NOTES TO THE FINANCIAL STATEMENTS

First quarter 2026

I CHARACTERISTICS OF BUSINESS OPERATIONS

1 Forms of capital ownership :

Vicem Packaging But Son Joint Stock Company was established according to Decision No. 431/QĐ-BXD, dated April 14, 2003, by the Minister of Construction, regarding the "Conversion of the Nam Dinh Cement Packaging Enterprise under But Son Cement Company - Viet nam Cement Corporation, into a Joint Stock Company." The company was renamed Vicem But Son Packaging Joint Stock Company according to the resolution of the shareholders' meeting on March 30, 2011, and the 9th amendment of the company's business registration certificate, No. 0600312071, issued by the Department of Planning and Investment of Nam Dinh Province on September 6, 2024.

The main shareholder of the company is Viet nam Cement Industry Corporation, holding 34.29% of the shares.

The company's headquarters is located at Km 2, Van Cao Street, Truong Thi ward, Ninh Binh Province.

Total number of employees of the company as at March 31, 2026: 394 People

2 Business field: Industrial manufacturing

3 Business sector: Manufacturing, trading of various types of packaging, products made from plastic, paper

II ACCOUNTING PERIOD, CURRENCY USED IN ACCOUNTING

1 Accounting year: starts on January 1 and ends on December 31

2 Currency used in accounting: VND (Vietnamese Dong)

III APPLICABLE ACCOUNTING STANDARDS AND REGIME

1 Applicable accounting regime :

The company applies the Vietnamese accounting regime issued under Circular No. 99/2025/TT/BTC dated October 27, 2025, by the Ministry of Finance, which provides guidelines on the corporate accounting regime.

2 Declaration of compliance with accounting standards and regime:

The financial statements are prepared and presented in accordance with the Vietnamese Accounting Standards and Regulations.

3 The accounting method applied: General journal on computer

IV ACCOUNTING POLICIES APPLIED

The Company's interim financial statements are prepared in accordance with the guidelines of Circular No. 99/2025/TT-BTC dated October 27, 2025, issued by the Ministry of Finance. The Company's most recent annual financial statements (for the year 2025) are prepared in accordance with Decision No. 200/2014/QĐ-BTC dated December 22, 2014, issued by the Ministry of Finance.

1 Principle for recognizing cash and cash equivalents

Transactions arising in foreign currency are converted into Vietnamese đồng at the exchange rate applicable at the time the transaction occurs. At the time of preparing the financial statements, monetary items denominated in foreign currencies are converted at the foreign exchange buying rate of the commercial bank where the Company holds its foreign currency accounts.

The actual exchange rate differences arising during the period and the exchange rate differences from the revaluation of monetary item balances at the end of the year are recognized as financial income or financial expenses in the financial year.

Cash and cash equivalents include cash on hand and demand deposits at banks (without fixed terms).

Short-term investments with a maturity of no more than 3 months, which are easily convertible into cash and involve minimal risk in converting to cash from the purchase date of the investment at the reporting date.

2 Principle for accounting receivables

Receivables are tracked in detail by their original maturity, in their functional currency, and by each individual debtor, reflecting their realizable value after provisions for doubtful debts have been made.

The entities for provision include customers with overdue balances according to contracts or those who are unable to pay. This does not include customers who are overdue but are currently making payments or have commitments to settle the debts in the near future, in accordance with the guidelines provided in Circular No. 228/2009/TT-BTC dated December 7, 2009, issued by the Ministry of Finance.

3 Principle for recognizing inventory

Inventory is valued at cost. If the net realizable value is lower than the cost, the inventory must be valued at the net realizable value. The cost of inventory includes purchase costs, processing costs, and other directly related costs incurred to bring the inventory to its current location and condition.

The value of inventory is determined using the weighted average cost method.

Inventory is accounted for using the perpetual inventory method.

The provision for inventory impairment at the end of the year is the difference between the cost of inventory and its net realizable value.

4 Principle for accounting and depreciation of fixed assets

Tangible fixed assets and intangible fixed assets are presented at their original cost, less accumulated depreciation or amortization.

The acquisition cost of an asset includes the purchase price and all other costs directly related to bringing the asset to its ready-to-use condition.

The acquisition cost of self-constructed tangible fixed assets includes construction costs, actual production costs incurred, and costs for installation and trial runs.

The principle for accounting costs incurred after initial recognition (such as upgrades, renovations, maintenance, and repairs) is that they are recognized in the carrying value of the asset

Depreciation is calculated using the straight-line method, in accordance with Circular 45/2013/TT-BTC dated April 25, 2013, issued by the Ministry of Finance, with the estimated depreciation periods as follows:

- | | |
|-------------------------|---------------|
| - Buildings, structures | 05 - 25 years |
| - Machinery, equipment | 05 - 12 years |
| - Vehicles | 06 - 10 years |
| - Office equipment | 03 - 05 years |
| - Management software | 05 years |

5 The accounting principle for prepaid expenses

Prepaid expenses that relate only to production and business expenses of the current fiscal year are recognized as short-term prepaid expenses and are included in the production and business expenses of the fiscal year.

Prepaid expenses are gradually allocated to production and business expenses, including the cost of large-value tools and supplies. The allocation period for prepaid expenses does not exceed 3 years.

6 The accounting principle for payables

The principle for monitoring payables in detail by each debtor, maturity period, contract, and functional currency. Payables are recognized at no less than the amount due for payment.

7 The principle for recognizing borrowings

Borrowings are classified as short-term debt, current portion of long-term debt, and long-term debt. Each loan is tracked in detail by debtor, maturity period, contract, and functional currency.

8 The principle for recognizing and capitalizing borrowing costs

Borrowing costs are recognized as production and business expenses in the period when incurred, except for borrowing costs directly related to the construction or production of qualifying assets, which are capitalized as part of the cost of the asset (capitalized) in accordance with the Accounting Standard "Borrowing Costs".

9 Principle for recognizing accrued expenses

Actual expenses that have not yet occurred but are accrued in production and business expenses during the period ensure that when these expenses are incurred, they do not cause sudden fluctuations in production and business costs, based on the matching principle between revenue and expenses. When these expenses are incurred, if there is a difference from the accrued amount, accounting adjustments are made to increase or decrease expenses corresponding to the difference.

10 Principle for recognizing owner's equity

Owner's equity is recognized based on the actual capital contributed by the owner.

Share premium is recognized as the positive or negative difference between the actual issuance price and the par value of shares when issuing shares for the first time, issuing additional shares, or reissuing treasury shares.

Other owner's capital is recorded as the remaining value between the fair value of assets donated or granted to the business by other organizations or individuals, after deducting any taxes payable (if any) related to these donated assets; and amounts supplemented from business operating results.

Treasury shares are shares issued by the Company and subsequently repurchased. Treasury shares are recognized at their actual cost and are presented on the Balance Sheet as a deduction from owner's equity.

Dividends payable to shareholders are recognized as a liability on the Company's Balance Sheet after the Board of Directors announces the dividend distribution.

Undistributed after-tax profit is the profit from the company's operations after deducting adjustments due to the retrospective application of accounting policy changes and corrections of material errors from previous years. Profits are distributed according to the Annual General Meeting of Shareholders' resolution, in accordance with Decree No. 09/2004/ND-CP dated February 5, 2009, and Circular No. 11/2007/TT-BTC dated 2/8/2007.

11 Principles and methods for revenue recognition

Sales revenue

Sales revenue is recognized when the following conditions are met:

- Revenue is recognized based on the invoice issued by the sales department;
- The revenue is determined to be relatively certain;
- The company has received or will receive economic benefits from the sales transaction;
- The costs related to the sales transaction can be determined.

Revenue from providing services.

Revenue from providing services is recognized when the outcome of the transaction can be reliably determined. In cases where the service involves multiple periods, revenue is recognized in the period based on the work completed as of the balance sheet date of that period. The outcome of the service transaction is determined when the following conditions are met:

- The revenue is determined to be relatively certain;
- There is a likelihood of receiving economic benefits from the service transaction;
- The portion of work completed as of the balance sheet date can be determined;
- The costs incurred for the transaction and the costs to complete the service transaction can be determined.

The portion of the service work completed is determined using the method of assessing the work completed.

Revenue from financial activities

Revenue arising from interest, royalties, dividends, profits from equity investments, and other financial activity revenues is recognized when both of the following conditions are met:

- There is a likelihood of receiving economic benefits from the transaction;
- The revenue is determined to be relatively certain.

Dividends and profits from investments are recognized when the company has the right to receive the dividends or profit from its investments.

12 The accounting principle for revenue reductions

Revenue reductions include: trade discounts, sales discounts, and sales returns.

Revenue reductions that occur before the issuance of the financial statements are recorded as a reduction of revenue in the financial statements of the reporting period (previous period). If they occur after the issuance of the financial statements, they are recorded as a reduction of revenue in the period in which they arise (subsequent period).

13 The accounting principle for the cost of goods sold

The accounting principle for the cost of goods sold must ensure the matching principle with revenue.

Direct material costs, labor costs, and production overheads that exceed normal levels are not included in the value of inventory but are directly recognized as part of the cost of goods sold.

Import taxes and environmental protection taxes that have been included in the purchase costs, when refunded upon sale, are recorded as a reduction in the cost of goods sold.

14 The principle and method for recognizing financial expenses

The expenses recognized as financial expenses include:

- Costs or losses related to financial investment activities;
- Borrowing costs and costs related to obtaining loans;
- Losses due to foreign exchange rate fluctuations of transactions related to foreign currencies;
- Provision for the decline in the value of securities investments.

The above expenses are recognized based on the total amount incurred during the period and are not offset against financial activity revenue.

15 Selling expenses and administrative expenses

The actual expenses incurred by the company in the sales process are fully recognized, including: salaries and related expenses for the sales department, transportation, loading and unloading, storage, packaging, advertising, promotion, product presentation costs ...

The general administrative expenses of the company are fully reflected, including: salaries and related expenses for management personnel, office materials, depreciation of fixed assets used for office purposes, taxes, fees, provisions for doubtful debts, outsourced services, other external services ...

16 The principle and method for recognizing current corporate income tax expense and deferred corporate income tax expense.

Current corporate income tax expense is determined based on taxable income and the corporate income tax rate for the current year.

Deferred corporate income tax expense is determined based on temporary differences that are deductible, taxable temporary differences, and the corporate income tax rate.
