- Nhon Trach The Ky 21 Investment Co., Ltd
 - Main business activities: Developing an eco-tourism area.

II. Accounting period, currency used in accounting

1. **Fiscal year:** he Company's fiscal year follows the calendar year, commencing on January 1 and ending on December 31 annually
2. **Accounting curent:** The financial statements are prepared and presented in Vietnamese Dong (VND)

III. Applied Accounting Standards and Regime

1. **The applied accounting regime:** The applied accounting regime: The Company adopts the Vietnamese Accounting System in accordance with the guidance under Circular No. 200/2014/TT-BTC, issued by the Ministry of Finance of Vietnam on December 22, 2014, along with subsequent amendments, supplements, and other relevant legal regulations
2. **Statement of Compliance with Accounting Standards and Accounting Regime**
The Company has prepared and presented its financial statements in accordance with the Vietnamese Accounting Standards and relevant legal regulations. The financial statements fairly and honestly present the Company's financial position, business performance, and cash flows.

The selection of figures and information disclosed in the Notes to the Financial Statements is based on the materiality principle and follows the guidance in Vietnamese Accounting Standard No. 21 – "Presentation of Financial Statements."

IV. Applied Accounting Policies.

1. Recognition Principles for Cash and Cash Equivalents

Cash includes cash on hand and demand deposits at banks. Cash equivalents are short-term investments with a maturity of no more than three months from the date of investment, which are easily convertible into a known amount of cash with an insignificant risk of changes in value at the reporting date.

2. Foreign Currency Transactions

Transactions in currencies other than VND are translated into VND at the actual exchange rate at the transaction date. Monetary assets and liabilities denominated in foreign currencies as of the reporting date are revalued at the exchange rates announced by the bank at the balance sheet date.

All foreign exchange differences arising during the year and from year-end revaluations are recognized in financial income or expenses for the year.

3. Accounting for Financial Investments

a) Held to maturity investment:

- Recorded at historical cost.
- Basis for determining impairment losses: assessed recoverability:

b) Loans

- Recorded at historical cost.
- Basis for making provision for doubtful debts: assessment of uncollectible receivables

c) Investments in Subsidiaries, Joint Ventures, and Associates

- Subsidiaries, joint ventures, and associates are determined based on the ownership percentage
- Investments in these entities are recorded at historical cost
- Basis for recognizing impairment losses: financial statements of subsidiaries, joint ventures, and associates

d) Investments in Equity Instruments of Other Entities:

- Recorded at historical cost.
- Basis for recognizing impairment losses: financial statements of the invested entities

4. Accounting for Receivables

- Receivables are presented in the financial statements at their carrying amounts, which include trade receivables and other receivables, net of provisions for doubtful debts
- The provision for doubtful debts represents the portion of receivables that the Company expects to be uncollectible at the reporting date. Any increase or decrease in the provision balance is recorded as an expense in the administrative expenses section of the income statement

5. Principles of accounting for inventories:

Principles of Inventory Recognition

Inventory is recognized at cost (-) net of provision for devaluation and provision for obsolete or impaired inventor

Determination of Inventory Cost:

- Real estate inventory as land use rights: Includes purchase costs and other directly related expenses incurred to bring the inventory to its current location and condition
- Work-in-progress costs of projects: Includes infrastructure investment costs, land clearance and compensation costs, and land use rights costs incurred during project implementation

Provision for Inventory Devaluation

A provision for inventory devaluation is recognized when the net realizable value of inventory is lower than its cost. Net realizable value is determined as the estimated selling price minus the

estimated costs of completion and the estimated selling expenses. The amount of inventory devaluation provision is the difference between the cost of inventory and its lower net realizable value. This provision is established for each inventory item where the cost exceeds the net realizable value.

6. Principles of Recognition and Depreciation of Fixed Assets, Finance Leases, and Investment Properties

a) Accounting Principles for Tangible and Intangible Fixed Assets

- Tangible and intangible fixed assets are recorded at historical cost less accumulated depreciation
- The historical cost of fixed assets includes the purchase price and directly attributable costs necessary to bring the asset into use
- Expenditures on acquisitions, upgrades, and improvements of fixed assets are capitalized as an increase in the historical cost of the asset, whereas maintenance and repair costs are recorded as expenses in the current year
- When an asset is sold or disposed of, its historical cost and accumulated depreciation are written off, and any resulting gains or losses from disposal are recognized in the business results.
- Fixed asset depreciation is calculated using the straight-line method over the estimated useful life as follows:

Machinery & Equipment	2 – 7 years
Vehicles	3-8 years
Management Tools	3 – 6 years
Accounting Software	3 years

b) Accounting Principles for Investment Properties

- **Recognition Principle:** Investment properties are recorded at historical cost less accumulated depreciation. The historical cost of investment properties includes all cash or cash-equivalent expenditures incurred or the fair value of exchanged assets to acquire the investment property up to the point of purchase or completion of construction
- **Cost of Acquired Investment Properties:** Includes the purchase price and directly related costs, such as legal advisory service fees, registration taxes, and other related expenses
- **Subsequent Expenditures:** Costs incurred after initial recognition of investment properties are recognized as expenses in the period incurred unless these costs are expected to generate additional future economic benefits beyond the initially assessed level, in which case they are capitalized as an increase in the historical cost of the investment property.
- **Disposal of Investment Properties:** When an investment property is sold, its historical cost and accumulated depreciation are written off, and any resulting gains or losses are recognized in the income statement for the period.
- **Depreciation Method:** Investment properties are depreciated using the straight-line method based on their estimated useful life.
- **Estimated Useful Life of Investment Properties :**

Buildings & Structures	6 – 25 years
Land Use Rights (long-term, stable)	Not depreciated

7. Business Cooperation Contracts

The Company is engaged in the business operation of the Tuổi Trẻ Office Building (Yoco Building) located at 41 Nguyễn Thị Minh Khai, Phường Sai Gon, Ho Chi Minh City. This building was jointly invested in and developed by the Company and Tuổi Trẻ Newspaper, under the Company's management and operation, with each party contributing 50% of the capital

The Company also cooperates with Nam Long Investment Corporation in the Camellia residential project, with respective capital contributions of 40% and 60%. As per the agreement, this project is under the Company's control and management, and after-tax profits will be distributed based on the capital contribution ratios.

Accounting Treatment for Business Cooperation Contracts under the Company's Control and Management :

- Capital contributions received from partners are recorded under "Other Long-term Payables" in the Balance Sheet. If the capital contribution is due for repayment within the next 12 months, it is classified as "Other Short-term Payables."
- All revenue and expenses related to the business cooperation activities are recognized in the Company's Income Statement.
- Profit shares allocated to partners under these contracts are recorded as a Financial Expense in the Company's Income Statement.

8. Appropriation of Funds

As stipulated in the Company's Charter, post-tax profits are allocated to various funds, including the Reward and Welfare Fund, which is appropriated at a rate of 5% of net profit.

9. Principles of Deferred Corporate Income Tax Accounting

a) Principles for Accounting for Deferred Tax Assets

- The carrying amount of deferred corporate income tax assets is reviewed at the end of the financial year. It must be reduced to the extent that sufficient taxable profit is not expected to be available to allow the realization of part or all of the deferred tax assets. Previously unrecognized deferred tax assets are reassessed at the end of the financial reporting period and recognized if there is sufficient taxable profit to utilize these deferred tax assets.
- Deferred tax assets and deferred tax liabilities are determined based on the tax rates expected to apply in the period when the asset is recovered or the liability is settled, using the tax rates and tax laws in effect at the end of the financial year
- The Company offsets deferred tax assets and deferred tax liabilities only when the taxable entities have a legally enforceable right to offset current tax assets against current tax liabilities, and when the deferred tax assets and deferred tax liabilities relate to the corporate income tax of the same taxable entity and are administered by the same tax authority.

b) Principles for Accounting for Deferred Tax Liabilities

- Deferred corporate income tax is determined for temporary differences at the financial year-end between the taxable base of assets and liabilities and their carrying amounts in the financial statements
- Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, tax loss carryforwards, and unused tax incentives when it is probable that sufficient taxable profit will be available in the future to utilize these deductible temporary differences, tax losses, and unused tax incentives
- Deferred corporate income tax is recognized in the income statement unless it relates to an item recorded directly in equity, in which case, the deferred tax is also recognized directly in equity.

10. Principles of Prepaid Expense Accounting

- Prepaid expenses at the Company include actual expenses incurred that relate to the business performance of multiple accounting periods
- **Method of Amortization:** Prepaid expenses are allocated to operating expenses on a straight-line basis over the relevant periods. The allocation period is determined based on the nature and extent of each type of expense:
 - o **Short-term prepaid expenses:** Amortized within 12 months.
 - o **Long-term prepaid expenses:** Amortized over a period from 12 to 36 months

11. Principles of Accounting for Liabilities

- Liabilities are recognized at their original cost and not lower than the obligation to be settled.
- The Company classifies liabilities into accounts payable to suppliers, internal payables, and other payables based on the nature of the transaction or the relationship between the Company and the creditor
- Liabilities are tracked in detail based on payment terms, creditors, and other relevant factors as required for the Company's management
- At the financial reporting date, the Company recognizes a payable immediately when there is sufficient evidence indicating that a loss is likely to occur, in accordance with the principle of prudence

12. Principles of Accrued Expense Recognition

- Accrued expenses include project costs incurred during the reporting period but not yet paid. These expenses are recognized based on reasonable estimates of the amounts payable according to contracts and agreements

13. Principles of Equity Recognition

- **Owner's contributed capital** is recorded based on the actual contributed amount
- **Share premium** is recorded as the difference between the issuance price and the par value of issued shares
- **Profit distribution and dividend policy** are determined in accordance with the resolutions approved at the Annual General Meeting of Shareholders (AGM)

14. Principles and Methods for Revenue and Other Income Recognition

- **Principles and Methods for Recognizing Service Revenue**
 - + Revenue from service transactions is recognized when the outcome of the transaction can be reliably estimated. If the service transaction spans multiple periods, revenue is recognized based on the portion of work completed as of the balance sheet date.
 - + Service revenue is recognized when all four (4) of the following conditions are met:
 1. Revenue is reasonably certain. If a contract allows the buyer to return the purchased service under specific conditions, revenue is only recognized when those conditions no longer exist and the buyer is no longer entitled to return the service.
 2. The Company has received or will receive economic benefits from the service transaction.
 3. The portion of work completed as of the balance sheet date can be determined.
 4. The costs incurred and the costs required to complete the service transaction can be measured reliably.
 - + If the contract outcome cannot be reliably determined, revenue is recognized only to the extent that the recognized costs are recoverable.
- **Principles and Methods for Recognizing Financial Revenue**
 - + Financial revenue includes interest income, dividends, profit-sharing, and other financial activities.
 - + **Interest income** is recognized on an accrual basis using the effective interest rate for each period.
 - + **Dividends and profit-sharing** are recognized when the shareholder has the right to receive dividends, or the capital-contributing party has the right to receive profit distribution.

+ If a previously recognized revenue amount becomes uncollectible or uncertain, the uncollectible portion must be recorded as an expense in the current period rather than as a reduction of revenue.

15. Principles of Cost of Goods Sold (COGS) Accounting

- COGS reflects the cost value of products, goods, services, and investment properties sold during the period, as well as related costs of real estate business activities and other expenses recognized as COGS or as a reduction of COGS in the reporting period.
- COGS is recognized at the time of the transaction or when there is a reasonably certain likelihood of incurring the cost in the future, regardless of whether payment has been made.
- COGS and revenue are recognized simultaneously, following the matching principle.
- Any abnormal cost overruns beyond normal consumption levels are immediately recognized as COGS under the principle of prudence

16. Principles of Financial Expense Accounting

- Financial expenses include: Profit-sharing expenses in joint ventures; provision for impairment of financial investments, other financial expenses.
- Financial expenses are recognized based on the actual incurred amount in the period and when they can be reliably determined with sufficient supporting evidence

17. Principles and Methods of Recognizing Current and Deferred Income Tax Expenses

- Current and Deferred Income Tax Expenses are determined based on taxable income and the applicable corporate income tax rate for the current year
- Deferred Income Tax Expenses are determined based on deductible temporary differences, taxable temporary differences, and the applicable corporate income tax rate
- No offsetting is made between current Deferred Income Tax Expenses expenses and deferred Deferred Income Tax Expenses expenses.
