2- Types of exchange rates applied in accounting

3- Principle of determining the effective interest rate (effective interest rate) used to discount cash flow

4- Principle of recognition of sums and cash equivalents.

4.1. Principle of recognition of sums and cash equivalents.

Nguyên tắc xác định các khoản tương đương tiền: Căn cứ vào các chứng khoán ngắn hạn có thời gian thu hồi hoặc đáo hạn không quá 3 tháng kể từ ngày khóa sổ kế toán lập báo cáo.

4.2. Phương pháp chuyển đổi các đồng tiền khác ra đồng tiền sử dụng trong kế toán.

Economic operations arising in foreign currency are converted into Vietnamese Dong at the exchange rate at the time of transaction and payment. At the end of the year, monetary items of foreign currency origin are converted at the average interbank exchange rate announced by the State Bank of Vietnam on the end of the accounting year.

Actual exchange differences arising during the period and exchange differences resulting from the revaluation of the balance of foreign currency items at the end of the year are carried over into revenue or financial expenses during the financial year.

5- Accounting principles for financial investments.

5.1. Business securities; Securities investments, other investments at the time of reporting, if:

- Have a recovery or maturity of no more than 3 months from the date of purchase of that investment considered as "money equivalent".

- Have a capital recovery period of less than 1 year or within 1 business cycle classified as a short-term asset.

- Have a capital recovery period of more than 1 year or more than 1 business cycle classified as a long-term asset.

5.2. Investments held to maturity;

5.3. Loans;

5.4. Investments in subsidiaries; Joint ventures and associates;

Investments in subsidiaries and affiliated companies are accounted for according to the cost method. Net profits are divided from subsidiaries and affiliated companies if they arise after the investment date recorded in the income statement. Other amounts divided (other than net profit) are treated as recoveries of investments and recorded as deductions from investment cost.

5.5. Investments in capital instruments of other entities;

5.6. Accounting methods for other transactions involving financial investments.

6- Accounting principles for receivables: Accounts receivable are tracked in detail according to each object and collection

7- Inventory recognition principles:

7.1. Inventory recognition principle: Inventory is calculated at cost. Where the net realisable value is less than the cost, it shall be calculated in terms of the net realisable value. Cost of inventory includes: purchase costs, processing costs, and other directly related costs incurred to obtain inventory at the current location and state.

7.2. Method of calculating the value of inventories: The value of closing inventories shall be determined according to the weighted average method.

7.3. Inventory accounting method: The company applies a regular declaration method to account for inventory.

7.4. Method of establishing provisions for depreciation of inventories: The provision for depreciation of inventories made at the end of the year is the amount of the difference between the original cost of inventories which is greater than their net realizable value.

8- Principles for recording and depreciating fixed assets, financial lease fixed assets and investment real estate:

- Principles for recording fixed assets (tangible, intangible, financial lease);

Fixed assets are recorded at cost. In the economic contract table, fixed assets are reflected according to 3 indicators: full price, accumulated wear and tear and residual value.

- Method of depreciation of fixed assets (tangible, intangible, financial lease).

- The cost of fixed assets includes the purchase price and costs directly related to putting the asset into operation. Procurement, improvement and refurbishment costs are included in fixed asset procurement costs and maintenance and repair costs are included in business results

- When assets are sold in liquidation, the original price and accumulated depreciation are written off and any profits/losses incurred as a result of the liquidation are included in the operating results

Apply the straight-line depreciation method to gradually subtract the cost of fixed assets over the estimated useful life. The estimated usage time in accordance with the instructions according to Circular No. 45/2013/TT-BTC dated April 25, 2013 is as follows:

+ Houses, architectural objects	from 05 years to 20 years
+ Land use rights	from 20 years to 43 years
+ Machinery and equipment	from 03 years to 15 years
+ Transmission means of transport	from 04 years to 12 years
+ Management tools and instruments	from 03 years to 10 years
+ Software	from 03 years to 08 years

Fixed assets pending disposal without depreciation.

9- Accounting principles for business cooperation contracts

10- Deferred EIT accounting principles:

11- Principles of accounting for upfront costs and capitalization of other costs:

11.1- Prepaid costs

- Prepaid expenses relating only to the current financial year are recorded as short-term prepaid expenses.

- The following expenses incurred during the financial year but related to multiple accounting periods are accounted for in long-term prepaid expenses and gradually allocated to business results:

- + Tools and export tools are of great value.
- + Exchange losses of the capital construction investment period.

11.2. Other costs: Other costs for basic construction investment activities during the period will be capitalized on fixed assets invested in that period.

11.3. Methodology for the allocation of prepaid expenses:

- Prepaid expenses if only related to the current financial year are recorded in production and business expenses during the financial year.

- The calculation and allocation of long-term upfront costs to production and business costs for each accounting period is based on the nature and level of each cost type to choose a reasonable allocation method and criteria.

- Methods and timing of the allocation of goodwill.

12- Accounting principles for liabilities: Accounts payable are tracked in detail for each object and payment term

13- Principles for recording loans and financial lease liabilities:

14- Principles for recording and capitalizing borrowing costs:

15- Principles for recognition of costs payable.

Actual expenses that have not been incurred but are deducted in advance from production and business costs during the period to ensure that actual costs incurred do not cause mutations in production and business fees on the basis of ensuring the principle of compatibility between revenue and costs.

16-Principles and methods for recording provisions payable.**17- Unrealized revenue recognition principles:****18- Recording principles for convertible bonds:****19- Equity recognition principle:****19.1. Principle of recognition of owner's capital contribution, share capital surplus, convertible bond options, other capital of the owner.**

The owner's investment capital is recorded according to the owner's actual capital contribution.

Dividends payable to shareholders are recorded as accounts payable in the Economic Contracts Table after the dividend distribution notice of the Company's Board of Directors.

19.2. Principle of appropriation of funds from after-tax profits

Profits after corporate income tax after approval by the Board of Directors are deducted from funds according to the Company's Charter and current legal regulations.

20-Revenue recognition principles and methods:**20.1. Sales revenue is recorded when the following 5 conditions are simultaneously satisfied:**

- Much of the risks and benefits associated with ownership of the product or goods have been transferred to the buyer.
- The company no longer holds the right to manage the goods such as the owner of the goods or control of the goods.
- Revenue is determined with relative certainty.
- The company has collected or will reap economic benefits from the sales transaction.
- Determine costs related to sales transactions.

20.2. Revenue from the provision of services is recognised when the results of such transactions are reliably determined. In case the provision of services involves many periods, revenue will be recorded during the period according to the results of the work completed on the date of preparing the Technical College Table of that period. The result of a service provision transaction is determined when the following 4 conditions are simultaneously satisfied:

- Revenue is determined with relative certainty.
- Be able to derive economic benefits from the transaction of providing that service.
- Determine the part of the work completed on the date of preparing the Technical College Table.
- Determine the costs incurred for the transaction and the costs to complete the transaction to provide that service.

The completed portion of the service delivery work is determined according to the completed work assessment method.

20.3. Financial operating revenue revenue from interest, royalties, dividends, divided profits and other financial operating revenue is recognized when the following two conditions are simultaneously satisfied:

- Revenue is determined with relative certainty.
- Be able to derive economic benefits from such a transaction.

Dividends and divided profits are recognized when the Company is entitled to receive dividends or is entitled to receive profits from capital contributions.

21- Accounting principles for revenue deductions:**22- Principles of accounting for cost of goods sold****23- Financial cost accounting principles**

Financial expenses are recognized in the income statement as the total financial expenses incurred during the period (not offset by financial operating revenue)

24- Principles of accounting for sales costs and business management costs**25. Principles and methods of recording current corporate income tax costs and deferred corporate income tax costs.****26- Other accounting principles and methods.**
