- + Subsidiary unit: Nam Long Export Seafood Processing Enterprise at Dam Cung Hamlet, Tran Thoi Commune, Cai Nuoc District, Ca Mau Province

- + Subsidiaries or affiliated companies: None

## 5. Development Orientation:

- Key objectives:

- + Maintain organizational structure and workforce

- + Strengthen input and output customer networks

- Medium and long-term strategy:

- + Due to financial difficulties, the company is seeking financially capable investors for restructuring

- Environmental, social, and community goals:

- + Job creation, stable income, and welfare for workers

- + Compliance with environmental protection and occupational safety regulations

## 6. Risks:

- Lack of working capital has reduced operations to a minimal level to retain workers

- Unstable raw material prices, loss of customer trust, and shrinking market demand

## II. Business Performance During the Year:

### 1. Production and Business Activities:

- Business performance results:

No.	Indicator	Unit	2024 Plan	2023 Actual	2024 Actual	Increase/ Decrease vs. same period	% of 2024 Target Achieved

### \* Performance Evaluation:

Most business performance indicators for 2024 did not meet the plan and significantly declined compared to the previous year. Specifically:

- The company's production and business activities mainly relied on borrowed capital. However, since August 2015, credit institutions have stopped lending, resulting in no capital for purchasing or production. The company has mainly relied on income from leasing cold

storage, customs code rental, and contract processing services with other seafood enterprises to maintain employment for its workers.

- Most of the machinery and equipment have been in use for over 20 years, frequently malfunction, and lack the conditions for major upgrades or replacements.

**III. Management Report and Evaluation:**

**1. Evaluation of Business Operations:**

**a. Advantages:**

- The plant is located in a region with abundant raw materials, ensuring a strong supply network, especially for squid during peak seasons.
- Cadovimex has a market advantage in squid products, which suits businesses facing financial constraints.
- The Cadovimex brand is recognized in many countries and markets.
- The quality management system is stable and meets international standards.
- The Board of Directors, especially the Chairwoman, provides consistent and close direction.

**b. Difficulties:**

- The company has been subject to prolonged capital appropriation by customers—over VND 150 billion has not been recovered for many years.
- Persistent losses and the suspension of credit by banks since August 2015 have left the company with no capital to purchase materials or produce goods.
- Operations are maintained only through modest revenue from leasing cold storage, export services, and outsourced processing for other seafood companies while awaiting new investors for restructuring.

- Many skilled workers and key staff resigned due to concerns over potential company shutdown.

- Both input and output customer bases have declined.

- Factories and equipment are outdated and seriously deteriorated, leading to long processing times and high material losses.

- Accrued expenses: VND 142,427,558
- Other payables: VND 1,047,375,051,814

**3. Improvements in Organizational Structure, Policies, and Management:**

- Continuously streamlined the management structure to reduce indirect and semi-direct labor.
- Implemented a performance-based salary system for specific departments.

**4. 2025 Plan:**

**4.1. Anticipated Advantages:**

- The **CADOVIMEX brand** remains recognized both domestically and internationally, with **three export codes**: DL72 (for U.S. market), DL72, DL85, DL180 (for EU market)
- The company's quality management system meets international standards such as: ISO 9001:2008, HACCP, BRC7, BAP

The remaining management team is dedicated, experienced, and capable in seafood industry operations: from procurement and production to quality assurance and sales.

**4.2. Challenges:**

- No capital available for production and business; mainly reliant on outsourced processing to maintain operations.
- Factories and equipment are obsolete, with outdated technology, high energy consumption, high production costs, and depreciation.
- Reduction in staff and labor due to prolonged financial difficulties.

**4.3. Key Performance Targets for 2025:**

- Operate based on seasonal production and outsourced customer orders.
- Continue seeking financially capable investors for company restructuring.

**4.4. Key Implementation Measures:**

- Continue to streamline the management structure while retaining skilled production workers.
- Maximize outsourced processing volume to offset labor costs.
- Lease cold storage and provide export-related services to generate income for wages and operating expenses.

**5. Management's Explanation Regarding Auditor's Opinion (if any):**

- Due to issues originating from violations prior to 2015 and continuing until now, the audit firm declined to issue an opinion on the financial statements.

- In 2008, the global financial crisis negatively impacted many businesses, including Cadovimex. Moreover, the company was subject to long-term capital appropriation by customers, with outstanding receivables totaling approximately VND 175 billion, leading to financial imbalance.

- The company resorted to short-term borrowing from banks to finance raw material purchases and production. However, high interest rates and continued non-payment from customers led to operational losses.

- By 2014, banks ceased providing working capital loans due to Cadovimex's overdue debt, leaving the company to rely on limited revenue from export service leasing and outsourced processing to maintain operations while awaiting a potential investor for restructuring.

- In the 2016 audited financial report by Moore Aisc Auditing and Informatics Services Co., Ltd., Cadovimex agreed to retrospectively adjust unrecognized expenses (including interest and late payment penalties) to comply with accounting standards. This adjustment increased losses and accumulated deficits, resulting in greater negative equity compared to 2015.

- The company also faces pressing obligations to repay debts accumulated over the years, including social insurance debts, tax arrears, and outstanding payables to regulatory bodies and trading partners. As a result, Cadovimex remains in a state of severe insolvency.

Due to the reasons above, Cadovimex has incurred continuous losses for many years, leading to **negative equity**, as reflected in the financial statements.

#### **IV. Board of Directors' Assessment of Company Operations:**

##### **1. Evaluation of Various Aspects of the Company's Operations:**

- Human Resources and Organizational Structure: The organizational structure is still not optimal. In particular, indirect and semi-direct staffing remains excessive, while the number of direct production workers is insufficient. Further restructuring is necessary.

- Business Activities: This department is directly responsible for procurement and sales, as well as market research and monitoring of raw material prices and availability.

- Production Management: Certain positive results were achieved. The company applied a performance-based production quota system aligned with its current capacity and conditions. However, several issues remain and need urgent attention.

- Product Quality Control: Product quality remains stable. Production procedures and quality control are carried out in accordance with regulatory requirements.

- Machinery and Equipment Condition: Most facilities and equipment are outdated and deteriorated due to long-term use, resulting in high processing loss rates.

- Finance and Accounting: The accounting department has kept timely and accurate records reflecting the company's business performance.

##### **2. Evaluation of Executive Board Performance:**

The Executive Board consists of 4 members: 1 General Director, 1 Managing Director, and 2 Deputy Directors. Over the past year, they have focused on the following key efforts:

- Maintained business operations under extremely difficult conditions

- Restructured and streamlined the organizational apparatus by reducing indirect and semi-direct labor

- Repaired and upgraded some machinery and equipment

- Gradually improved cost management and business operation processes

However, the Executive Board is advised to continue addressing these issues:

- Develop a plan to recruit skilled workers

- Prioritize maintenance and repair of facilities and equipment

### 3. Plans and Strategic Direction from the Board of Directors:

- Engage with financially capable investors to restructure the company

- Maintain and upgrade the machinery and equipment systems

- Strengthen cost control and management efforts

## V. Corporate Governance:

- Implementing resolutions of the General Meeting of Shareholders and BOD
- Organizing interim and annual financial reporting

d) Activities of Non-Executive Independent BOD Members:

According to the report in section V.1.a on the composition and number of Board of Directors (BOD) members, there are three members in total. Among them, one member is an executive director who participates directly in the company's operations, while the remaining two are independent, non-executive directors.

The executive director has been continuously involved in the company's production and business operations.

The independent, non-executive directors generally participate only in quarterly BOD meetings or the annual general meeting of shareholders. They may also provide written input when requested by the Board of Management, or take part in specific matters assigned by the Chairman of the BOD

e) Activities of BOD Subcommittees:

According to the report in section V.1.b on the number and structure of Board subcommittees, there are two subcommittees.

These subcommittees are actively overseen by executive board members and are involved in monitoring, conducting evaluation meetings, drawing lessons learned, and implementing plans—activities that are closely linked to the company's regular production and business operations.

CADOVIMEX SEAFOOD IMPORT-EXPORT AND PROCESSING JOINT STOCK  
COMPANY**

We have audited the Financial Statements of CADOVIMEX Seafood Import-Export and Processing Joint Stock Company prepared on June 2025, as set out from page 07 to page 44, which comprise the Balance Sheet as at 31 December 2024, the Income Statement, the Cash Flow Statement for the financial year then ended and the Notes to the Financial Statements.

**Responsibility of the Board of Management**

The Board of General Directors is responsible for the preparation and fair presentation of the Financial Statements in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System, and prevailing regulations Applied to the preparation and presentation of the Financial Statements and also for the internal control which the Board of General Directors considers necessary for the preparation and fair presentation of the Financial Statements that are free from material misstatement, whether due to fraud or error.

**Responsibility of the Auditor**

Our responsibility is to express an opinion on the Financial Statements based on our audit. We conducted our audit in accordance Vietnamese Standards on Auditing. However, due to the matter described in the "Basis for disclaimer of opinion" paragraph, we were unable to obtain sufficient appropriate audit evidence to provide a basis for our audit opinion.

**Basis for disclaimer of opinion**

- As at 01 January 2024 and 31 December 2024, we did not participate in the physical count of cash of VND 4,103,839 and VND 346,367,715, respectively; inventories of VND 40,293,473,911 and VND 40,245,566,597, respectively; and tangible fixed assets of VND 73,154,165,904 and VND 73,237,365,904, respectively. We were unable to perform alternative procedures, and therefore, we cannot determine if adjustments are needed to the Company's cash balances and related items in the financial statements for the financial year then ended.
- As mentioned in Note 7, section V on Inventories, the Company currently has finished goods stored in a warehouse in the US with a value of VND 33,652,172,082 since 2006. We were unable to obtain evidence to verify the existence, completeness, or basis for determining the value of the inventories as at 31 December 2024. Additionally, the Company has frozen finished goods stored in its cold storage with a value of VND 6,416,202,919 since 2013. We were also unable to perform procedures to verify the completeness of the quantity or the basis for determining the value of these inventories as at 1 January 2024 and 31 December 2024.

**Basis for disclaimer of opinion (continued)**

- As at 1 January 2024 and 31 December 2024, we were unable to obtain evidence to determine the balances of the following accounts: Bank deposits of VND 724,081,864 and VND 541,265,167, respectively; Trade receivables of VND 89,919,634,635 and VND 89,238,604,185, respectively (with provisions of VND 88,914,692,199 and VND 89,167,000,551, respectively); Prepayments to suppliers of VND 14,388,031,156 and VND 14,513,084,256, respectively (with provisions of VND 13,903,675,461 and VND 14,350,231,156, respectively); Other receivables of VND 14,858,028,098 and VND 14,858,028,098, respectively (with provisions of VND 12,566,758,053 and VND 12,893,072,571, respectively); Trade payables of VND 24,077,003,959 and VND 24,708,411,404, respectively; Short-term borrowings of VND 433,655,543,222 and VND 439,727,506,730, respectively; Other short-term payables of VND 978,784,654,204 and VND 1,047,375,051,814, respectively (including accrued interest payables of VND 949,351,177,316 and VND 1,015,846,630,309, respectively); Other long-term payables of VND 1,066,265,350 and VND 1,066,265,350, respectively. We were unable to perform alternative audit procedures. Therefore, we cannot determine the existence, completeness of these receivables and payables, provisions for doubtful receivables, interest expenses and related items in the financial statements ended on the same date.
- In 2012, the Company conducted an appraisal to re-determine the enterprise value, resulting in an increase of VND 111,337,014,296 compared to the book value, comprising increases in tangible and intangible fixed assets of VND 12,745,043,314 and VND 98,591,970,982, respectively, and then used to increase owner's equity by VND 102,000,000,000 and share premium by VND 9,337,014,296. However, using an independent valuation service to revalue assets and recognizing the increase in total assets and owners' equity is not in accordance with current Vietnamese accounting standards and regulations. By 2016, the Company retrospectively adjusted the entire additional asset value and recorded a decrease of VND 111,337,014,296 in share premium, resulting in a negative share premium of VND (25,797,520,000). Additionally, we were unable to obtain relevant documents related to the increase in owner's equity (charter capital) in 2012 of VND 120,000,000,000 (VND 102,000,000,000 from share premium and VND 18,000,000,000 from cash contribution). We were unable to perform alternative procedures, therefore, we do not have sufficient basis to express an opinion on this capital increase and related items in the Company's financial statements.
- As at 1 January 2024, we have not been provided with fixed asset records or the basis for estimating accumulated depreciation at the beginning of the period. We were unable to perform alternative procedures, therefore, we cannot determine whether adjustments are needed to the cost and accumulated depreciation of fixed assets in the financial statements as at 1 January 2024, and 31 December 2024.
- In the financial year ended 31 December 2024, the Company continues suffering a loss of VND (79,507,780,072) and the accumulated loss as at 31 December 2024, is VND (1,701,312,585,166), resulting in negative owner's equity of VND (1,506,295,847,758). Additionally, as at 31 December 2024, current liabilities exceeded current assets by VND 1,510,886,742,231. These material factors significantly impact the Company's ability to continue as a going concern.

**Disclaimer of opinion**

Due to the significance of the matters described in the "Basis for disclaimer of opinion" section, we were unable to obtain sufficient appropriate audit evidence to provide a basis for our audit opinion. Accordingly, we do not express an opinion on the accompanying Financial Statements.

**Other matter**

The Independent Auditor's Report is prepared in Vietnamese and English. In the event of any discrepancies or inconsistencies between the Vietnamese and English versions, the Vietnamese version shall prevail.

**I. BUSINESS HIGHLIGHTS**

**1. Establishment**

Cadovimex Seafood Import-Export and Processing Joint Stock Company was converted from a state-owned enterprise to a joint stock company under Decision No. 874/QĐ-CTUB dated 30 November 2004 of the Ca Mau Provincial People's Committee. The company's Business Registration Certificate No. 2000102580 was initially issued by the Ca Mau Department of Planning and Investment on 1 February 2005 and amended for the 17th time on 13 April 2021.

**Form of ownership:**

Joint Stock Company

**Transaction name in English:** CADOVIMEX SEAFOOD IMPORT - EXPORT AND PROCESSING JOINT STOCK COMPANY

**In short:** CADOVIMEX - VIETNAM

**Head office:** Dam Cung Hamlet, Tran Thoi Commune, Cai Nuoc District, Ca Mau Province, Vietnam

**2. Business sector**

Processing and preserving aquatic products and products made from aquatic products.

**3. Principal business lines**

Processing and direct import and export of agricultural, forestry and aquatic products. Importing raw materials, consumer goods, machinery and equipment for production and daily life. Providing trade services: Agriculture, forestry and aquatic products and domestic and foreign import and export. Investing in aquaculture and aquatic exploitation. Trading in gasoline and lubricants.

**4. Normal operating cycle**

Normal operating cycle of the Company lasts 12 months of the normal fiscal year beginning from 01 January and ending on 31 December annually.

**5. Characteristics of the enterprise's operations during the fiscal year that affect the Consolidated Financial Statements**

In the fiscal year 2024, the company's operations still face many difficulties. The outstanding bank debt cannot be repaid, high interest expense, and ineffective business operations have made it impossible for the company to continue accessing loan sources. Additionally, the company has a large amount of doubtful receivables and a large amount of inventories stored in warehouses with no prospects of recovery, which also causes the Company to lack operating capital.

**6. Total number of employees as at 31/12/2024: 58 persons. (31/12/2023: 95 persons).**

**7. Enterprise's structure**

The company has the following subsidiaries	Address	Principal business activities

## NOTES TO THE FINANCIAL STATEMENTS

*For the financial year ended 31 December 2024*

*Unit: VND*

### 8. Disclosure on the comparability of information in the Financial Statements:

The selection of figures and information needs to be presented in the Financial Statements based on the principles of comparability among corresponding accounting periods.

## II. ACCOUNTING PERIOD AND REPORTING CURRENCY

### 1. Financial year

The Company's accounting period begins on 01 January and ends on 31 December annually.

### 2. Currency unit used in accounting

Vietnamese Dong (VND) is used as a currency unit for accounting records.

## III. APPLICABLE ACCOUNTING STANDARDS AND REGIME

### 1. Applicable accounting regime

The Company applies the Vietnamese Corporate Accounting Regime as guided in Circular No. 200/2014/TT-BTC dated 22 December 2014 and Circular No. 53/2016/TT-BTC dated 21 March 2016 by the Ministry of Finance on amending and supplementing a number of articles of Circular No. 200/2014/TT-BTC.

### 2. Disclosure of compliance with Vietnamese Accounting Standards and Regime

We conducted our accounting, preparation, and presentation of the Financial Statements in accordance with Vietnamese Accounting Standards and System and other relevant statutory regulations. The Financial Statements give a true and fair view of the financial position of the Company and the results of its operations as well as its cash flows.

The selection of figures and information presented in the notes to the Financial Statements complies with the material principles in Vietnamese Accounting Standard No. 21 - "Presentation of the financial statements".

## IV. APPLICABLE ACCOUNTING POLICIES

### 1. Principles for recording cash and cash equivalents

The Company translated foreign currencies into Vietnamese Dong at the actual rate and book rate.

#### Principles for determining the actual exchange rate

All transactions denominated in foreign currencies that arise during the year (trading foreign currencies, capital contribution or receipt of contributed capital, recording receivables and payables, purchasing assets or expenses immediately paid by foreign currencies) are recorded at the actual exchange rates ruling as of the transaction dates.

Closing balance of monetary items (cash, cash equivalents, payables and receivables, except for prepayments to suppliers, advances from customers, prepaid expenses, deposits and unearned income) denominated in foreign currencies should be revalued at the actual rate ruling as of the balance sheet date:

## NOTES TO THE FINANCIAL STATEMENTS

*For the financial year ended 31 December 2024*

*Unit: VND*

### 1. Principles for recording cash and cash equivalents (continued)

- The actual exchange rates upon revaluation of monetary items denominated in foreign currencies, which have been classified as assets, will be the buying rate used by the Joint Stock Commercial Bank for Foreign Trade of Vietnam. The converted buying rate as at 31 December 2024 is 25,251 VND/USD.

- The actual exchange rates upon revaluation of monetary items denominated in foreign currencies, which have been classified as liabilities, will be the selling rate of the Joint Stock Commercial Bank for Foreign Trade of Vietnam. The converted selling rate as at 31 December 2024 is 25,551 VND/USD.

Foreign exchange differences arising during the year from transactions in foreign currencies are recorded in the operating result. Foreign exchange differences due to the revaluation of the monetary items in foreign currencies at the end of the financial year after offsetting their positive differences against negative differences shall be recorded in the operating result.

#### Principles for determining book rate

When recovering receivables, deposits, collaterals or payments for payables in foreign currencies, the Company uses a specific identification book rate.

When making payments in foreign currencies, the Company uses a moving weighted average rate.

### 2. Principles for recording cash and cash equivalents

Cash includes cash on hand, demand deposits, cash in transit.

**Cash equivalents** comprise term deposits, short-term investments with an original maturity of three months or less since investment date, high liquidity and are able to convert to a known amount of cash and subject to an insignificant risk of changes in value.

### 3. Principles for accounting financial investments

#### Principles for accounting held-to-maturity investments

Held-to-maturity investments include term deposits for the purpose of earning periodic interest.

Held-to-maturity investments are initially recognized at cost, including the purchase price and costs associated with the acquisition of the investments. After initial recognition, if provisions for doubtful debts have not been made as required by law, these investments are evaluated at their recoverable values. When there is firm evidence that part or all of the investment may not be recovered, the loss is recognized as financial expenses during the year and a decrease in the investment value.

### 4. Principle for recording trade receivables and other receivables

**Principle for recording receivables:** At cost less provision for doubtful receivables.

The classification of the receivables as trade receivables, internal receivables and other receivables depends on the nature of the transaction or relationship between the company and the debtor.

**Method of making provision for doubtful receivables:** Provision for doubtful debts is estimated for the loss value of the receivables, other held-to-maturity investments similar to doubtful debts that are overdue and undue, but are likely to become possibly irrecoverable due to insolvency of debtors who go bankruptcy, making procedures for dissolution, go missing or run away, etc.

### 5. Principle of recording inventories

**Principle of recording inventories:** Inventories are stated at cost less (-) the provision for the devaluation and provision for obsolete and deteriorated inventories.

**Cost of inventories is determined as follows:**

- Materials and merchandise: consists of purchase cost and other directly attributable costs in bringing the inventories to their present location and condition.

**Method of calculating inventories' value: Monthly weighted average method**

**Method of accounting for the inventories: Perpetual method**

**Method of making provision for the devaluation of inventories:** Provision for the devaluation of inventories is made when the net realizable value of inventories is lower than their original cost. Net realizable value is the estimated selling price less the estimated costs of completion and selling expenses. Provision for the devaluation of inventories is the difference between the cost of inventories greater than their net realizable value. Provision for the devaluation of inventories is made for each inventory with the cost greater than the net realizable value.

### 6. Principles for recording and depreciating fixed assets

**Principles of recording tangible fixed assets**

Tangible fixed assets are stated at the original cost less accumulated depreciation. The original cost of a tangible fixed asset comprises all expenditures of bringing the asset to its working condition and location for its intended use. The expenses incurred after initial recognition are capitalized when they have resulted in an increase in the future economic benefits from the use of those tangible fixed assets. The expenses which do not meet the above conditions are expensed in the period.

When the assets are sold or disposed of, their original costs and the accumulated depreciation which have been written off, and any gain or loss from the disposal of assets are recorded as income or expense during the period.

Determination of original cost in each case:

*Tangible fixed assets purchased*

The original cost of purchased tangible fixed assets consist of the actual purchase price (less trade discounts or reduction), taxes (excluding taxes to be refunded) and relevant expenses calculated to the time when such fixed assets are put into operation such as fees for installation and trial operations, specialists and other direct costs.

The original cost of fixed assets formed from capital construction under the mode of tendering shall be the finalization price of the construction project, other relevant fees plus registration fee (if any).

Fixed assets are buildings, and structures attached to land use rights, the value of land use rights is computed separately and recorded as intangible fixed assets.

**Principles for recording intangible fixed assets**

**Intangible fixed assets** are stated at cost less accumulated amortization. The original cost of an intangible fixed asset comprises all expenditures of bringing the asset to its working condition and location for its intended use.

*Computer software*

5 years

Computer software refers to the total costs incurred by the Company to obtain the software for use.

### 6. Principles for recording and depreciating fixed assets (continued)

#### Method of depreciating fixed assets

Fixed assets are depreciated on a straight-line basis over their estimated useful lives. Useful life means the duration in which the tangible fixed assets produce their effect on production and business.

*Estimated useful lives of the fixed assets are as follows:*

<i>Factories and structures</i>	<i>10 - 50 years</i>
<i>Machinery and equipment</i>	<i>05 - 20 years</i>
<i>Means of transportation</i>	<i>08 - 15 years</i>
<i>Other fixed assets</i>	<i>06 - 12 years</i>

### 7. Principles for recording construction in progress

Construction in progress is stated at the cost. These are all necessary costs for purchasing fixed assets, building, or repairing, improving, extending or equipping the works such as expenses of construction, equipment, compensation, support and re-residence, project management, consultancy on construction investment and other expenses.

This cost is carried forward to increase asset value when the project is completed, the overall acceptance is finished and the assets are handed over and put into a ready-to-use state.

### 8. Principles for recording prepaid expenses

The Company's prepaid expenses include actual expenses incurred but related to the operating results of multiple accounting periods. The Company's prepaid expenses include the following expenses: Insurance costs (fire and explosion insurance, car insurance, property insurance, etc.); tools and instruments; fixed asset repair costs; prepaid land rent; business advantages; goodwill; etc.

Method of allocating prepaid expenses: The calculation and allocation of prepaid expenses to operating costs for each period based on the straight-line method. Based on the nature and level of each type of expense, the allocation period is as follows: Short-term prepaid expenses are allocated within 12 months; Long-term prepaid expenses are allocated from over 12 months to 36 months.

Method of amortizing goodwill or business goodwill: Goodwill or business goodwill is either expensed immediately in operating costs or amortized evenly over the years throughout its estimated useful life. The estimated useful life of goodwill or business goodwill shall not exceed 10 years from the date of recognition.

### 9. Principles for recording liabilities

Liabilities are recorded at the original cost and not lower than the payment obligation.

The Company classifies liabilities into trade payables, internal payables and other payables depending on the nature of transactions and the relationship between the Company and debtors.

Liabilities must be recorded in detail according to the payment schedule, creditor, original currency (including the revaluation of liabilities that meet the definition of monetary items denominated in foreign currencies) and other factors as per the Company's management needs.

At the reporting date, if it is evident that there is an unavoidable loss, an amount payable will be immediately recorded under prudent principles.

### 10. Principles for recording borrowings

Borrowings are total amounts the Company borrowed from banks, organizations, financial companies and other parties (excluding borrowings in the form of bond issuances or preferred stock issuances which require the issuer to repurchase at a certain time in the future).

Borrowings are tracked in detail by each lender, creditor, loan agreement, and borrowed asset.

### 11. Principles for recording accrued expenses

Accrued expenses include costs associated with production and business suspension, interest expenses, costs to provisionally calculate cost of goods sold, finished real estate sold, and accrued annual leave pay, which have been incurred during the reporting period but not yet settled. These expenses are recorded based on reasonable estimates of the amounts payable pursuant to specific contracts and agreements.

### 12. Principles for recording owners' equity

#### Principle for recording owners' contributed capital

Owner's capital is formed from the initial capital contribution and additional contributions from shareholders. Owner's capital is recognized based on the actual contributed capital in cash or in assets, valued at the par value of the shares issued at the time of establishment or additional mobilization to expand the Company's operations.

**Share Premium:** Reflects the positive difference between the issue price of shares and their par value when shares are first issued or when additional shares are issued, and the increase or decrease in the actual amount received compared to the repurchase price when treasury shares are reissued. In case of repurchasing for immediate cancellation on the purchase date, the value of the shares is recorded as a reduction in business capital at the actual repurchase price and this reduction must be detailed by par value and the share premium of the repurchased shares.

#### Principle for recording undistributed profit

Undistributed profit after tax is recorded at the profit (loss) from the Company's result of operation after deducting the current corporate income tax expense and the adjusted items due to the retroactive application of changes in accounting policy and adjustments for material misstatement of the previous years.

The distribution of profits is based on the Company's charter and approved by the Annual General Meeting of Shareholders.

### 13. Principles and methods for recording revenues and other income

#### Principles and methods for recording revenue from goods sold

Revenue from goods sold should be recognized when all five (5) following conditions have been satisfied:

1. The enterprise has transferred to the buyer the significant risks and rewards of ownership of the goods;
2. The enterprise retains neither continuing managerial involvement as an owner nor effective control over the goods sold;
3. The amount of revenue can be measured reliably; When the contract specifies that buyers are entitled to return products, goods they have bought under specific conditions, the enterprise will record the revenue only when those conditions no longer exist and the buyers do not have right to return products, goods (except for changing to other goods, services);
4. The economic benefits associated with the transaction has flown or will flow to the enterprise;
5. The costs incurred or to be incurred in respect of the transaction can be measured reliably.

### 13. Principles and methods for recording revenues and other income (continued)

#### **Principles and methods for recording revenue from services rendered**

Revenue from a service rendered is recognized when the transaction results can be measured reliably. In a case where the services are rendered in several periods, the revenue will be recorded by the part of completed works at the end of the financial year. Revenue from services rendered is recognized when all four (4) of the following conditions are satisfied simultaneously: 1. The revenue is determined firmly. When the contract specifies that buyers are entitled to return the service they have bought under specific conditions, the enterprise will record the revenue only when those conditions no longer exist and the buyers do not have the right to return the service; 2. The economic benefits associated with the transaction have flown or will flow from the supply of the service; 3. Part of completed works can be determined at the balance sheet date; 4. The costs incurred or to be incurred in respect of the transaction can be measured reliably.

If the contract result cannot be determined reliably, revenue will only be recognized at the recoverable amount of the recognized costs.

#### **Principles and methods for recording financial income**

Revenue from interest, royalties, dividends and profit received is recognized when both of the two following conditions are satisfied: 1. It is possible to obtain benefits from the transaction; 2. Revenue is determined with relative certainty.

- Dividends and profits received are recorded when shareholders are entitled to receive dividends or capital contributors are entitled to receive profits from capital contribution.

When an amount that has been recorded as an income becomes irrecoverable, such irrecoverable or uncertainly recoverable amount must be recorded as an expense incurred in the period, but not recorded as an income decrease.

### 14. Principles and methods of recording cost of goods sold

The cost of goods sold reflects the costs of goods, products and services, investment properties; the production cost of construction products (for construction companies) sold in the period; Costs related to real estate business activities, and other costs recorded in the cost of goods sold or recorded as a decrease in the cost of goods sold in the reporting period. The cost of goods sold is recorded at the date the transaction incurs or is likely to incur in the future regardless of whether payment has been made or not. The cost of goods sold and revenue shall be recorded simultaneously on the matching principle. Expenses exceeding normal consumption levels are recorded immediately to the cost of goods sold on a prudent principle.

### 15. Principles and methods for recording financial expenses

**Financial expenses include:** Expenses or losses from financial investment activities, loan interest expenses, borrowing costs, capital contribution expense in joint venture and associate, short-term securities trading losses, and securities trading transaction costs. Provisions for devaluation of financial investments, loss from sales of foreign currencies, foreign exchange losses, and other financial expenses.

Financial expenses are recorded in detail by their content of actual expenses incurred in the period and determined reliably when there is reliable evidence of these expenses.

### 16. Principles and methods for recording Corporate income tax expense

Current Corporate tax expense is the tax payable on the taxable income and tax rate enacted in the current year.

The tax payables to the State budget will be finalized with the tax office. The difference between the tax payables specified in the book and the tax amounts under finalization will be adjusted upon tax finalization of the tax office.

### 17. Principles for recording earnings per share

Earnings Per Share (EPS) is calculated by dividing the profit or loss attributable to common shareholders, after deducting the Bonus and Welfare Fund established during the period, by the weighted-average number of common shares outstanding during that period.

### 18. Financial instruments

#### Initial recognition:

##### *Financial assets*

According to Circular No. 210/2009/TT-BTC dated 06 November 2009 (Circular No. 210) by the Ministry of Finance, financial assets are classified properly, for the purpose of presentation in the financial statements, into the financial assets which are stated at fair value through the Income Statement, loans and receivables, held-to-maturity investments and available-for-sale financial assets. The Company decides to classify these assets at the date of initial recognition.

At the date of initial recognition, financial assets are recognized at cost plus directly related transaction costs.

Financial assets of the Company comprise cash, short-term deposits, trade receivables and other receivables, loans, listed and unlisted financial instruments and derivative financial instruments.

##### *Financial liabilities*

Financial liabilities under Circular 210, for financial statement disclosure purposes, are appropriately classified into financial liabilities recognized through the Income Statement and financial liabilities measured at amortized cost. The Company determines the classification of financial liabilities at the time of initial recognition.

All financial liabilities are initially recognized at cost plus directly related transaction costs.

Financial liabilities of the Company comprise trade payables, other payables, borrowings and liabilities and derivative financial instruments.

#### Value after initial recognition

Currently, there are no requirements for the re-measurement of the financial instruments after initial recognition.

#### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the financial statements if, and only if, there is a currently enforceable legal right to offset the financial assets against financial liabilities or vice-versal and there is an intention to settle on a net basis or to realize the assets and settle the liability simultaneously.

## VII. FINANCIAL RISK MANAGEMENT POLICIES AND OBJECTIVES

The risks from the financial instruments include market risk, credit risk, and liquidity risk.

The Board of Management considers the application of management policies for the above risks as follows:

### 1. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market prices. There are three market risks: interest rate risk, foreign exchange risk and other price risks such as the risk of the stock price. Financial instruments affected by the market risks include borrowings and liabilities, deposits, available-for-sale investments.

#### Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risks due to change in the interest rate of the Company mainly relate to the borrowings and liabilities, cash and short-term deposits.

### 2. Credit risk

Credit risk is the risk that one party to a financial instrument or customer contract will cause a financial loss for the other party by failing to discharge an obligation. The Company bears credit risks from operating activities (mainly trade receivables) and from its financial activities including bank deposits, foreign exchange operations and other financial instruments.

#### Trade receivables

The Company minimizes the credit risk by only doing business with entities that have good financial capacity and closely keeping track of the liabilities to speed up the recovery of debts. On the basis of this method and receivables related to different customers, the credit risk does not concentrate on a certain customer.

#### Bank deposits

The Company mainly maintains deposits in big and prestigious banks in Vietnam. The Company realized that the concentration level of credit exposure to deposits is low.

The Board of Management of the Company evaluates that the majority of financial assets are current and not impaired, as these financial assets are associated with reputable customers who have a good creditworthiness.

## NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2024

Unit: VND

### 3. Liquidity risk

Liquidity risk is the risk that arises from the difficulty in fulfilling financial obligations due to lack of capital. The liquidity risk of the Company mainly arises from difference in maturity of the financial assets and liabilities.

The Company supervises liquidity risk by maintaining an amount of cash, cash equivalents and borrowings from banks at the level that the Board of Management considers as sufficient to satisfy the Company's activities and minimize influences of changes in cash flows.

The payment term of financial liabilities based on expected contractual payments (on principal cash flow basis) is as follows:

	Less than 1 year	From 1 to 5 years	Over 5 years	Total
<b>As at 31/12/2024</b>				
Borrowings and liabilities	439,727,506,730	-	-	439,727,506,730

### 4. Financial assets and liabilities:

The fair value of financial assets and financial liabilities is stated at the value that the financial instruments are convertible in present transaction among partners, except for compulsory sale or disposal.

The Company uses the following methods and assumptions to estimate the fair value:

The fair value of cash on hand and short-term deposits, trade receivables, trade payables and other short-term liabilities is equivalent to the book value of these items because these instruments are in short term.

The fair value of securities and financial investments whose fair value cannot be reliably determined due to the absence of an active market with high liquidity for such securities and financial investments, are presented at their book value.

Except for the items mentioned above, the fair value of long-term financial assets and long-term financial liabilities has not been formally assessed and determined as at 31 December 2024 and 31 December 2023. However, the Company's Board of Management assesses that the fair value of these financial assets and financial liabilities is not materially different from their book value at the end of the financial year.

- + Subsidiaries or affiliated companies: None

## **5. Development Orientation:**

- Key objectives:

- + Maintain organizational structure and workforce

- + Strengthen input and output customer networks

- Medium and long-term strategy:

- + Due to financial difficulties, the company is seeking financially capable investors for restructuring

- Environmental, social, and community goals:

- + Job creation, stable income, and welfare for workers

- + Compliance with environmental protection and occupational safety regulations

## **6. Risks:**

- Lack of working capital has reduced operations to a minimal level to retain workers

- Unstable raw material prices, loss of customer trust, and shrinking market demand

## **II. Business Performance During the Year:**

### **1. Production and Business Activities:**

- Business performance results:

No.	Indicator	Unit	2024 Plan	2023 Actual	2024 Actual	Increase/ Decrease vs. same period	% of 2024 Target Achieved

### **\* Performance Evaluation:**

Most business performance indicators for 2024 did not meet the plan and significantly declined compared to the previous year. Specifically:

- The company's production and business activities mainly relied on borrowed capital. However, since August 2015, credit institutions have stopped lending, resulting in no capital for purchasing or production. The company has mainly relied on income from leasing cold

storage, customs code rental, and contract processing services with other seafood enterprises to maintain employment for its workers.

- Most of the machinery and equipment have been in use for over 20 years, frequently malfunction, and lack the conditions for major upgrades or replacements.

**III. Management Report and Evaluation:**

**1. Evaluation of Business Operations:**

**a. Advantages:**

- The plant is located in a region with abundant raw materials, ensuring a strong supply network, especially for squid during peak seasons.
- Cadovimex has a market advantage in squid products, which suits businesses facing financial constraints.
- The Cadovimex brand is recognized in many countries and markets.
- The quality management system is stable and meets international standards.
- The Board of Directors, especially the Chairwoman, provides consistent and close direction.

**b. Difficulties:**

- The company has been subject to prolonged capital appropriation by customers—over VND 150 billion has not been recovered for many years.
- Persistent losses and the suspension of credit by banks since August 2015 have left the company with no capital to purchase materials or produce goods.
- Operations are maintained only through modest revenue from leasing cold storage, export services, and outsourced processing for other seafood companies while awaiting new investors for restructuring.

- Many skilled workers and key staff resigned due to concerns over potential company shutdown.

- Both input and output customer bases have declined.

- Factories and equipment are outdated and seriously deteriorated, leading to long processing times and high material losses.

**3. Improvements in Organizational Structure, Policies, and Management:**

- Continuously streamlined the management structure to reduce indirect and semi-direct labor.
- Implemented a performance-based salary system for specific departments.

**4. 2025 Plan:**

**4.1. Anticipated Advantages:**

- The **CADOVIMEX brand** remains recognized both domestically and internationally, with **three export codes**: DL72 (for U.S. market), DL72, DL85, DL180 (for EU market)
- The company's quality management system meets international standards such as: ISO 9001:2008, HACCP, BRC7, BAP

The remaining management team is dedicated, experienced, and capable in seafood industry operations: from procurement and production to quality assurance and sales.

**4.2. Challenges:**

- No capital available for production and business; mainly reliant on outsourced processing to maintain operations.
- Factories and equipment are obsolete, with outdated technology, high energy consumption, high production costs, and depreciation.
- Reduction in staff and labor due to prolonged financial difficulties.

**4.3. Key Performance Targets for 2025:**

- Operate based on seasonal production and outsourced customer orders.
- Continue seeking financially capable investors for company restructuring.

**4.4. Key Implementation Measures:**

- Continue to streamline the management structure while retaining skilled production workers.
- Maximize outsourced processing volume to offset labor costs.
- Lease cold storage and provide export-related services to generate income for wages and operating expenses.

**5. Management's Explanation Regarding Auditor's Opinion (if any):**

- Due to issues originating from violations prior to 2015 and continuing until now, the audit firm declined to issue an opinion on the financial statements.

- In 2008, the global financial crisis negatively impacted many businesses, including Cadovimex. Moreover, the company was subject to long-term capital appropriation by customers, with outstanding receivables totaling approximately VND 175 billion, leading to financial imbalance.

- The company resorted to short-term borrowing from banks to finance raw material purchases and production. However, high interest rates and continued non-payment from customers led to operational losses.

- By 2014, banks ceased providing working capital loans due to Cadovimex's overdue debt, leaving the company to rely on limited revenue from export service leasing and outsourced processing to maintain operations while awaiting a potential investor for restructuring.

- In the 2016 audited financial report by Moore Aisc Auditing and Informatics Services Co., Ltd., Cadovimex agreed to retrospectively adjust unrecognized expenses (including interest and late payment penalties) to comply with accounting standards. This adjustment increased losses and accumulated deficits, resulting in greater negative equity compared to 2015.

- The company also faces pressing obligations to repay debts accumulated over the years, including social insurance debts, tax arrears, and outstanding payables to regulatory bodies and trading partners. As a result, Cadovimex remains in a state of severe insolvency.

Due to the reasons above, Cadovimex has incurred continuous losses for many years, leading to **negative equity**, as reflected in the financial statements.

#### **IV. Board of Directors' Assessment of Company Operations:**

##### **1. Evaluation of Various Aspects of the Company's Operations:**

- Human Resources and Organizational Structure: The organizational structure is still not optimal. In particular, indirect and semi-direct staffing remains excessive, while the number of direct production workers is insufficient. Further restructuring is necessary.

- Business Activities: This department is directly responsible for procurement and sales, as well as market research and monitoring of raw material prices and availability.

- Production Management: Certain positive results were achieved. The company applied a performance-based production quota system aligned with its current capacity and conditions. However, several issues remain and need urgent attention.

- Product Quality Control: Product quality remains stable. Production procedures and quality control are carried out in accordance with regulatory requirements.

- Machinery and Equipment Condition: Most facilities and equipment are outdated and deteriorated due to long-term use, resulting in high processing loss rates.

- Finance and Accounting: The accounting department has kept timely and accurate records reflecting the company's business performance.

##### **2. Evaluation of Executive Board Performance:**

The Executive Board consists of 4 members: 1 General Director, 1 Managing Director, and 2 Deputy Directors. Over the past year, they have focused on the following key efforts:

- Maintained business operations under extremely difficult conditions

- Restructured and streamlined the organizational apparatus by reducing indirect and semi-direct labor

- Repaired and upgraded some machinery and equipment

- Gradually improved cost management and business operation processes

However, the Executive Board is advised to continue addressing these issues:

- Develop a plan to recruit skilled workers

- Prioritize maintenance and repair of facilities and equipment

### 3. Plans and Strategic Direction from the Board of Directors:

- Engage with financially capable investors to restructure the company

- Maintain and upgrade the machinery and equipment systems

- Strengthen cost control and management efforts

- Organizing interim and annual financial reporting

d) Activities of Non-Executive Independent BOD Members:

According to the report in section V.1.a on the composition and number of Board of Directors (BOD) members, there are three members in total. Among them, one member is an executive director who participates directly in the company's operations, while the remaining two are independent, non-executive directors.

The executive director has been continuously involved in the company's production and business operations.

The independent, non-executive directors generally participate only in quarterly BOD meetings or the annual general meeting of shareholders. They may also provide written input when requested by the Board of Management, or take part in specific matters assigned by the Chairman of the BOD

e) Activities of BOD Subcommittees:

According to the report in section V.1.b on the number and structure of Board subcommittees, there are two subcommittees.

These subcommittees are actively overseen by executive board members and are involved in monitoring, conducting evaluation meetings, drawing lessons learned, and implementing plans—activities that are closely linked to the company's regular production and business operations.
