STT	Các chỉ tiêu <i>Indicators</i>	Quý 2 năm 2024 <i>The Second Quarter 2024</i>	Quý 2 năm 2025 <i>The Second Quarter 2025</i>	Biến động <i>Change</i>	
				Giá trị <i>Value</i>	Tỷ lệ <i>Percentage</i>
1	Doanh thu bán hàng và cung cấp dịch vụ/ <i>Revenue from sales and service provision</i>	209.241.406.678	248.517.421.651	39.276.014.973	19%
2	Lợi nhuận sau thuế hợp nhất/ <i>Consolidated profit after tax</i>	8.925.216.905	27.779.373.260	18.854.156.355	211,2%

Nguyên nhân/Reasons:

- Doanh thu tăng trưởng mạnh : 39,3 tỷ, tương ứng tỷ lệ tăng 19%
- Lợi nhuận sau thuế tăng đột biến: 18,9 tỷ, tương ứng tỷ lệ tăng 211,2%

Nguyên nhân chính do:

- Trong kỳ, công ty mẹ đã ghi nhận được doanh thu từ hoạt động kinh doanh bất động sản với lợi nhuận gộp đạt 16,8 tỷ đồng tăng trưởng 351%, chiếm tỷ trọng 62% so với cùng kỳ năm 2024. Bên cạnh đó, lợi nhuận tăng thêm do được ghi nhận lãi từ hoạt động đầu tư vốn tăng 387% so với quý 2 năm 2024.

- Ghi nhận kết quả kinh doanh ổn định từ công ty con, công ty liên kết.

- Revenue recorded strong growth, reaching VND 39.3 billion, up 19% year-over-year.

- Post-tax profit surged, to VND 18.9 billion, representing an increase of 211.2% compared to the same period last year.

The main contributing factors include:

- During the period, the parent company recognized revenue from real estate business activities, with a gross profit of VND 16.8 billion - up 351%, and accounting for 62% of the total compared to the same period in 2024. Additionally, was boosted by gains from capital investment activities, which rose 387% compared to Q2 2024.

- Stable business results were also recorded from subsidiaries and associated companies.

6. Statement on the Comparability of Information in the Financial Statements

The corresponding figures for the previous period are comparable with the figures for the current period.

II. REPORTING PERIOD, CURRENCY UNIT USED IN ACCOUNTING**1. Fiscal year**

The company's fiscal year begins on January 1st and ends on December 31st each year.

2. Accounting currency

The currency unit used in accounting is the Vietnamese Dong (VND), as most transactions are conducted in VND.

III. ACCOUNTING STANDARDS AND REGULATIONS APPLIED**1. Accounting Regulations Applied**

The Company applies the Vietnamese Accounting Standards and the Vietnamese Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated December 22, 2014, Circular No. 53/2016/TT-BTC dated March 21, 2016, as well as the guiding circulars for implementing the accounting standards issued by the Ministry of Finance in preparing and presenting the consolidated financial statements.

2. Statement on Compliance with Accounting Standards and Regulations

The Board of General Directors ensures compliance with the requirements of the Vietnamese Accounting Standards and the Vietnamese Enterprise Accounting System, as issued under Circular No. 200/2014/TT-BTC dated December 22, 2014, Circular No. 53/2016/TT-BTC dated March 21, 2016, and the guiding circulars for implementing the accounting standards by the Ministry of Finance in preparing and presenting the consolidated financial statements.

IV. ACCOUNTING POLICIES APPLIED**1. Basis of Preparing Consolidated Financial Statements**

The financial statements are prepared based on the accrual basis of accounting (except for cash flow information).

2. Basis of Consolidation

1369 CONSTRUCTION JOINT STOCK COMPANY

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

The consolidated financial statements include the consolidated financial statements of the parent company and the financial statements of the subsidiaries. A subsidiary is an entity controlled by the parent company. Control exists when the parent company has the ability, directly or indirectly, to govern the financial and operating policies of the subsidiary in order to obtain benefits from its activities. When determining control, consideration is given to potential voting rights arising from options or convertible debt instruments and equity instruments that could be converted into common shares at the end of the fiscal year.

The results of operations of subsidiaries acquired or disposed of during the year are presented in the consolidated statement of profit or loss from the date of acquisition or until the date of disposal of the investment in that subsidiary.

The parent company and subsidiaries use the same accounting policies and prepare financial statements for the same accounting period, applying consistent accounting policies to similar transactions and events under similar circumstances. In the case of differences in accounting policies between the parent company and a subsidiary, the financial statements of the subsidiary will be adjusted accordingly before being used for consolidation.

Balances in accounts on the consolidated balance sheet between companies within the group, intercompany transactions, and unrealized intercompany profits arising from such transactions must be fully eliminated. Unrealized losses arising from intercompany transactions are also eliminated unless the cost resulting in the loss is not recoverable.

The interests of non-controlling shareholders represent the share of profits or losses in the net assets of the subsidiary that is not held by the group and are presented as a separate line item in the consolidated statement of profit or loss and on the consolidated balance sheet (under equity). The interests of non-controlling shareholders include the value of their interests at the initial consolidation date and their share of movements in equity since the business combination date. Losses incurred by the subsidiary are allocated to the non-controlling interest in proportion to their ownership interest, even when the loss exceeds the non-controlling interest's share of the subsidiary's net assets.

3. Foreign Currency Transactions

Transactions in foreign currencies are converted at the exchange rate at the transaction date. Monetary items denominated in foreign currencies at the end of the financial year are translated at the exchange rate on that date.

Foreign exchange differences arising during the year from foreign currency transactions are recognized as financial income or financial expenses. Exchange differences from the revaluation of foreign currency-denominated monetary items at the end of the financial year, after netting off the increase and decrease differences, are recognized as financial income or financial expenses.

The exchange rate used for converting foreign currency transactions is the actual transaction rate at the time of the transaction. The actual transaction exchange rate for foreign currency transactions is determined as follows:

- For foreign currency purchase and sale contracts (spot contracts, forward contracts, futures contracts, options contracts, swap contracts): the exchange rate stated in the foreign exchange purchase or sale agreement between the group and the bank.
- For receivables: the foreign currency buying rate of the commercial bank where the group designates the customer to make the payment at the time the transaction occurs.
- For payables: the foreign currency selling rate of the commercial bank where the group intends to transact at the time the transaction occurs.
- For transactions involving the immediate purchase of assets or expenses paid in foreign currency (not through accounts payable): the foreign currency buying rate of the commercial bank where the group makes the payment.

1369 CONSTRUCTION JOINT STOCK COMPANY

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

The exchange rate used to revalue the balances of foreign currency-denominated monetary items at the end of the financial year is determined as follows:

- For foreign currency deposits in banks: the foreign currency buying rate of the bank where the group holds foreign currency accounts.
- For foreign currency-denominated monetary items classified as other assets: the foreign currency buying rate of Vietcombank (the bank the group frequently transacts with).
- For foreign currency-denominated monetary items classified as payables: the foreign currency selling rate of the bank where the group transacts.

4. Cash and Cash Equivalents

Cash includes cash on hand and demand deposits with banks. Cash equivalents are short-term investments that are due to be collected within 3 months from the investment date, easily convertible to a known amount of cash, and subject to no significant risk of changes in value at the reporting date.

5. Financial investments

Held-to-Maturity Investments

Investments are classified as held-to-maturity when the Company has the intention and ability to hold them until maturity. Held-to-maturity investments include only fixed-term bank deposits. Interest income from fixed-term bank deposits is recognized in the income statement on an accrual basis.

Loans

Loans are recognized at their original value, less provisions for doubtful receivables. Provisions for doubtful receivables related to loans are made based on the estimated loss that may occur.

Investments in Associated Companies

An associated company is an entity in which the Group has significant influence but does not control the financial and operating policies. Significant influence is evidenced by the ability to participate in decisions regarding financial and operating policies of the investee, but without controlling those policies.

Investments in associated companies are recognized using the equity method. Under this method, the investment in an associated company is shown in the consolidated financial statements at the initial investment cost, adjusted for changes in the Group's share of the investee's net assets after the investment date. If the Group's share of the associate's losses exceeds or equals the carrying value of the investment, the investment value is presented in the consolidated financial statements as zero, unless the Group has obligations to make payments on behalf of the associated company.

The financial statements of the associated company are prepared for the same accounting period as the Group's consolidated financial statements. When the accounting policies of the associated company differ from the Group's consistent policies, appropriate adjustments are made to the financial statements of the associated company before consolidation.

Unrealized gains or losses from transactions with associated companies are eliminated to the extent of the Group's interest when preparing the consolidated financial statements.

Investments in Equity Instruments of Other Entities

Investments in equity instruments of other entities include investments in equity securities where the Group does not have control, joint control, or significant influence over the investee.

1369 CONSTRUCTION JOINT STOCK COMPANY

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

Investments in equity instruments are initially recognized at cost, including the purchase price or contribution amount, plus any directly attributable costs of the investment. Dividends from periods before the investment was made reduce the carrying amount of the investment. Dividends from periods after the investment is made are recognized as revenue. Dividends received in the form of additional shares are only recorded as an increase in the number of shares, not as the value of the shares received.

Provisions for impairment of investments in equity instruments are made as follows: For investments where the fair value cannot be determined at the reporting date, the provision is based on the investee's losses, with the provision calculated as the difference between the actual contribution of the parties in the other entity and the actual equity, multiplied by the Group's share of the total contributions in the other entity.

Any increase or decrease in the provision for impairment of investments in equity instruments at the year-end is recognized as a financial expense.

6. Receivables

Receivables are presented at their book value, less provisions for doubtful debts.

Receivables are classified as receivables from customers and other receivables based on the following principles:

- Receivables from customers reflect trade receivables arising from buying and selling transactions between the Company and independent buyers.
- Other receivables reflect non-trade receivables unrelated to buying and selling transactions.

Provisions for doubtful debts are established for each doubtful receivable after offsetting with any payable (if applicable). The provision level is based on the aging of overdue debts or the estimated loss that may occur, as follows:

- For overdue receivables:
 - 30% of the value for receivables overdue from over 6 months to under 1 year.
 - 50% of the value for receivables overdue from 1 year to under 2 years.
 - 70% of the value for receivables overdue from 2 years to under 3 years.
 - 100% of the value for receivables overdue from 3 years and above.
- For receivables that have not yet matured but are expected to be difficult to recover: the provision is based on the estimated loss.

Any increase or decrease in the provision for doubtful debts at the end of the reporting period is recorded as administrative expenses

7. Inventories

Inventories are recognized at the lower of cost and net realizable value.

The cost of inventories is determined as follows:

- Raw materials and goods: include purchase costs and other directly related costs incurred to bring the inventories to their current location and condition.
- Work-in-progress: includes the cost of raw materials, labor costs, and other directly related costs.

The cost of goods sold is calculated using the weighted average method and is accounted for using the periodic inventory system.

Net realizable value is the estimated selling price of the inventory in the ordinary course of business, less estimated costs to complete and the estimated necessary costs to sell the inventory.

1369 CONSTRUCTION JOINT STOCK COMPANY

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

A provision for inventory write-down is made for each item where the cost exceeds the net realizable value. Any increase or decrease in the provision for inventory write-downs at the end of the reporting period is recognized as cost of goods sold.

8. Tangible fixed assets

Tangible fixed assets are stated at their cost less accumulated depreciation. The cost of tangible fixed assets includes all expenses that the company must incur to acquire the asset and bring it into a state of readiness for use. Costs incurred after initial recognition are only added to the cost of the tangible fixed asset if these costs are certain to increase future economic benefits from the use of the asset. Costs that do not meet these conditions are recognized as production or business expenses for the period.

When tangible fixed assets are sold or disposed of, the cost and accumulated depreciation are written off, and any resulting gain or loss from disposal is recognized as income or expense for the period.

Tangible fixed assets are depreciated using the straight-line method based on their estimated useful life. The depreciation periods for various types of tangible fixed assets are as follows:

<u>Types of Tangible fixed assets</u>	<u>Years</u>
Buildings and structures	05 – 25
Machinery and equipment	03 – 15
Transport and transmission vehicles	05 – 10
Management equipment	03 – 06

9. Intangible Fixed Assets

Intangible fixed assets are presented at cost less accumulated amortization.

The cost of intangible fixed assets includes all costs that the Group incurs to acquire the asset until the asset is ready for use. Costs related to intangible fixed assets incurred after initial recognition are recognized as production and operating expenses for the period unless these costs are associated with a specific intangible fixed asset and increase the economic benefits from these assets.

When an intangible fixed asset is sold or disposed of, its cost and accumulated amortization are removed from the books, and any gain or loss arising from the disposal is recognized in income or expense for the year.

The Group's intangible fixed assets consist of computer software programs. Costs related to computer software programs that are not an integral part of related hardware are capitalized. The cost of the computer software is the total amount the Group has spent until the software is ready for use. The software is amortized using the straight-line method over 5 years.

10. Investment Properties

Investment property is property owned by the company that is used to earn rental income. Investment property held for rental is stated at its cost less accumulated depreciation. The cost of investment property includes all expenses incurred by the company or the fair value of the exchange amounts to acquire the investment property, up to the time of purchase or completion of construction.

Costs related to investment property that arise after initial recognition are recognized as expenses, unless these costs are certain to increase the future economic benefits of the investment property beyond the originally assessed level, in which case they are added to the cost of the investment property.

1369 CONSTRUCTION JOINT STOCK COMPANY

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

When investment property is sold, the cost and accumulated depreciation are written off, and any resulting gain or loss is recognized as income or expense for the period..

The transfer of property from owner-occupied property or inventory to investment property only occurs when the owner discontinues using the asset and starts renting it to others, or when the construction phase is completed. The transfer of investment property to owner-occupied property or inventory only occurs when the owner begins using the property or starts selling it. The transfer from investment property to owner-occupied property or inventory does not affect the original cost or carrying value of the property at the time of the transfer.

Investment property held for rental is depreciated using the straight-line method based on the estimated useful life. The company's investment property is depreciated over 8 years.

11. Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The acquisition cost includes the fair value at the exchange date of the exchanged assets, liabilities that have been incurred or recognized, and equity instruments issued by the Group to obtain control of the acquired entity, along with any directly related costs of the business combination. Acquired assets, identifiable liabilities, and contingent liabilities assumed in the business combination are recognized at their fair value at the acquisition date.

Any excess of the acquisition cost over the Group's share in the fair value of identifiable net assets (assets and liabilities) and recognized contingent liabilities at the acquisition date is recognized as goodwill. If the Group's share of the fair value of identifiable net assets and liabilities exceeds the acquisition cost, the difference is recognized in the income statement.

Goodwill is amortized on a straight-line basis over 10 years. If there is evidence that goodwill has suffered impairment greater than the amortization, the impairment loss for the year is recognized.

The interest of non-controlling shareholders at the acquisition date is determined based on their share in the fair value of assets, liabilities, and contingent liabilities recognized.

12. Payables and Accruals

Payables and accrued expenses are recognized for amounts that are owed in the future related to goods and services that have been received. Accrued expenses are recorded based on reasonable estimates of the amounts to be paid..

The classification of payables is as follows::

- Payables to Suppliers: These reflect payables arising from commercial transactions related to the purchase of goods, services, and assets, where the supplier is an independent entity from the company.
- Accrued Expenses: These reflect payables for goods and services received from suppliers or provided to buyers but not yet paid due to the absence of invoices or incomplete accounting documentation. They also include payables to employees for wages, vacation pay, and accrued production or business expenses that need to be accrued.
- Other Payables: These reflect non-commercial payables that are not related to the purchase, sale, or provision of goods and services.

Payables and Accrued Expenses are classified as current and non-current on the consolidated balance sheet based on the remaining term as of the end of the reporting period.

13. Owner's Equity

Owner's Contributions

1369 CONSTRUCTION JOINT STOCK COMPANY

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

Owner's contributions are recognized based on the actual capital contributed by the shareholders.

14. Profit Distribution

After-tax profit is distributed to shareholders after allocating reserves as required by the company's charter, legal regulations, and approval by the General Meeting of Shareholders.

The distribution of profit to shareholders considers non-cash items within undistributed after-tax profits that may affect cash flow and the ability to pay dividends, such as profits from the revaluation of assets contributed as capital, profits from the revaluation of monetary items, financial instruments, and other non-cash items..

Dividends are recognized as payables when a decision or announcement to distribute dividends is made.

15. Revenue and Income Recognition

Revenue from Sale of Goods and Finished Products

Revenue from the sale of goods and finished products is recognized when all of the following conditions are met:

- The company has transferred most of the risks and rewards associated with the ownership of the goods or products to the buyer.
- The company no longer retains control over the goods or products, nor the ability to manage them as the owner would.
- The revenue is reasonably certain. If the contract allows the buyer the right to return goods under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer no longer has the right to return the goods (except in cases where the customer can return goods in exchange for other goods or services).
- The company has or will receive economic benefits from the sales transaction.
- The costs related to the sales transaction can be reliably determined.

Revenue from Service Provision

Revenue from service provision is recognized when all of the following conditions are met:

- The revenue is reasonably certain. If the contract stipulates that the buyer has the right to return the service under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer no longer has the right to return the service provided.
- The company has or will receive economic benefits from the service transaction.
- The portion of work completed at the reporting date can be determined.
- The costs incurred for the transaction and the costs to complete the service transaction can be determined..

In cases where the service is performed over multiple periods, revenue is recognized in the period based on the results of the portion of work completed by the end of the accounting period.

Revenue from Real Estate Sales

Revenue from the sale of real estate in which the Group is the developer is recognized when all of the following conditions are met:

- The real estate has been fully completed and handed over to the buyer, and the Group has transferred the risks and benefits associated with ownership of the real estate to the buyer.
- The Group no longer retains control over the real estate as the owner or has any management rights over the property.
- The revenue can be reasonably determined.
- The Group has received or will receive economic benefits from the real estate transaction.

1369 CONSTRUCTION JOINT STOCK COMPANY

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

- The costs related to the real estate transaction can be determined.

In cases where the customer has the right to complete the interior of the real estate, and the Group has completed the interior work according to the design, model, and requirements of the customer under a separate contract for interior completion, the revenue is recognized upon completion and handover of the shell of the building to the customer.

Interest Income

Interest income is recognized on the basis of time and the actual interest rate for each period.

Dividends and Profit Distribution

Dividends and profit distributions are recognized when the company is entitled to receive dividends or profit from capital contributions. Dividends received in the form of shares are only tracked in terms of the number of additional shares, and the value of the received shares is not recognized.

16. Construction Contracts

A construction contract is an agreement to build an asset or a group of assets that are closely related or dependent on each other in terms of design, technology, function, or basic purpose of use.

When the outcome of the contract can be reliably estimated:

For construction contracts where the contractor is paid based on the value of work performed, revenue and expenses related to the contract are recognized in accordance with the portion of work completed, as verified by the client and reflected in the issued invoices.

Changes in construction volume, compensation amounts, and other receipts are only recognized as revenue when agreed upon with the client.

When the outcome of the construction contract cannot be reliably estimated:

- Revenue is recognized only to the extent of contract costs incurred, with recovery of those costs being reasonably certain.
- Contract costs are recognized as expenses when incurred.

17. Borrowing Costs

Borrowing costs include interest on loans and other costs directly related to borrowings.

Borrowing costs are recognized as expenses when incurred. In cases where borrowing costs are directly related to the investment in the construction or production of qualifying assets that require a substantial period (more than 12 months) to be ready for use as intended or for sale, such costs are capitalized as part of the cost of the asset. For borrowings specifically used to construct fixed assets or investment properties, interest expenses are capitalized even if the construction period is less than 12 months. Income generated from the temporary investment of borrowings is deducted from the cost of the related asset.

18. Expenses

Expenses are amounts that reduce economic benefits and are recognized when the transaction occurs or when it is reasonably certain that an expense will occur in the future, regardless of whether payment has been made or not.

Expenses and the related revenue they generate must be recognized simultaneously under the matching principle. In cases where the matching principle conflicts with the prudence principle, expenses are recognized based on the nature and regulations of accounting standards to ensure that the transaction is fairly and reasonably reflected.

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

19. Corporate Income Tax

Corporate income tax expense includes current income tax and deferred income tax.

Current Income Tax

Current income tax is the tax payable based on taxable income. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses, as well as adjustments for non-taxable income and carried forward losses.

Deferred Income Tax

Deferred income tax is the income tax that will be payable or recoverable due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the tax bases used for income tax purposes. Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized only when it is probable that taxable profits will be available in the future to utilize the temporary differences that can be deducted.

The carrying amount of deferred tax assets is reviewed at the end of the financial year and will be reduced to the amount that is probable to be utilized based on available taxable profits. Deferred tax assets that have not been recognized previously are reviewed at the end of the financial year and are recognized when it is certain that sufficient taxable profits will be available to utilize the previously unrecognized deferred tax assets.

Deferred tax assets and deferred tax liabilities are determined based on the tax rates expected to apply in the year in which the asset is recovered or the liability is settled, based on the tax rates that are in effect at the end of the financial year. Deferred income tax is recognized in the profit and loss statement and is directly recorded in equity only when the tax relates to items recognized directly in equity.

Deferred tax assets and deferred tax liabilities are offset when:

- The Group has a legal right to offset current tax assets against current tax liabilities; and
- The deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority:
 - For the same taxable entity; or
 - The Group intends to settle the current income tax liabilities and recover current income tax assets on a net basis, or simultaneously, when the significant portions of deferred tax liabilities or assets are settled or recovered in future periods.

20. Related Parties

Parties are considered related if one party has the ability to control or significantly influence the other party in making financial and operational decisions. Parties are also considered related if they share joint control or significant mutual influence.

In considering the relationship of related parties, the substance of the relationship is given more importance than its legal form.

- (i) Land use fee for the investment and construction project of the Cultural, Sports, Education, and New Residential Center in Thai Hoc Commune, Binh Giang District.

Value Added Tax (VAT)

The company pays VAT using the credit method, with tax rates of 8% and 10%.

Import and Export Tax

The company declares and pays according to the Customs notification.

Corporate Income Tax

The company is required to pay corporate income tax on taxable income at a tax rate of 20%.

The determination of the corporate income tax payable by the company is based on the current tax regulations. However, these regulations change periodically, and tax provisions for various types of transactions may be interpreted in different ways. Therefore, the tax amount presented in the consolidated financial statements may change upon review by the tax authorities.

Other Taxes

The company declares and pays taxes in accordance with regulations.

VII. OTHER INFORMATION**1. Subsequent Events**

No other significant events have occurred after the end of the financial period from April 1, 2025 to June 30, 2025 that require adjustments to or disclosures in the Consolidated Financial Statements for the second quarter of 2025.

2. Credit Risk

Credit risk is the risk that a counterparty will not meet its contractual obligations, resulting in a financial loss for the Company.

The Company is exposed to credit risk from its business operations (mainly trade receivables) and financial activities (bank deposits, loans, and other financial instruments).

3. Trade Receivables

The Company mitigates credit risk by dealing only with counterparties with good financial standing, and its accounting staff regularly monitors receivables to expedite collections. Based on this approach and the fact that the Company's receivables are diversified among various customers, credit risk is not concentrated in any single customer.

4. Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risks associated with the Company's business activities include foreign currency risk and interest rate risk.

The sensitivity analyses presented below are based on the net debt position, assuming that the ratio of fixed-rate debt to floating-rate debt remains unchanged.

5. Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates.

The Company's interest rate risk mainly relates to cash, short-term deposits, and borrowings.

The Company manages interest rate risk by analyzing market conditions to secure the most favorable interest rates while remaining within its risk management limits.

1369 CONSTRUCTION JOINT STOCK COMPANY

Address: No 37, 38 Da Tuong street, Le Thanh Nghi ward, Hai Phong city.

CONSOLIDATED FINANCIAL STATEMENTS QUARTER II/2025

Notes to the Consolidated Financial Statements Quarter II/2025

The Company does not perform sensitivity analysis for interest rates because the risk from interest rate fluctuations at the reporting date is considered insignificant.
