Explanation:

The above data shows that the consolidated business results for the third quarter of 2025 increased by 584% (with after-tax profit changing by more than 10%) compared to the same period in 2024, mainly due to the following reasons:

The Company had a project that was accepted, finalized, and recognized for revenue and corresponding cost of goods sold. Previously, a provision for inventory devaluation had been made for this project; upon acceptance, the Company reversed this provision, resulting in an increase in profit compared to the same period last year.

The Company commits that the information published above is true and is responsible before the law.
