- Business location 2 – Sametel Joint Stock Company: Factory + Office Building 3 and Factory 4 at An Thien Ly Company Limited, Bau Xeo Industrial Park, Song Trau Commune, Trang Bom District, Dong Nai Province.

II. FISCAL YEAR, CURRENCY USED IN ACCOUNTING

1. Fiscal year

The Company's fiscal year begins on January 1 and ends on December 31 of each year.

2. Currency used in accounting

The currency used in accounting records is Vietnamese Dong (VND)

III. ACCOUNTING STANDARDS AND REGIMES APPLIED

1. Applicable accounting regime

The Company applies the Enterprise Accounting Regime according to Circular 200/2014/TT-BTC dated December 22, 2014 and Circular 53/2016/TT-BTC dated March 21, 2016 on amending and supplementing Circular No. 200/2014/TT-BTC issued by the Ministry of Finance.

2. Declaration on compliance with Accounting Standards and Accounting Regime

The Company has applied Vietnamese Accounting Standards and documents guiding the Standards issued by the State. Financial statements are prepared and presented in accordance with all provisions of each standard, circulars guiding the implementation of standards and the current applicable Accounting Regime.

IV. ACCOUNTING POLICIES APPLIED

1. Types of exchange rates applied in accounting

Economic transactions arising in foreign currencies are converted into Vietnamese Dong at the actual exchange rate at the time of the transaction. At the end of the year, when re-evaluating foreign currency items classified as assets, the applicable exchange rate is the foreign currency buying rate, and foreign currency items classified as liabilities are the foreign currency selling rate of the commercial bank where the enterprise regularly conducts transactions at the time of preparing the Financial Statements.

Actual exchange rate differences arising during the year and exchange rate differences due to revaluation of balances of monetary items at the end of the year are transferred to financial revenue or expenses during the year.

2. Principles of recording cash and cash equivalents

Amounts include: cash, bank deposits, money in transit.

Cash equivalents are short-term investments with maturity not exceeding 3 months that are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value since the date of acquisition of the investment at the reporting date.

3. Principles of accounting for financial investments

Investment in equity instruments of other entities

Investments in equity instruments of other entities reflect equity investments but the Company does not have control, joint control or significant influence over the investee.

NOTES TO THE FINANCIAL STATEMENTS (continued)

Investments in equity instruments of other entities are stated at cost less provisions for investment diminution.

4. Principles of recognition of trade receivables and other receivables

Trade receivables, prepayments to vendors, and other receivables at the reporting date, if:

- With a collection or payment period of less than 1 year (or within a business production cycle) are classified as Short-term Assets.
- With a recovery or payment period of more than 1 year (or over a business production cycle) are classified as Long-term Assets.

Provision for doubtful debts is made for receivables that are overdue for twelve (12) months or more, or for receivables that are unlikely to be paid by the debtor due to liquidation, bankruptcy or other difficulties.

5. Principles of inventory recording

Inventories are stated at cost. Where the net realizable value is lower than the cost price, the net realizable value shall be used. The cost of inventories comprises purchase costs, conversion costs and other directly attributable costs incurred in bringing the inventories to their present location and condition.

Inventory value is determined by the weighted average method.

Inventories are accounted for using the perpetual inventory method.

The provision for inventory devaluation is the difference between the original cost of inventory and their net realizable value.

6. Principles of recording and depreciating fixed assets

Tangible fixed assets and intangible fixed assets are recorded at original cost. During use, tangible fixed assets and intangible fixed assets are recorded at original cost, accumulated depreciation and residual value.

Leased fixed assets are initially recorded at fair value or present value of minimum lease payments (excluding VAT) and initial direct costs incurred in connection with the leased fixed assets. During use, leased fixed assets are recorded at original cost, accumulated depreciation and residual value.

Depreciation is calculated using the straight-line method. The estimated depreciation period is as follows:

- Houses, buildings	05 - 15 years
- Machinery and equipment	02 - 12 years
- Means of transport	06 - 14 years
- Office equipment	03 - 08 years
- Land use rights	47 years
- Computer software	03 years

The original cost of fixed assets and depreciation period are determined according to Circular No. 45/2013/TT-BTC dated April 25, 2013 and Circular No. 147/2016/TT-BTC dated October 13, 2016. of the Ministry of Finance on guidance on the management, use and depreciation of fixed assets.

NOTES TO THE FINANCIAL STATEMENTS (continued)

Intangible fixed assets

Land use rights are land rental fees that the Company pays once for many years and is granted a Land Use Rights Certificate. This land use right is amortized over the land lease term (47 years).

7. Principles of recognition and capitalization of borrowing costs

Spend fee Go get a loan Okay take note receive enter spend fee product export , terrible i in year When play born, apart from spend fee get a loan link mandarin direct next arrive job head private build construction or product export talent product d in spread Okay tiny into price treat belong to talent product there (Okay capital h o a) When Have enough the thing condition monster definition in Ink cartridge Plan Vietnamese math Male number 16 "Spend fee that 's it " .

8. Principles of recording and allocating prepaid expenses

Prepaid expenses only related to production and business costs during the year are recorded as short-term prepaid expenses and included in production and business costs during the year.

The calculation and allocation of long-term prepaid expenses into production and business expenses for each accounting period is based on the nature and extent of each type of expense to select a reasonable allocation method and criteria. Prepaid expenses are gradually allocated into production and business expenses using the straight-line method.

9. Principles for recording trade payments and other payables

Trade payables, other payables at reporting date, if:

- Payment terms of less than 1 year or within a business production cycle are classified as short-term debt.
- Payment terms of more than 1 year or one business production cycle are classified as long-term debt .

10. Principles of recording equity

Owner's equity is recorded at the actual capital contributed by the owner.

Share capital surplus is recorded at the larger difference between the actual issuance price and the par value of shares when issuing shares for the first time, issuing additional shares or reissuing treasury shares.

Dividends payable to shareholders are recorded as payable in the Company's Balance Sheet after the dividend announcement by the Company's Board of Directors.

Undistributed profit after tax is the profit from the business's operations after deducting (-) adjustments due to retroactive application of changes in accounting policies and retroactive adjustment of material errors of previous years.

NOTES TO THE FINANCIAL STATEMENTS (continued)

11. Principles and methods of revenue recognition

Sales revenue

Sales revenue is recognized when all of the following conditions are met:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- Revenue is determined relatively reliably;
- The company has obtained or will obtain economic benefits from the sale transaction;
- Identify costs associated with sales transactions.

Service revenue

Revenue from rendering of services is recognised when the outcome of the transaction can be estimated reliably. Where the provision of services relates to several periods, revenue is recognised in each period according to the results of the work completed at the date of the Balance Sheet of that period. The outcome of a service provision transaction is recognised when the following conditions are satisfied:

- Revenue is determined relatively reliably;
- Ability to obtain economic benefits from the transaction of providing that service;
- Determine the completed work on the date of the Balance Sheet;
- Determine the costs incurred for the transaction and the costs to complete the transaction to provide that service.

The portion of service work completed is determined by the method of assessing completed work.

Financial revenue

Revenue arising from interest, royalties, dividends, shared profits and other financial revenue is recorded when both (2) of the following conditions are satisfied:

- It is possible to obtain economic benefits from the transaction;
- Revenue is determined relatively certainly.

Dividends and profits are recognized when the Company is entitled to receive dividends or profits from capital contributions.

12. Principles of accounting for cost of goods sold

Cost of goods sold reflects the cost of products, goods and services sold during the period.

The provision for inventory price reduction is included in the cost of goods sold based on the quantity of inventory and the difference between the net realizable value being less than the original cost of inventory. When determining the volume of inventory with price reduction requiring provision, the accountant must exclude the volume of inventory for which a sales contract has been signed (with a net realizable value not lower than the book value) but has not been transferred to the customer if there is certain evidence that the customer will not abandon the contract.

NOTES TO THE FINANCIAL STATEMENTS (continued)

13. Principles and methods of recording financial expenses

Expenses recorded in financial expenses include:

- Costs or losses related to financial investment activities;
- Cost of lending and borrowing;
- Losses due to changes in exchange rates of transactions involving foreign currencies;
- Provision for reduction in securities investment value.

The above amounts are recorded at the total amount incurred during the period, without offsetting against financial revenue.

14. Principles of accounting for sales costs and business management costs

Selling costs reflect the actual costs incurred in the process of selling products, products, goods, and service provision, including costs of offering, introducing products, advertising products, sales commissions, product warranty costs, goods (except construction activities), preservation, packaging, transportation costs, etc.

Business management costs reflect the general management costs of the enterprise, including costs for salaries of employees in the business management department (salaries, wages, allowances, etc.); social insurance, health insurance, union fees, unemployment insurance for business management employees; costs of office materials, labor tools, depreciation of fixed assets used for business management; land rent, business license tax; provision for bad debts; outsourced services (electricity, water, telephone, fax, property insurance, fire and explosion insurance, etc.); other cash expenses (reception, customer conferences, etc.) .

15. Principles and methods of recording current corporate income tax expenses and deferred corporate income tax expenses

Current corporate income tax expense is determined on the basis of taxable income and corporate income tax rate in the current year.

Deferred corporate income tax expense is determined on the basis of deductible temporary differences, taxable temporary differences and corporate income tax rates.

16. Earnings per share

Basic earnings per share is calculated by dividing the profit after corporate income tax (after setting aside bonus and welfare funds) allocated to shareholders owning common shares of the company by the weighted average number of common shares outstanding during the year.

17. Department report

Segment reporting includes a business segment or a geographical segment.

Business segment: A distinguishable component of an entity that is engaged in providing an individual product or service or a group of related products or services and that is subject to risks and returns that are different from those of other business segments.

Geographical segment: A distinguishable component of an entity that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments.

NOTES TO THE FINANCIAL STATEMENTS (continued)

18. Financial instruments

Initial notes

Financial assets

At the date of initial recognition, financial assets are recorded at cost plus that are directly attributable to the acquisition of the financial assets.

The Company's financial assets include cash, short-term deposits, short-term receivables, other receivables and investments.

Financial liabilities

On the date of initial recognition, financial liabilities are recorded at cost less transaction costs directly attributable to the issuance of that financial liability.

The Company's financial liabilities include trade payables, other payables and loans.

Offsetting of financial instruments

Financial assets and financial liabilities are offset against each other and presented at net value in the Balance Sheet when and only when the Company:

- Has a legal right to set off the amount recorded; and
- Intend to settle on a net basis or to realise the asset and settle the liability simultaneously.

Re-evaluate after initial recording

Currently, there are no regulations on revaluation of financial instruments after initial recognition.

19. Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

In considering any related party relationship, attention is directed more to the substance of the relationship than to the legal form.
