NOTES TO THE FINANCIAL STATEMENTS

1 - CHARACTERISTICS OF BUSINESS OPERATIONS

1.1 Forms of capital ownership.

The Nam Dinh Water Supply Company was established according to Decision 655/QDUB dated December 23, 1992, of the People's Committee of Nam Ha Province.

According to Decision No. 3088/QD-UBND dated December 13, 2007, of the People's Committee of Nam Dinh province "on approving the plan to convert Nam Dinh Water Supply Company into a one-member limited liability company," the company became Nam Dinh Clean Water Business One-Member Limited Liability Company.

On July 19, 2017, according to Decision No. 1616/QD-UBND of Nam Dinh province approving the equitization of Nam Dinh Water Supply Business Company Limited, the company was transformed into a joint-stock company with the following main contents:

Nam Dinh Water Supply Joint Stock Company operates under Business Registration Number 0600008000 dated December 29, 2017, issued by the Department of Planning and Investment.

Company Name: NAM DINH WATER SUPPLY JOINT STOCK COMPANY;

- Trade name: Nam Dinh Water Supply joint stock company;
- The charter capital is as follows: VND 343,117,480,000, with a par value of 10,000 shares, of which the State holds 49.5%, and the strategic shareholders include:
 - SETFIL Water Treatment Equipment Joint Stock Company: 5.03%
 - Tien Phong Plastic Joint Stock Company: 13.5%
 - Nam Dinh Tourism Joint Stock Company: 18.5%
 - The remaining shareholders hold a stake: 13.47%
- Company head: 30 Cu Chinh Lan Street, Nam Dinh Ward, Ninh Binh Province

1.2 Main business activities

The company operates in the following fields:

- Water production and distribution;
- Installation of water pipes and construction of domestic water supply facilities;
- Installation of water technology and pipelines;
- Construction of water supply systems, civil and industrial works;
- Consulting on the design of water supply projects;
- Production and business of bottled purified drinking water;
- Manufacturing and trading of supplies and chemicals for the water industry.

2. ACCOUNTING YEAR AND CURRENCY USED IN ACCOUNTING

1. Accounting period

The company's accounting year begins on January 1st and ends on December 31st each year.

2. Currency used in accounting

The currency used in accounting records and financial statement preparation is the Vietnamese Dong (symbol "VND").

3. APPLICABLE ACCOUNTING STANDARDS AND REGULATIONS

3.1 Accounting system applied

The company applies the Corporate Accounting System issued under Circular No. 99/2025/TT-BTC dated October 27, 2025, of the Ministry of Finance guiding the corporate accounting system.

3.2 Accounting methods applied

Accounting record keeping method: General journal.

3.3 Statement on compliance with Vietnamese accounting standards and accounting regulations

In preparing and presenting these financial statements, the Company has complied with the Vietnamese Accounting Standards and Accounting Regulations issued by the Ministry of Finance that are in effect.

4. APPLICABLE ACCOUNTING POLICIES

4.1 Principles and methods for converting other currencies:

Principles for determining cash equivalents: They are determined on the basis of short-term investments with a recovery or maturity period of no more than 3 months, which are easily convertible into a defined amount of cash and do not involve significant conversion risks from the date of this Financial Statement.

Principles and methods for converting other currencies into the currency used in accounting: Foreign currency transactions are converted using the exchange rate on the date of the transaction. Assets and liabilities denominated in foreign currency at the end of the accounting period are converted to VND using the interbank exchange rate published by the State Bank of Vietnam on the same day. Exchange rate differences arising from this conversion are recorded in the Income Statement.

4.2 Accounting policy for inventory

Inventory valuation principle: *Inventory is valued at its original cost.* If the net realizable value is lower than the original cost, then the valuation is based on the net realizable value. The original cost of inventory includes: purchase costs, processing costs, and other directly related costs incurred to bring the inventory to its current location and condition.

The original cost of purchased inventory includes: the purchase price, non-refundable taxes, transportation, handling, and storage costs during the purchasing process, and other costs directly related to the purchase of the inventory.

These are costs not included in the original cost of inventory:

- Trade discounts and price reductions due to goods not meeting specifications or quality standards.
- Costs of raw materials, labor, and other production and business expenses exceed normal levels.
- Inventory storage costs necessary for the next production process and inventory storage costs incurred during the purchasing process.
- Cost of goods sold.
- Business management costs.

Principles for determining inventory value: *Average cost method.*

Inventory accounting method: *Perpetual inventory method.*

The Company's provision for inventory devaluation is established in accordance with current accounting regulations. Accordingly, the Company is permitted to establish a provision for devaluation of obsolete, damaged, or substandard inventory if the actual value of the inventory is higher than its net realizable value at the end of the accounting period.

4.3 Trade receivables and other receivables

Trade receivables and other receivables are reflected at their original cost and the difference between the original cost and the recoverable value. The recoverable value is the estimated recoverable value, less any estimated costs incurred in collecting those debts.

The difference between the original cost and the recoverable value of all receivables at the reporting date is reflected in the "Provision for doubtful receivables" section.

4.4 Recording and Depreciation of Fixed Assets

Principles for recognizing tangible fixed assets: Fixed assets are recorded at their original cost and other directly related expenses incurred by the Company up to the point the fixed asset is ready for use. During the period of use, fixed assets are recorded at their original cost, accumulated depreciation, and remaining value.

Methods of depreciating tangible fixed assets: Depreciation of tangible fixed assets is carried out using the straight-line method, with the depreciation period as stipulated in Decision No. 45/2013/QĐ-BTC dated April 25, 2013, on the management, use, and depreciation of fixed assets, and Circular No. 147/2016/TT-BTC dated October 13, 2016, of the Ministry of Finance amending and supplementing Circular 45/2013/TT-BTC. The specific depreciation periods are as follows:

Type of asset	Depreciation period (years)
Houses, buildings	06- 30
Machinery and equipment	04-10
Transportation	10- 25
Management equipment and tools	05-10

Intangible fixed assets and depreciation: Intangible fixed assets, such as computer software, are presented at their original cost less accumulated depreciation.

Intangible fixed assets are allocated using the straight-line method based on their estimated useful life, specifically as follows:

	<u>Number of depreciation years</u>
Software	5 years

4.5 Borrowing Costs

Borrowing costs are recognized as operating expenses in the period in which they are incurred, except for borrowing costs related to capital construction or work-in-progress that qualify for capitalization as stipulated in Vietnamese Accounting Standard No. 16 "Borrowing Costs".

4.6 Principles for recognizing payable expenses

Accrued expenses are actual costs that have not yet been incurred but are included in the production and business costs for the period for the cost-bearing entities to ensure that when these payments are actually incurred, they do not cause sudden spikes in production and business costs. The accounting of accrued expenses into production and business costs for the period is carried out according to the matching principle between revenue and expenses incurred during the period.

4.7 Principles for recognizing provisions for liabilities

Recording principles:

A provision for liabilities is recognized when the following conditions are met:

The company has a present obligation (legal or joint obligation) resulting from an event that has already occurred;

A decline in economic benefits may occur, leading to a requirement to settle debt obligations;

Provide a reliable estimate of the value of that debt obligation.

Provisions for liabilities typically include:

Provisions for company restructuring liabilities;

Provision for product warranty claims;

Provisions for liabilities in high-risk contracts where the mandatory costs incurred for contractual obligations exceed the expected economic benefits from the contract.

Other provisions for liabilities.

4.8 Principles for recognizing equity

Owner's equity contribution: Owner's equity is recorded based on the actual amount of capital contributed by the shareholders.

Profit distribution

Profits after corporate income tax are distributed to shareholders after deducting funds in accordance with the Company's charter and legal regulations, and after approval by the General Meeting of Shareholders.

4.9 Principles of Revenue Recognition.

- ***Record revenue from the sale of goods and provision of services.:*** Revenue from sales and services is recognized when the following conditions are met simultaneously:
 - The majority of the risks and benefits associated with ownership of a product, goods, or service have been transferred to the buyer;
 - The company no longer holds the right to manage the goods as the owner or the right to control the goods;
 - Revenue is determined with relative certainty;
 - The company has obtained or will obtain economic benefits from the sales transaction;
 - Identify the costs associated with the sales transaction.
- ***Financial operating revenue:*** Revenue arising from interest on deposits and other financial operating revenues is recognized when both of the following two (02) conditions are met simultaneously:
 - There is potential to obtain economic benefits from that transaction;
 - Revenue is determined with relative certainty.

4.10 Financial costs

Financial expenses recorded include expenses or losses related to financial investment activities, borrowing costs, joint venture and associate capital contribution costs, short-term securities transfer losses, securities sale transaction costs, etc. Provisions for impairment of securities investments, losses arising from the sale of foreign currency, and exchange rate losses are also included.

4.11 Taxes

Corporate income tax represents the total value of current and deferred tax liabilities.

The current tax payable is calculated based on taxable income for the year. Taxable income differs from net profit as presented in the Income Statement because it excludes taxable or deductible income or expenses from other years (including carry-forward losses, if any) and also excludes non-taxable or non-deductible items.

The determination of the company's income tax is based on current tax regulations. However, these regulations change from time to time, and the final determination of corporate income tax depends on the results of an audit by the competent tax authority.

Currently, the company applies two corporate income tax rates: 10% and 20%. The 10% corporate income tax rate applies to income from clean water production activities, in accordance with Official Letter No. 4185/CT-TNHT dated June 24, 2019, from the Nam Dinh Tax Department regarding corporate income tax incentives for businesses operating in the socialized sector with income from socialized activities. The 20% corporate income tax rate applies to income from other activities.

The VAT (value added tax) on clean water is 5%, in accordance with current regulations.

Other taxes are applied in accordance with current tax laws in Vietnam.
