wish to our valued shareholders for good health, continued success, and happiness.
