

No: ²⁰⁶/2025/CV-TCKT

Explanation of Changes in Net Profit After
Corporate Income Tax of Quarter 2/2025 –
Parent Company

Hanoi, July 30, 2025

To: - State Securities Committee;
- HNX Stock Exchange

Implementation of Circular No. 96/2020/TT-BTC dated November 16, 2020, issued by the Ministry of Finance on “Guidelines for Information Disclosure in the Securities Market”;

Licogi Corporation - JSC provides the following explanation for business performance of the Parent Company's financial statements in quarter II/ 2025;

Description	Unit VND Million	Quarter I/2025	Quarter I/2024	Fluctuation (%)
Total Revenue	VND Million	134.391	97.972	37,2%
Total Expenses	VND Million	60.774	56.862	6,9%
Operating Profit	VND Million	73.617	41.110	79,1%
Other Gains/Losses	VND Million	-2.955	-2.520	-17,3%
Profit before tax	VND Million	70.662	38.590	83,1%
Corporate income tax	VND Million	-	-	
Profit after tax	VND Million	70.662	38.590	83,1%

Explanation for Profit Difference Over 10%:

The profit after tax recorded in the Parent Company's Quarter II/ 2025 financial statements increased by VND 32 billion compared to the same period in 2024, primarily due to the following reason:

Financial income increased, while financial expenses and administrative expenses decreased compared to Quarter II/ 2024.

As a result, the profit after tax of the Parent Company in Quarter II/ 2025 increase by more than 10% compared to Quarter II/ 2024.

Best Regards,

To:

- As stated above;
- BOD, The Supervisory Board (for reporting);
- Filed at the Head Office, Accounting Dep.

1. GENERAL INFORMATION

Ownership Structure

LICOGI Corporation - Joint Stock Company (abbreviated as "LICOGI Corporation") was originally the Corporation for Foundation Construction and Infrastructure Engineering, established under Decision No. 998/BXD-TCLĐ dated November 20, 1995, by the Minister of Construction. It was a state-owned enterprise directly under the Ministry of Construction. The Corporation transitioned to a joint-stock company under Decision No. 2243/QĐ-TTg dated December 11, 2014, by the Prime Minister approving the equitization plan for the parent company – the Corporation for Construction and Infrastructure Development.

According to Business Registration Certificate No. 0100106440, which was amended for the third time on December 31, 2015, by the Hanoi Department of Planning and Investment, the Corporation for Construction and Infrastructure Development - One Member Limited Liability Company officially converted into a joint-stock company, named LICOGI Corporation - Joint Stock Company, with a charter capital of VND 900,000,000,000.

The Business Registration Certificate No. 0100106440 was initially issued by the Hanoi Department of Planning and Investment on November 24, 2010. The certificate has been amended 11 times, with the 11th amendment issued on July 11, 2025, by the Hanoi Department of Planning and Investment.

The headquarters of the Corporation is located at: Building G1, 491 Nguyen Trai Street, Thanh Liet Ward, Hanoi City.

Business Activities and Main Operations

Construction and Installation: Construction of underground works, irrigation works (dikes, dams, canals, water reservoirs, irrigation systems, pipelines, pumping stations), hydropower, thermal power, postal services, water supply and drainage systems, urban infrastructure and industrial park projects, power transmission lines and substations, foundation construction for various types of projects, blasting operations (the enterprise may only engage in this activity when authorized by the competent state authority);

Construction and Installation: Construction and general contracting of civil, industrial, and transportation works (roads, railways, road bridges, rail bridges, airports, ports, train stations, tunnels);

Research and Application of New Technologies: Research, application, and transfer of new technologies in construction, organization of training, retraining, and professional development for management staff, technical workers, and specialists, and providing orientation for sending Vietnamese laborers and experts abroad for temporary work;

Transportation Business: Inland waterway and road transportation services;

Manufacturing and Trading: Manufacturing, trading, and import-export of mechanical products, materials, machinery, equipment, raw materials, construction materials, and construction technologies;

Construction Investment Consultancy: Includes planning, project investment preparation and evaluation, surveying (topography, geotechnical, hydrogeological), designing, preparing construction cost estimates, project management, technical supervision of construction, consulting on bidding and economic contracts for design, construction, installation, and supply of materials and equipment; conducting experiments and quality inspections of construction works (excluding legal consultancy);

Investment and Business Development: Investment in and development of housing projects, urban areas, industrial parks, technical infrastructure, electrical projects, and commercial electricity; investment and business in office services, hotels, guesthouses, tourism, entertainment, and management of integrated services in new urban areas and concentrated residential areas.

1. GENERAL INFORMATION (CONTINUED)

The main activity of the Corporation is the construction and installation of projects.

Normal Business and Production Cycle

The normal business and production cycle of the Corporation is carried out within a period of no more than 12 months, except for certain specific projects in construction and real estate investment that have a duration exceeding 12 months.

The activities of the Corporation during the period have an impact on the financial statements of the parent company – the Corporation.

Details are presented in the “Corporate Structure” section below.

Corporate Structure

1. GENERAL INFORMATION (CONTINUED)

Disclosure on the Comparability of Information in the Financial Statements of the Parent Company – the Corporation

The Corporation has applied Circular No. 200/2014/TT-BTC issued by the Ministry of Finance on December 22, 2014 ("Circular 200"), which provides guidance on the accounting regime for enterprises.

2. BASIS FOR PREPARATION OF THE PARENT COMPANY – CORPORATION FINANCIAL STATEMENTS AND FINANCIAL YEAR

Basis for Preparing the Parent Company – Corporation Financial Statements

The accompanying financial statements of the Parent Company – the Corporation are presented in Vietnamese Dong (VND), based on the historical cost principle and in accordance with the Vietnamese Accounting Standards, the accounting regime for enterprises in Vietnam, and the legal regulations related to the preparation and presentation of financial statements and financial treatment at the official time of transitioning to a joint-stock company under current regulations.

The accompanying financial statements of the Parent Company – the Corporation are not intended to reflect the financial position, business performance, and cash flows according to the accounting principles and practices generally accepted in other countries outside Vietnam.

The opening figures as of January 1, 2025, are audited by International Auditing Co., Ltd.

FINANCIAL YEAR

The Corporation's financial year starts on January 1 and ends on December 31..

3. APPLICATION OF NEW ACCOUNTING

GUIDELINES

Guidelines on the Accounting Regime for Enterprises

The Corporation's Board of Directors has applied Circular 200 in the preparation and presentation of the financial statements of the Parent Company – the Corporation for the operational period from April 1, 2025, to June 30, 2025.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Corporation in the preparation of these financial statements, are as follows:

Estimates

The preparation of consolidated financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires Board of General Directors to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the year. Although these accounting estimates are based on the Board of General Directors's best knowledge, actual results may differ from those estimates.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial Instruments

Initial Recognition

Financial Assets: On initial recognition, financial assets are recorded at cost, including transaction costs directly attributable to the acquisition of the financial assets. The financial assets of the Corporation include cash, financial investments, receivables from customers, and other receivables

Financial liabilities: At the initial recognition date, financial liabilities are recorded at their cost, plus any transaction costs directly related to the issuance of those financial liabilities. The financial liabilities of the Corporation include short-term loans and finance lease liabilities, payables to suppliers, other payables, and accrued expenses.

Subsequent Measurement

Currently, there are no regulations regarding the subsequent measurement of financial instruments after initial recognition.

Cash

Cash includes cash on hand and demand deposits with banks.

Investments in Financial Assets

Investments in Subsidiaries

A subsidiary is a company controlled by the Corporation. Control is achieved when the Corporation has the ability to govern the financial and operating policies of the investee to obtain benefits from its activities.

Investments in subsidiaries are accounted for at cost, less any provision for impairment. A provision for impairment is recognized when there is a decline in the value of the investments.

Investments in Associates

An associate is a company in which the Corporation has significant influence, but is not a subsidiary or joint venture of the Corporation. Significant influence is evidenced by the ability to participate in the financial and operating policy decisions of the investee, but without having control or joint control over these policies.

Investments in associates are accounted for at cost, less any provision for impairment. A provision for impairment is recognized when there is a decline in the value of the investments.

Investments in Other Entities

Investments in other entities refer to investments in equity instruments of other entities where the investor does not have control or joint control, nor significant influence over the investee. These investments are initially recognized at cost. A provision for impairment is made when the investee incurs losses..

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Receivables

Receivables are amounts that are expected to be collected from customers or other entities. Receivables are presented at their carrying amount, less any allowance for doubtful debts, which is estimated based on a review by the Management of all outstanding receivables at the end of the period. Receivables that are deemed uncollectible are written off.

Inventory

Inventory is determined based on the cost principle. The cost of inventory includes direct material costs, direct labor costs, and manufacturing overhead, if any, incurred to bring the inventory to its present location and condition.

Inventory is determined using the weighted average cost method, first-in-first-out (FIFO), or specific identification, depending on the type of materials and goods at Licogi Branch No. 1 and Licogi Building Materials Branch.

Inventory is determined using the weighted average cost method, first-in-first-out (FIFO), or specific identification, depending on the type of materials and goods at Licogi Branch No. 1 and Licogi Building Materials Branch.

Inventory is accounted for using the perpetual inventory system.

Work-in-progress costs at the end of the period include direct material costs, direct labor costs, equipment usage costs, and manufacturing overhead that are accumulated and allocated to construction projects, services, surveys, and designs for incomplete works at the end of the accounting period or completed works that have not yet been accepted by the customer for the completed quantity. The work-in-progress costs are determined or estimated based on the volume of work completed at the end of the accounting period.

Borrowing costs are capitalized into work-in-progress costs, including actual borrowing costs incurred from loans used to finance the construction of incomplete assets and borrowing costs determined based on the capitalization rate for the weighted average borrowing costs incurred for the investment in the construction or production of that asset. The capitalization rate is calculated based on the weighted average interest rate of loans that have not been repaid during the period, excluding loans specifically designated for the purpose of a particular incomplete asset. The borrowing costs capitalized during the period should not exceed the total borrowing costs incurred in that period.

Tangible Fixed Assets and Depreciation

Tangible fixed assets are presented at their cost, less accumulated depreciation.

The cost of tangible fixed assets acquired includes the purchase price and all other costs directly related to making the asset ready for use. For fixed assets acquired through construction investment, whether by tender or self-construction and production, the cost is the final settlement amount for the construction project under the current investment and construction management regulations, along with other directly related costs and registration fees (if any). In cases where a project has been completed and put into use but the final settlement has not been approved, the cost of the fixed asset is recognized based on a provisional amount, calculated using the actual costs incurred to acquire the asset. The provisional cost will be adjusted according to the final settlement approved by the competent authorities.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Tangible Fixed Assets and Depreciation (Continued)

Tangible fixed assets are depreciated using the straight-line method based on their estimated useful life, as follows:

Operating Period from April 1, 2025, to June 30, 2025

	<u>Useful Life (Years)</u>
Buildings and Structures	10 – 25
Machinery and Equipment	03 - 15
Transport Vehicles and Transmission Equipment	05 - 10
Office Equipment	03 – 10
Other Fixed Assets	03 - 10

The Corporation's tangible fixed assets were revalued during the equitization process. The cost and accumulated depreciation have been adjusted based on the revaluation results, which were approved by the competent authorities in accordance with regulations.

Gains and losses arising from the disposal or sale of assets are the difference between the proceeds from the disposal and the asset's remaining book value, and are recognized in the income statement.

Intangible Fixed Assets and Depreciation

Intangible fixed assets consist of computer software and are presented at cost, less accumulated amortization.

Management software is initially recognized at cost and is amortized using the straight-line method over 5 years

The Corporation's intangible assets were revalued during the equitization process of the State-owned enterprise. The cost and accumulated amortization have been adjusted based on the revaluation results, which were approved by the competent authorities in accordance with regulations.

Investment Properties

Investment properties include land use rights, factories, and structures held by the Corporation with the purpose of generating rental income or capital appreciation. Investment properties that are leased are presented at cost, less accumulated depreciation. Investment properties held for capital appreciation are presented at cost, less impairment. The cost of investment properties purchased includes the purchase price and related costs, such as legal consulting fees, registration taxes, and other related transaction costs.

The cost of self-constructed investment properties is the final settlement amount of the construction project or the directly related costs of the investment property.

Prepaid Expenses

Prepaid expenses include actual costs incurred that are related to the results of the Corporation's operations over multiple accounting periods. Prepaid expenses include prepayments for land rental, business advantages when determining the value of the enterprise for equitization, and other prepaid costs.

Land rental represents the amount of land rent paid in advance. Prepaid land rent is allocated to the income statement using the straight-line method over the lease term.

The business advantage when determining the enterprise value for equitization is based on the valuation document for the transformation of a 100% state-owned enterprise into a joint-stock company as of December 31, 2012. The business advantage for equitization is amortized over a period of 3 years from the date the joint-stock company officially commenced operations.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Prepaid Expenses (Continued)

Other prepaid expenses include the value of small tools, equipment, and components that have been used, advertising costs, software royalties, and insurance costs for the gas pipeline system. These costs are capitalized as prepaid expenses and are amortized to the income statement using the straight-line method in accordance with current accounting regulations.

Provisions

Provisions are recognized when the Corporation has a current legal or constructive obligation arising from past events; the settlement of the obligation is expected to result in an outflow of economic benefits, and the amount of the obligation can be reliably estimated. Provisions are not recognized for future operating losses.

Provisions are calculated based on estimated costs required to settle the obligation. If the time value of money is significant, the provision is calculated using the present value, discounted at a pre-tax rate, reflecting current market assessments of the time value of money and the specific risks of the obligation. The increase in value due to the time factor is recognized as borrowing costs.

Payable provisions

As of June 30, 2025, the Board of Directors assessed that the liabilities arising from past events do not have a significant impact. Therefore, the Board of Directors decided not to recognize any provisions.

Accrued Expenses

Accrued expenses are recognized based on reasonable estimates of amounts payable for goods and services used during the period..

Accrued expenses include interest expenses, construction project expenses, and other accrued costs.

Interest expenses are estimated based on the borrowed amount, loan term, and actual interest rates for each period.

Accrued expenses for construction projects are recognized in accordance with the revenue from construction contracts, which is recorded based on the completion report of the work volume agreed between the Corporation and the client.

Equity

The shareholders' contributed capital is recognized based on the actual amount contributed by the shareholders. The owners' capital is reflected at the par value of the shares.

Other capital of the owners: reflects the value of other capital contributions from the owners at the reporting date.

Retained earnings: reflects the profit or loss after income tax of the Corporation as of the reporting date.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue Recognition

Sales Revenue

Revenue from the sale of goods is recognised when all five (5) following conditions are satisfied:

- (a) The Corporation has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) The Corporation retains neither continuing managerial involvement to the degree usually associated with; ownership nor effective control over the goods sold;
- (c) The amount of revenue can be measured reliably. When the contract stipulates that the buyer is entitled to return the products or goods, purchased under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer is not entitled to pay return products and goods (except for cases where customers have the right to return goods in the form of exchange for other goods or services
- (d) The Corporation has obtained or will receive economic benefits from the sale transaction; and
- (e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Service Revenue

Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, revenue is recognised in each period by reference to the percentage of completion of the transaction at the balance sheet date of that period. The outcome of a transaction can be measured reliably when all four (4) following conditions are satisfied:

- (a) The amount of revenue can be measured reliably; When the contract stipulates that the buyer is entitled to return the products or goods, purchased under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer is not entitled to pay return products and goods;
- (b) It is probable that the economic benefits associated with the transaction will flow to the Corporation;
- (c) The percentage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Revenue from construction contracts of the Corporation is recognized in accordance with the Corporation's accounting policy for construction contracts (details provided below).

Interest income from investments is recognized when the Corporation has the right to receive the interest.

Construction contracts

When the outcome of a construction contract can be reliably estimated and confirmed by the customer, revenue and related costs are recognized in accordance with the work completed and confirmed by the customer during the period.

When the outcome of a construction contract cannot be reliably estimated, revenue is only recognized to the extent of the contract costs incurred that are likely to be recoverable.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue Recognition (Continued)

Revenue from real estate sales by the Corporation, as the investor, is recognized when all five of the following conditions are met:

- (a) The real estate has been fully completed and delivered to the buyer, and the risks and rewards associated with the ownership of the real estate have been transferred to the buyer;
- (b) The Corporation no longer retains control or management rights over the real estate, as the owner;
- (c) The revenue can be reliably measured;
- (d) The Corporation has received or will receive economic benefits from the real estate sale transaction;
- (e) The costs associated with the real estate sale transaction can be reliably estimated.

Unearned revenue

Unearned revenue mainly represents advance payments received under labor export contracts between the Corporation and its customers.

Foreign Currency

The Corporation applies exchange rate differences according to the guidelines of Vietnamese Accounting Standard No. 10 (VAS 10) "Effects of Changes in Exchange Rates." Accordingly, transactions in foreign currency are converted at the exchange rate on the transaction date. The balances of monetary items in foreign currency at the end of the reporting period are converted at the exchange rate on that date. Exchange rate differences are recognized in the Profit and Loss Statement. Exchange rate gains arising from the revaluation of balances at the end of the reporting period are not distributed to shareholders.

Borrowing Costs

Borrowing costs are recognized as production and business expenses in the period when they occur, unless capitalized according to the provisions of Vietnamese Accounting Standard No. 16 "Borrowing Costs."

Accordingly, borrowing costs directly related to the purchase, construction, or production of assets that take a relatively long time to complete and put into use or operation are added to the asset's cost until the asset is put into use or operation. Income from temporary investments of borrowings is deducted from the cost of the related asset. For borrowings specifically used for the construction of fixed assets or investment properties, interest is capitalized even if the construction period is less than 12 months.

Other borrowing costs are recognized as an expense in the Profit and Loss Statement when incurred.

Cost of Goods Sold

The cost of goods sold and services provided is the total cost of goods, materials sold, and services provided to customers during the period, recognized in accordance with revenue.

Financial Expenses

Financial expenses reflect the costs arising from financial activities during the period, primarily including interest expenses and foreign exchange losses

Business Administration Expenses

Business administration expenses reflect the general management costs of the Corporation, mainly including employee salaries in the management department; social insurance, health insurance, union fees, and unemployment insurance for management staff; office materials, labor tools, depreciation of fixed assets used for business administration; outsourced services; and other cash expenses.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilized.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Corporation intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

Related parties

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control or are controlled by, or under common control with, the Corporation, including holding companies, subsidiaries and fellow subsidiaries are related parties of the Corporation. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Corporation that gives them significant influence over the enterprises, key management personnel, including directors and officers of the Corporation and close members of the family of these individuals and companies associated with these individuals also constitute related parties. In considering each related party relationship, attention is paid to the nature of the relationship, not the legal form.

In considering the relationships with related parties, the Corporation bases its assessment on the substance of the relationship, rather than just the legal form of those relationships.

7. FINANCIAL INVESTMENT (CONTINUED)

The Corporation is presenting the fair value of its investments in subsidiaries, affiliates, capital contributions, and other entities based on the original cost transferred from the State-owned Enterprises.

During the privatization period from January 1, 2013, to December 31, 2015, the Corporation followed the guidance of Article 10 - Financial treatment at the time of privatization when the state-owned enterprise officially becomes a joint-stock company, as specified in Circular No. 127/2014/TT-BTC dated September 5, 2014, issued by the Ministry of Finance, regarding the financial treatment and determination of enterprise value when converting a 100% state-owned enterprise into a joint-stock company. Therefore, the Corporation did not consider making provisions for financial investments at the time it officially became a joint-stock company. The Corporation officially became a joint-stock company on December 31, 2015.

From the date it officially became a joint-stock company, the Corporation began making provisions for financial investments in accordance with the guidelines of Circular No. 228/2009/TT-BTC issued by the Ministry of Finance on December 7, 2009, which provides guidance on the establishment and use of provisions for the impairment of inventory, losses from financial investments, bad debts, and warranty for products, goods, and construction works at enterprises, as well as Circular No. 89/2013/TT-BTC issued by the Ministry of Finance on June 28, 2013, amending certain provisions of Circular No. 228/2009/TT-BTC.

The performance of subsidiaries and affiliates during the period from April 1, 2025, to June 30, 2025, is as follows:

	Operating period from April 1, 2025, to June 30, 2025.

11. BAD DEBTS

During the process of equitization, the Corporation followed the guidance of Article 10 - Financial handling at the time of equitization of a state-owned enterprise into a joint-stock company, as specified in Circular No. 127/2014/TT-BTC dated September 5, 2014, by the Ministry of Finance, which provides instructions on financial handling and determining the value of an enterprise when converting a 100% state-owned enterprise into a joint-stock company. Therefore, the Corporation did not consider creating provisions for receivables at the time of officially converting into a joint-stock company on December 31, 2015.

From the date of officially becoming a joint-stock company, the Company has implemented the provision for doubtful debts as required.

The details of the provisions for doubtful debts are presented as follows:

	As of June 30, 2025
	Provision
	VND
The total value of overdue receivable
