2. Types of foreign exchange rate Transactions arising in foreign currency are converted at the exchange rate at the date of transaction. Balances of monetary items denominated in foreign currencies at the end of the

3. The principles for determining the actual interest rate (also called the effective interest rate) used to discount cash flows

4. Principle of cash and cash equivalents Cash and cash equivalents include cash on hand, time deposits, and short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

5. Principle of financial investment

a) Trading securities

DOMENAL JOINT STOCK COMPANY

Highway 30, Hamlet 1, Phong My Commune, Dong Thap Province,

Tax code:1400641835 - Tel: 0277.3890 711

b) Investments held to maturity Investments held to maturity include investments that the Company has the intention and ability to hold until maturity. Held-to-maturity investments include: term bank deposits (including bills and promissory notes), bonds, preference shares that the issuer is required to repurchase at a certain time in the future and held-to-maturity loans with the purpose of collecting interest periodically and other held-to-maturity investments.

Held-to-maturity investments are recognized starting from the date of purchase and are determined at their initial value based on the purchase price and costs related to the purchase transaction of the investments.

Interest income from held-to-maturity investments after the purchase date is recorded on the income statement on an accrual basis. Interest earned before the Company holds it is recorded as a deduction from the original price at the time of purchase.

Held-to-maturity investments are determined at cost less provision for doubtful debts.

Provision for bad debts of held-to-maturity investments is made according to current accounting regulations.

c) Loans Loans are determined at cost less provisions for bad debts. Provision for bad debts from the Company's loans is made in accordance with current accounting regulations.

d) Investments of subsidiary, joint-venture companies

d) Investments tools capital of other parties

e) Accounting methods for other transactions relating to financial investments

6. Accounting principles for debts receivable Debt receivable is the amount of money that can be recovered from customers or other entities. Receivables are presented at book value less provisions for doubtful

2- Principle of inventory recognition

- Principle of inventory recognition Inventory is determined on the basis of the lower of cost and net realizable value. The cost of inventory includes the cost of direct materials, direct labor and manufacturing overhead, if any, to bring the inventory to its present location and condition [for businesses Commercial activities: Original cost of inventory includes purchase costs and other costs directly related to the purchase of inventory]. The original cost of inventory is determined according to the weighted average method (either first-in, first-out or actual physical or retail price method in the case of goods). Net realizable value is determined by the estimated selling price less the estimated costs to complete the product and incurred marketing, sales and distribution costs.

- Method of calculating the value of inventory Average at the end of the period

- Method of accounting inventory

- Setting up of the inventory price decrease reserve method The Company's inventory price decrease reserve method is appropriated according to current accounting regulations. Accordingly, the Company is allowed to make provisions for devaluation of obsolete, damaged, poor quality inventory and in cases where the original price of the inventory is higher than the net realizable value at the end of the fiscal year. accountant

8. Principles of accounting and depreciation fixed assets, financial lease fixed assets, investment real property

- Principles for recognition of fixed assets Tangible fixed assets are presented at cost less accumulated depreciation.

The original cost of a tangible fixed asset includes the purchase price and all other costs directly related to bringing the asset into a ready-to-use state.

- Principles for recognition of Intangible fixed assets Land use rights: Intangible fixed assets represent the value of land use rights and are presented at cost less accumulated depreciation. Land use rights are allocated using the straight-line method based on the land use period. (This section is for descriptive purposes only) Intangible assets created internally by the business - Research and development costs (if applicable) Expenses for research activities are recorded as expenses of the fiscal year (operating period) in which those expenses actually arise.

Intangible assets created within the enterprise arising from the development stage are only recognized when the following conditions are met:

- Identifiable assets created (e.g. computer software and new manufacturing processes);
- Certainty of future economic benefits from that asset; and
- Asset development costs can be determined reliably.

Intangible assets created internally are amortized on a straight-line basis over their estimated useful lives. In cases where intangible assets created internally by the enterprise cannot be recognized, research and development costs are accounted for in profit or loss in the fiscal year (operating period) in which the costs arise.

- Principles for disclosing investment properties: Investment real estate includes land use rights, factories, and architectural objects held by the company for the purpose of profiting from rental or waiting for price increases. Investment real estate for lease is stated at cost less accumulated depreciation. Investment real estate awaiting price appreciation is presented at cost less impairment. The original cost of purchased investment real estate includes the purchase price and directly related costs such as related legal consulting service fees, registration tax and other related transaction costs. The original price of self-built investment real estate is the final settlement value of the project or directly related costs of the investment real estate. (This section is for descriptive purposes only)

Rental investment properties are depreciated using the straight-line method over their estimated useful lives of X years.

9. Accounting principles for Business Cooperation Contract

10. Principle of deferred corporate income tax

11. Accounting principle of prepaid expenses Prepaid expenses include actual expenses that have been incurred but are related to the results of production and business activities of many accounting periods. Prepaid expenses include prepayment of land rent, establishment costs and other prepaid expenses [For illustration purposes, edited to suit each business].

Land rent represents the amount of land rent that has been paid in advance. Prepaid land rent is allocated to the Income Statement on a straight-line basis corresponding to the lease period. (If the Company has a Land Use Rights Certificate, this can be accounted for as an intangible fixed asset).

Establishment costs include costs incurred in the process of establishing the Company before the date of issuance of the Investment Certificate and are assessed as having the potential to bring future economic benefits to the Company. Establishment costs are allocated to the Income Statement on a straight-line basis within three years from the date the Company officially comes into operation.

Other prepaid expenses include the value of tools, instruments, and small components issued for use, advertising costs and training costs incurred in the period before the Company officially goes into operation. and is considered likely to bring future economic benefits to the Company. These costs are capitalized in the form of prepayments and allocated to the Income Statement, using the straight-line method in accordance with current accounting regulations.

12. Accounting principles for liabilities

13. Principle of recognition of financial debts and Financial liabilities

14. Principles Recognized and capitalized borrowing costs

15. Principle of recognition of accrued expenses

16. Principle and methods of recognition of Provision for payables Provisions for payables are recognized when the Company has a present obligation as a result of a past event, and it is probable that the Company will have to pay the obligation. This. Provisions are determined on the basis of the Board of Directors' estimate of the costs necessary to settle this debt obligation at the end of the operating period.

DOMENAL JOINT STOCK COMPANY

Highway 30, Hamlet 1, Phong My Commune, Dong Thap Province,

Tax code:1400641835 - Tel: 0277.3890 711

17. Principles for recording unearned revenues

18. Principle of recording convertible bonds

19- Principle of capital recognition:

- Principle of recognition of paid-in capital by owners, equity surplus and other capital of owners:
- Principle of recognition of re-assessment asset defference:
- Principle of recognition of exchange rate difference:
- Principle of recognition of Undistributed profit:

20- Principle and method of revenues:

- Sales: Sales revenue is recognized when all five (5) of the following conditions are simultaneously met:

(a)The Company has transferred substantially all the risks and rewards associated with ownership of the products or goods to the buyer;

(b)The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;

(c) Revenue is determined with relative certainty;

(d) The Company will obtain economic benefits from the sales transaction; and

(e) Identify costs related to the sales transaction.

- Services sale: Revenue from a service provision transaction is recognized when the results of that transaction can be reliably determined. In case a service provision transaction involves multiple periods, revenue is recognized in the period according to the results of the work completed at the Balance Sheet date of that period. The result of a service provision transaction is determined when all four (4) following conditions are met:

(a) Revenue is determined with relative certainty;

(b) There is a possibility of obtaining economic benefits from the transaction providing that service;

(c) Determine the work completed at the balance sheet date; and

- Financial activities income: Deposit interest is recorded on an accrual basis, determined on the balance of deposit accounts and the applicable interest rate (if any and deposit interest is assessed as material).

Interest from investments is recognized when the Company has the right to receive the profit. (if any and profits from investments are assessed as material).

- Revenue from Construction contracts: Revenue from the Company's construction contracts is recorded according to the Company's accounting policy on construction contracts. When the outcome of a construction contract can be estimated reliably, revenue and costs related to the contract are recognized by reference to the stage of completion of the work at the balance sheet date. calculated as a percentage of the cost incurred for the completed work at the end of the accounting period compared to the total estimated cost of the contract, except in cases where this cost is not equivalent to the total estimated cost of the contract. Construction volume has been completed. This cost may include additional costs, compensation and contract performance bonuses as agreed with the customer.

When the outcome of a construction contract cannot be estimated reliably, revenue is only recognized to the extent of contract costs incurred whose reimbursement is relatively certain.

Other income

21. Accounting principles of revenue deductions

22. Accounting Principles for the cost price of goods sold

23. Accounting Principle for financial expenses

24. Accounting Principle for selling expense and enterprise administrative expense

25. The principle and method of recording current enterprise income tax, deferred enterprise income tax expense - Enterprise income tax represents the total value of the current tax payable and the deferred tax amount.

- The current tax amount payable is calculated based on taxable income for the year. Taxable income differs from pre-tax profit as reported in the income statement because taxable income does not include income or expenses that are taxable or deductible in other years (including including carry-forward losses, if any) and in addition does not include non-taxable or non-deductible items.
- Deferred income tax is calculated on the differences between the book value and the income tax base of asset or liability items on the financial statements and is recorded according to the Balance Sheet method. maths. Deferred tax liabilities must be recognized for all temporary differences and deferred tax assets are recognized only when it is probable that there will be sufficient future taxable profit to offset the difference. temporary deviation.
- Deferred income tax is determined at the tax rate expected to apply in the year the asset is recovered or the liability is settled. Deferred income tax is recognized in the income statement and recorded in equity only when the tax is related to items recorded directly in equity.
- Deferred tax assets and deferred tax liabilities are offset when the Company has a legally enforceable right to offset current tax assets against current tax liabilities and when the assets Deferred tax assets and deferred tax liabilities relate to corporate income taxes administered by the same tax authority and the Company intends to pay current income taxes on a net basis.
- The determination of the Company's income tax is based on current tax regulations. However, these regulations change from time to time and the final determination of corporate income tax depends on the inspection results of the competent tax authority

26. The principles and other accounting methods

V. The accounting policies applied in case enterprises do not meet the assumption of continuous operation

1. Long-term assets and long-term liabilities re-classified as short-term assets and short-term liabilities?
2. Rules for determining value of each type of assets and liabilities (according to net realizable value, recoverable value, fair value, current value, etc)
3. Financial Principles for:
 - Precision
 - Differences upon asset revaluation and exchange differences (recorded in the Balance sheet – if any)

No.: 94/2025/DMN

Dong Thap, October 28, 2025

*Re: Explain the profit difference more than 10%
quarter 3.2024 compared to quarter 3.2025*

**To: STATE SECURITIES COMMISSION
HANOI STOCK EXCHANGE**

In the financial report for the third quarter of 2025, the profit after corporate income tax decreased by more than 10% compared to the third quarter of 2024 as follows:

Indicators	3rd Quarter 2025	3rd quarter of 2024	Difference (increase/decrease)
1. Profit after corporate income tax of the separate financial statements	3.802.261.959	8.250.394.577	- 53,91%
2. Profit after corporate income tax of consolidated financial statements	5.471.347.471	9.040.784.682	- 39,48%

Explanation:

In the third quarter of 2024, the Company took advantage of the large amount of raw materials in stock that was more than the short-term production needs and the cost price was lower than the market price, so it sold a part of the raw materials to increase profits.

In the third quarter of 2025, due to unfavorable weather conditions and the price of aquatic feed products decreased according to market supply and demand while the price of input materials for production did not decrease, the profit in the third quarter of 2025 decreased by more than 10% compared to the same period in 2024.

Sincerely!

To:

- As respectfully sent
- Board of Directors,
- Supervisory Board for report
- Information disclosure
- Company office

GENERAL DIRECTOR

Nguyễn Thanh Hà
