NOTES TO THE SEPARATE FINANCIAL STATEMENTS*Accounting period from January 01, 2025 to June 30, 2025**Unit: Vietnamese Dong***5. CHARACTERISTICS OF THE COMPANY'S ACTIVITIES IN THE ACCOUNTING PERIOD THAT IMPACT THE FINANCIAL STATEMENTS**

None

6. TOTAL NUMBER OF EMPLOYEES AS OF June 30, 2025: 54**7. STRUCTURE OF THE COMPANY**

The company has one independently-accounted subsidiary as mentioned in section 6 of the Notes to the Financial Statements.

The company has one associated company as mentioned in section 6 of the Notes to the Financial Statements.

II. ACCOUNTING PERIOD AND CURRENCY UNIT USED IN ACCOUNTING**1. ACCOUNTING PERIOD**

The company's accounting period starts from January 1 and ends on December 31

This financial report is prepared for the period from 01/01/2025 to 30/06/2025.

2. CURRENCY UNIT USED IN ACCOUNTING

The currency used in accounting is the Vietnam Dong (VND).

III. ACCOUNTING STANDARDS AND REGULATIONS APPLIED**1. ACCOUNTING REGULATIONS APPLIED**

The company applies the Enterprise Accounting Regime issued under Circular 200/TT-BTC dated December 22, 2014 ("Circular 200") by the Ministry of Finance, and Circular 53/2016/TT-BTC dated March 21, 2016 ("Circular 53") by the Ministry of Finance, which amends and supplements certain provisions of Circular 200.

2. STATEMENT ON COMPLIANCE WITH ACCOUNTING STANDARDS AND REGULATIONS

The company complies with the current Vietnamese Accounting Standards and the applicable legal regulations in preparing and presenting the financial statements for the period from 01/01/2025 to 30/06/2025.

IV. SIGNIFICANT ACCOUNTING POLICIES**1. BASIS FOR PREPARATION OF FINANCIAL STATEMENTS AND CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES**

The financial statements are prepared on the accrual basis of accounting (except for cash flow information). The accounting policies applied by the Company from 01/01/2025 to 30/06/2025 are consistent with those applied in the preparation of the financial statements for the period from 01/01/2025 to 30/06/2025.

2. ACCOUNTING ESTIMATES

The preparation of financial statements in compliance with Vietnamese Accounting Standards requires management to make estimates and assumptions that affect the reported amounts of liabilities, assets, and the disclosure of contingent liabilities and assets as of the reporting date, as well as the reported amounts of revenue and expenses during the accounting period. Actual results may differ from the estimates and assumptions.

3. CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash on hand, demand deposits, cash in transit, and term deposits with original maturities of no more than three months. These are highly liquid, readily convertible to specific amounts of cash, and subject to an insignificant risk of changes in value.

4. FINANCIAL INVESTMENTS**Held-to-Maturity Investments**

An investment is classified as held-to-maturity when the company intends and has the ability to hold it until maturity. Held-to-maturity investments include term deposits (including treasury bills and promissory notes), bonds, and preferred shares that the issuer is obligated to repurchase at a specific future date, as well as loans held to maturity for periodic interest income and other held-to-maturity investments.

Held-to-maturity investments are initially recognized at cost, including the purchase price and any transaction-related costs. After initial recognition, these investments are recorded at recoverable value. Interest income from held-to-maturity investments after the purchase date is recognized in the income statement on an accrual basis. Any accrued interest earned prior to acquisition is deducted from the original cost at the purchase date.

If there is conclusive evidence that part or all of the investment may not be recoverable, and the amount of loss can be reliably determined, the loss is recognized in financial expenses for the year and directly reduces the investment's value.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*Accounting period from January 01, 2025 to June 30, 2025**Unit: Vietnamese Dong***Investments in Subsidiaries**

Investments in subsidiaries are initially recorded at cost, which includes the purchase price or contributed capital plus directly related investment costs. In cases of investment using non-monetary assets, the cost of the investment is recognized at the fair value of the non-monetary assets at the time of the transaction.

Profits of subsequent periods from investments in subsidiaries are allocated based on the parent company's decisions.

Provisions for losses on investments in subsidiaries are made when the subsidiary incurs losses. The provision amount is the difference between the actual contributed capital by all parties to the subsidiary. If the subsidiary is subject to consolidated financial statements, the basis for determining provisions is the consolidated financial statements. Adjustments to the provision for investment losses in subsidiaries at the end of the accounting period are recognized in financial expenses.

Investments in Associates

Investments in associates are initially recorded at cost, including the purchase price or contributed capital plus direct investment costs. In cases of investment using non-monetary assets, the investment cost is recognized at the fair value of the non-monetary assets at the time of the transaction.

Dividends and profits from prior periods before acquiring the investment are deducted from the investment's carrying amount. Dividends and profits from subsequent periods are recognized as revenue. Dividends received in the form of shares are tracked only by the increased number of shares, with no value assigned or recognized at par value.

Provisions for losses on investments in associates are made when the associate incurs losses. The provision amount is calculated as the difference between the company's actual contributed capital to the associate and the associate's actual equity, multiplied by the company's ownership percentage relative to the total contributed capital of all parties to the associate. If the associate is subject to consolidated financial statements, the basis for determining provisions is the consolidated financial statements. Adjustments to the provision for investment losses in associates at the end of the accounting period are recognized in financial expenses.

Investments in Other Entities

Investments in equity instruments of other entities refer to equity investments where the company has no control, joint control, or significant influence over the investee.

These investments are initially recognized at cost, including the purchase price or contributed capital plus direct investment costs. Dividends and profits from prior periods before acquiring the investment are deducted from the investment's carrying amount. Dividends and profits from subsequent periods are recognized as revenue. Dividends received in the form of shares are tracked only by the increased number of shares, with no value assigned.

5. RECEIVABLES

Receivables are presented at their carrying amount, net of provisions for doubtful debts.

Receivables are classified into trade receivables and other receivables as follows:

- Trade Receivables: Represent receivables arising from commercial transactions between the company and independent customers.
- Other Receivables: Represent non-commercial receivables unrelated to purchase-and-sale transactions.

Provisions for doubtful debts are made for individual doubtful accounts based on overdue aging or expected losses:

For overdue receivables:

- 30% of the value for receivables overdue from 6 months to under 1 year.
- 50% of the value for receivables overdue from 1 year to under 2 years.
- 70% of the value for receivables overdue from 2 years to under 3 years.
- 100% of the value for receivables overdue for 3 years or more.

For receivables not yet overdue but unlikely to be collected, provisions are made based on estimated losses.

Increases or decreases in provisions for doubtful debts at the end of the accounting period are recognized as administrative expenses during the period.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*Accounting period from January 01, 2025 to June 30, 2025**Unit: Vietnamese Dong***6. INVENTORIES**

Inventory is measured at the lower of cost or net realizable value. The cost of inventory includes purchase costs, processing costs, and other direct costs incurred to bring the inventory to its current location and condition. Net realizable value is the estimated selling price of inventory in the normal course of business, less estimated costs of completion and selling costs.

The cost of goods sold is calculated using the weighted average method. Inventory is accounted for under the perpetual inventory system.

Provisions for inventory write-downs (if any) are made when reliable evidence indicates a decline in net realizable value below the inventory's cost. Net realizable value is determined as the estimated selling price, less costs to complete, marketing, selling, and distribution costs incurred. Adjustments to inventory write-down provisions at the end of the accounting period are recorded in the cost of goods sold for the period.

7. FIXED ASSETS AND DEPRECIATION

Fixed assets are recorded at historical cost less accumulated depreciation.

The historical cost of fixed assets includes the purchase price and all directly attributable costs to bring the asset to its intended use. Costs incurred after initial recognition are added to the asset's carrying amount only if it is certain that these costs will increase the economic benefits derived from the asset. Costs that do not meet these criteria are recognized as expenses in the period they are incurred.

For fixed assets in use but not yet officially settled, the provisional historical cost and depreciation are recorded, with adjustments made upon the final settlement.

When fixed assets are sold or disposed of, their historical cost and accumulated depreciation are derecognized, and any resulting gains or losses are recorded as income or expenses in the period.

Tangible fixed assets are depreciated on a straight-line basis over their estimated useful lives

The depreciation period of the asset is as follows:

Asset type	Depreciation period (years)
Buildings and structures	25 - 30
Machinery and equipment	05 - 10
Transport and transmission equipment	06 - 10
Office equipment and tools	04 - 06

Intangible fixed assets, such as land use rights and computer software, are depreciated on a straight-line basis over an estimated useful life of 3 years.

8. CONSTRUCTION IN PROGRESS

Construction in progress includes assets that are being procured, installed, or constructed and have not yet been put into use. It also includes basic construction projects not yet accepted for use as of the financial statement date. These assets are recorded at cost, including goods and services costs payable to contractors or suppliers, borrowing costs related to the investment period, and other directly attributable costs. Depreciation for these assets begins when they are ready for use, following the same method as other fixed assets.

9. PREPAID EXPENSE

Prepaid expenses include short-term or long-term prepaid costs that have been incurred but relate to the business performance of multiple accounting periods.

The company's prepaid expenses include long-term prepaid expenses for tools and equipment. These expenses are amortized in the company's income statement over a period of 24 to 36 months.

10. LIABILITIES AND ACCRUED EXPENSES

Liabilities and accrued expenses are recognized for future payments related to goods and services already received. Accrued expenses are recorded based on reasonable estimates of the amounts payable.

The classification of liabilities into accounts payable, accrued expenses, and other payables is carried out as follows:

- Accounts Payable reflects amounts payable of a commercial nature arising from transactions involving the purchase of goods, services, or assets, where the seller is an independent entity.
- Accrued Expenses reflects amounts payable for goods or services received from vendors or provided to customers but not yet paid due to a lack of invoices or incomplete accounting documentation. It also includes amounts payable to employees for accrued leave, as well as production and business expenses that must be provisioned in advance.
- Other Payables reflects amounts payable that are non-commercial in nature and not related to the purchase, sale, or provision of goods or services.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS*Accounting period from January 01, 2025 to June 30, 2025**Unit: Vietnamese Dong***11. EQUITY**

Owner's equity is recognized based on the actual capital contributed by the owners.

Treasury Shares: Treasury shares are shares issued by the company and later repurchased. They are recorded at actual value and presented in the financial position as a reduction in equity. The company does not recognize gains or losses from the purchase, sale, issuance, or cancellation of treasury shares.

Undistributed Post-Tax Profit: This refers to the profits generated from the company's operations after deducting adjustments for retrospective application of accounting policy changes and corrections of material prior-period errors.

Undistributed post-tax profits can be distributed to investors in proportion to their capital contributions after approval by the General Meeting of Shareholders and after setting aside reserves as per the company's charter and Vietnamese legal requirements.

12. REVENUE AND EXPENSE RECOGNITION

Revenue is recognized when the company can reliably determine the economic benefits to be received. Net revenue is measured at the fair value of consideration received or receivable, less trade discounts, sales returns, and allowances. Revenue is recognized when the following conditions are met:

Revenue from Sales of Goods:

Revenue is recognized when all of the following conditions are satisfied:

- Significant risks and rewards of ownership of goods have been transferred to the buyer;
- The company no longer retains control or managerial involvement over the goods;
- Revenue can be measured reliably;
- It is probable that economic benefits will flow to the company
- Related costs can be reliably measured.

Revenue from provision of Services:

Revenue is recognized when all of the following conditions are satisfied:

- Revenue can be measured reliably;
- It is probable that economic benefits will flow to the company;
- The stage of completion of the transaction at the reporting date can be reliably determined;
- Costs incurred and those necessary to complete the transaction can be reliably measured.

If the outcome of a service transaction cannot be reliably estimated, revenue is recognized only to the extent of the expenses recognized that are recoverable.

Revenue from Construction Contracts:

Revenue from construction contracts includes:

- The initial revenue stated in the contract.
- Increases and decreases in contract performance, bonuses and other payments if these amounts are likely to change revenue and can be reliably determined.

Revenue is recognized in one of the following cases:

- In cases where the construction contract specifies that the contractor is paid according to a scheduled plan, and the outcome of the construction contract can be reliably estimated, revenue from the contract is recognized based on the portion of work completed as determined by the contractor at the financial reporting date;
- In cases where the construction contract specifies payment based on the value of work performed, if the contract's progress can be reliably estimated and is confirmed by the client, revenue and related costs for the contract are recognized in proportion to the portion of work completed, as confirmed by the client, and reflected on the issued invoices.

When the outcome of a construction contract cannot be reliably estimated, the following principles apply:

- Revenue is only recognized to the extent of the contract costs incurred that are likely to be recoverable;
- Contract costs are recognized as an expense in the period in which they are incurred.

Financial activities revenue

Interest income on deposits is recognized on an accrual basis, determined based on the balance of deposit accounts and the applicable interest rates for each period. Interest from investments is recognized when the Company has the right to receive such interest.

Operating Costs and Cost of Goods Sold

Costs are recognized according to the principle of prudence, collected based on actual incurred expenses, aligned with revenue, and recognized in the appropriate accounting period.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

Accounting period from January 01, 2025 to June 30, 2025

Unit: Vietnamese Dong

13. TAXES AND GOVERNMENT PAYABLES

Corporate income tax includes the total value of current tax payable and deferred tax.

Current corporate income tax expenses are calculated based on taxable income for the period. Taxable income differs from net profit presented in the Statement of Profit and Loss, as it excludes items of income or expenses that are taxable or deductible in other periods (including carried forward losses, if applicable). Additionally, it excludes non-taxable or non-deductible items. Corporate income tax is calculated at the effective tax rate of 20% applied to taxable income at the end of the accounting period.

The determination of the Company's corporate income tax obligations is based on current tax regulations. However, these regulations may change over time, and the final determination of corporate income tax depends on the outcomes of audits by competent tax authorities.

Other types of taxes are applied according to the prevailing tax laws of Vietnam.

14. SEGMENT REPORTING

A business segment is a distinguishable component engaged in the production or provision of individual products or services or a group of related products or services that is subject to risks and economic benefits different from those of other business segments. Accordingly, the Company's business activities include trading, consulting services, and construction.

All of the Company's activities occur within the territory of Vietnam. Therefore, there is no differentiation in the Company's business activities based on geographic location.

Segment reporting includes items directly attributable to a segment and those allocated on a reasonable basis. Unallocated items include assets, liabilities, financial revenue, financial expenses, selling expenses, general administrative expenses, other gains or losses, and corporate income tax.

15. RELATED PARTIES

Entities and individuals are considered related parties if one party has the ability to control or exert significant influence over the other in making financial and operating policy decisions. Related parties include:

- Entities that have control or are controlled, directly or indirectly, through one or more intermediaries, or are under common control with the Company, including the parent company, subsidiaries within the same group, joint ventures, jointly controlled entities, and associates.
- Individuals who, directly or indirectly, hold voting rights in the reporting entity and can exert significant influence over the entity, as well as key management personnel who have authority and responsibility for planning, directing, and controlling the Company's activities, including close family members of these individuals.
- Entities in which the individuals mentioned above hold direct or indirect voting rights or have significant influence.

The related parties of the Company include: Ho Chi Minh City Power Corporation (EVNHCMC), entities under EVNHCMC, its subsidiaries, and affiliates in which EVNHCMC has an investment and controlling interest, the Company's associates, members of the Board of Directors and Board of Management of the Company, Shareholders holding a significant number of shares.

Total	40.119.690.777	(3.981.330.352)	37.788.750.436	(3.965.838.798)

(*) Pursuant to the cooperation contract for the implementation of the project "Wind-powered Generator Unit with Two InS-W-1000 Vertical Axis Rotor Systems" No. 11/CNS-NCPT dated January 17, 2014, and Appendix No. 04 dated November 28, 2014, signed between Ho Chi Minh City Power Investment and Trading Joint Stock Company and Saigon Industrial Corporation, the total approved investment for the project is VND 163,753,231,889. Of this, VND 43,926,000,000 comes from the state budget funded by the Department of Science and Technology, and VND 119,827,231,889 is jointly contributed by the two parties, with each contributing 50%, equivalent to VND 52,645,000,000.

– According to the agreement in the contract, both parties will jointly establish a Project Management Unit to carry out all project-related activities. Upon completion of the project and the transfer of three wind generator units, both parties will recover their investment capital. The remaining amount (including state budget science funding) will be equally enjoyed by both parties in proportion to their capital contributions and reused for Phase 2 – the phase of technology transfer, manufacturing, and trading of wind-powered generators.

– On February 7, 2020, the Company issued Official Letter No. 0054/CV-TRADIN-QLDA to the Standing Vice Chairman of the People's Committee of Ho Chi Minh City requesting to withdraw from contributing capital to the following phases of the project due to force majeure circumstances. The Company's capital contribution would be limited to the amount already invested in the project, and it requested permission to divest from the project if there is a party willing to accept the transfer.
