6. **Statement regarding the comparability of information in consolidated financial statements.**
corresponding figures from the previous period are comparable to the figures for this period.

II. FISCAL YEAR, CURRENCY USED IN ACCOUNTING**1. Fiscal year**

The Group's fiscal year begins on January 1st and ends on December 31st each year.

2. The currency used in accounting.

The currency used in accounting is the Vietnamese Dong (VND) because the majority of transactions are conducted in VND.

III. APPLICABLE ACCOUNTING STANDARDS AND REGULATIONS**1. Accounting system applied**

The Group applies Vietnamese accounting standards, the Vietnamese Enterprise Accounting System issued under Circular No. 99/2025/TT-BTC dated October 27, 2025 guiding the Enterprise Accounting System, Circular No. 202/2014/TT-BTC dated December 22, 2014 guiding the preparation and presentation of consolidated financial statements, and other circulars guiding the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of consolidated financial statements.

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

2. Statement on compliance with accounting standards and accounting regulations

The Board of Directors assures that it has complied with the requirements of Vietnamese accounting standards, the Vietnamese Enterprise Accounting System issued under Circular No. 99/2025/TT-BTC dated October 27, 2025, Circular No. 202/2014/TT-BTC dated December 22, 2014, as well as other circulars guiding the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of consolidated financial statements.

IV. APPLICABLE ACCOUNTING POLICIES

1. Basis for preparing consolidated financial statements

Consolidated financial statements are prepared on an accrual accounting basis (except for information relating to cash flows).

2. Consolidated facility

Consolidated financial statements include the consolidated financial statements of the parent company and the financial statements of its subsidiaries. A subsidiary is an entity under the control of the parent company. Control exists when the parent company has the ability to directly or indirectly influence the financial and operational policies of the subsidiary in order to obtain economic benefits from these activities. When determining control, consideration is given to potential voting rights arising from options or debt instruments and equity instruments convertible into common stock at the end of the accounting period.

The business results of subsidiaries acquired or sold during the period are presented in the consolidated statement of business results from the date of acquisition or to the date of sale of the investment in that subsidiary.

The financial statements of the parent company and its subsidiaries used for consolidation are prepared for the same accounting period and apply consistent accounting policies to transactions and events of the same type under similar circumstances. If a subsidiary's accounting policy differs from the consistent accounting policy applied within the Group, the subsidiary's financial statements will be appropriately adjusted before being used for the preparation of consolidated financial statements.

Balances on balance sheets between companies within the same Group, intercompany transactions, and unrealized intercompany gains arising from these transactions must be completely eliminated. Unrealized losses arising from intercompany transactions are also eliminated unless the costs of such losses are unrecoverable.

Non-controlling shareholder interests represent the share of profit or loss in the business results and net assets of a subsidiary not held by the Group and are presented in a separate item on the consolidated Statement of Income and on the consolidated Balance Sheet (as part of equity). Non-controlling shareholder interests include the value of non-controlling shareholder interests at the initial business combination date and the non-controlling shareholder's share of changes in equity since the business combination date. Losses incurred at the subsidiary are allocated proportionally to the non-controlling shareholder's share, even if the loss exceeds the non-controlling shareholder's share in the subsidiary's net assets.

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

3. Foreign currency transactions

Transactions denominated in foreign currency are converted using the exchange rate on the date the transaction occurs. The balances of monetary items denominated in foreign currency at the end of the accounting period are converted using the exchange rate on that date.

Exchange rate differences arising during the period from foreign currency transactions are recognized as financial income or financial expenses. Exchange rate differences resulting from the revaluation of monetary items denominated in foreign currency at the end of the accounting period, after offsetting increases and decreases, are recognized as financial income or financial expenses.

The exchange rate used to convert transactions denominated in foreign currency is the actual exchange rate at the time the transaction occurs. The actual exchange rate for foreign currency transactions is determined as follows:

- For foreign exchange contracts (spot foreign exchange contracts, forward contracts, futures contracts, options contracts, swap contracts): the exchange rate agreed upon in the foreign exchange purchase and sale contract between the Group and the bank.
- For capital contributions or receipts: the foreign exchange buying rate of the bank where the Group opens an account to receive capital from investors on the date of capital contribution.
- For accounts receivable: the foreign currency buying rate of the commercial bank where the Group designates the customer to make payment at the time the transaction occurs.
- For liabilities: the cross exchange rate of the Vietnamese Dong against several foreign currencies used to calculate export and import taxes is announced by the State Bank of Vietnam.
- For asset purchases or expenses paid immediately in foreign currency (not through accounts payable): the foreign currency buying rate of the commercial bank where the Group makes the payment.

The exchange rate used to revalue the balances of monetary items denominated in foreign currency at the end of the accounting period is determined according to the following principle:

- For foreign currency deposits in banks: the foreign currency buying rate of the bank where the Group maintains its foreign currency account.
- For monetary items denominated in foreign currency that are classified as other assets: the foreign currency buying rate of Vietnam Joint Stock Commercial Bank for Industry and Trade (the Group Bank with which it regularly conducts transactions).
- For monetary items denominated in foreign currencies classified as liabilities: the cross exchange rate of the Vietnamese Dong against certain foreign currencies used for calculating export and import taxes is published by the State Bank of Vietnam.

4. Cash and cash equivalents

Cash includes cash and demand deposits. Cash equivalents are short-term investments with a recovery period of no more than 3 months from the date of investment, which are easily convertible into a defined amount of cash and have no conversion risk at the time of reporting.

5. Financial investments

Investments held until maturity

An investment is classified as held to maturity when the Group intends and is able to hold it to maturity. The Group's only held-to-maturity investments are time deposits held for the purpose of earning periodic interest.

Investments held to maturity are initially recognized at cost, including the purchase price and any transaction-related expenses. After initial recognition, these investments are recognized at their recoverable value. Interest income from investments held to maturity after the date of purchase is recognized in the Statement of Income on an accrual basis. Interest earned before the Group acquires the investment is deducted from the cost at the time of purchase.

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

When there is conclusive evidence that part or all of the investment may be unrecoverable and the amount of loss can be reliably determined, the loss is recognized as a financial expense in the period and directly reduces the investment value.

Investments in affiliated companies

An associate company is a business in which the Group has significant influence but no control over its financial and operational policies. Significant influence is demonstrated by the right to participate in making decisions about the financial and operational policies of the investee company, but without controlling those policies.

Investments in associates are recognized using the equity method. Accordingly, investments in associates are presented in the consolidated financial statements at the initial investment cost, adjusted for changes in the associate's net asset value after the investment date. If the Group's interest in the associate's loss is greater than or equal to the book value of the investment, the investment value presented in the consolidated financial statements is zero unless the Group has obligations to make payments on behalf of the associate.

The financial statements of associate companies are prepared for the same accounting period as the consolidated financial statements of the Group. When the accounting policies of the associate company differ from the accounting policies applied uniformly within the Group, the associate company's financial statements will be appropriately adjusted before being used in the preparation of the consolidated financial statements.

Unrealized gains and losses arising from transactions with associated companies are excluded in proportion to the Group's share when preparing consolidated financial statements.

Investments in equity instruments of other entities.

Investments in equity instruments of other entities include investments in equity instruments where the Group does not have control, co-control, or significant influence over the investee.

Investments in equity instruments of other entities are initially recognized at cost, including the purchase price or capital contribution plus direct costs associated with the investment. Dividends from periods prior to the investment being acquired are accounted for as a reduction in the value of the investment itself. Dividends and profits from periods after the investment is acquired are recognized as revenue. Dividends received in the form of shares are only tracked by the number of additional shares received, not the value of the shares received.

Provisions for losses on investments in equity instruments of other entities are set aside as follows:

- For investments in listed stocks or investments where the fair value can be reliably determined, provisions are based on the market value of the stock.
- For investments whose fair value cannot be determined at the time of reporting, provisions are made based on the losses of the invested entity, with the provision amount equal to the difference between the actual invested capital of the owners and the equity at the end of the accounting period multiplied by the ratio of the Group's charter capital to the total actual contributed charter capital in other entities.

Increases or decreases in the provision for investment losses in equity instruments of other entities that need to be set aside at the end of the accounting period are recognized as financial expenses.

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

6. Accounts receivable

Accounts receivable are presented at their book value less any provisions for doubtful accounts.

The classification of receivables into customer receivables and other receivables is done according to the following principle :

- Accounts receivable reflect trade-related receivables arising from purchase-sale transactions between the Group and buyers that are independent entities of the Group .
- Other receivables reflect non-commercial receivables that are not related to purchase or sale transactions.

Provisions for doubtful receivables are established for each doubtful receivable based on the projected level of potential loss.

Increases or decreases in the balance of provisions for doubtful receivables that need to be set aside at the end of the accounting period are recorded as business management expenses.

7. Inventory

Inventory is recorded at the lower of its original cost and its net realizable value.

The original cost of inventory is determined as follows:

- Materials and goods: include the purchase cost and other directly related costs incurred to bring the inventory to its current location and condition.
- Work-in-progress production costs include the cost of main raw materials, labor costs, and other directly related costs.
- Finished goods: includes the cost of raw materials, direct labor, and directly related manufacturing overhead costs, allocated based on normal operating levels.

The cost of goods sold is calculated using the weighted average method and accounted for using the perpetual inventory method.

Net realizable value is the estimated selling price of inventory in the normal course of business less the estimated costs to complete and the estimated costs necessary for its sale.

Provisions for inventory devaluation are established for each inventory item whose original cost exceeds its net realizable value. For work-in-progress services, the provision for devaluation is calculated separately for each service type with its own price. Increases or decreases in the balance of the inventory devaluation provision to be established at the end of the accounting period are recorded in the cost of goods sold.

8. Pending costs

Deferred expenses include actual expenses incurred but related to the business results of multiple accounting periods. The Group's deferred expenses mainly consist of tools, equipment, fixed asset repair costs, and costs for replacing and installing meters for customers. These deferred expenses are allocated over the prepaid period or the period during which the corresponding economic benefits are generated from these expenses.

Tools and equipment

Tools and equipment already in use are allocated to costs using the straight-line method, with an allocation period of no more than 3 years.

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

Costs of repairing fixed assets

One-time repair costs for fixed assets of significant value are allocated to expenses using the straight-line method, with an allocation period not exceeding 3 years.

The cost of replacing and installing the meter for the customer.

The cost of replacing and installing meters for customers is allocated to expenses using the straight-line method over a 3-year allocation period.

9. Tangible fixed assets

Tangible fixed assets are represented at their original cost less accumulated depreciation. The original cost of tangible fixed assets includes all expenses incurred by the Group to acquire the fixed asset up to the point it is ready for use. Expenses incurred after initial recognition are only added to the original cost of the fixed asset if these expenses are certain to increase future economic benefits from the use of the asset. Expenses that do not meet this condition are recognized as production and business expenses in the period.

When tangible fixed assets are sold or liquidated, the original cost and accumulated depreciation are written off, and any gains or losses arising from the liquidation are recognized as income or expenses in the period.

Tangible fixed assets are depreciated using the straight-line method based on their estimated useful life. The number of depreciation years for different types of tangible fixed assets is as follows:

<u>Type of fixed asset</u>	<u>No. 5</u>
Houses, buildings	05 – 50
Machinery and equipment	05 – 20
Transportation and transmission	05 – 30
Management equipment and tools	03 – 10
Other tangible fixed assets	05 – 40

10. Intangible fixed assets

fixed assets are represented at their original cost less accumulated depreciation.

The initial cost of intangible fixed assets includes all costs incurred by the Group to acquire the asset up to the point it is ready for use. Costs related to intangible fixed assets incurred after initial recognition are recognized as production and business expenses in the period unless these costs are directly related to a specific intangible fixed asset and increase the economic benefits derived from that asset.

When intangible fixed assets are sold or liquidated, the original cost and accumulated depreciation are written off, and any gains or losses arising from the liquidation are recognized as income or expense in the period.

Group 's intangible fixed assets include:

Land use rights

Land use rights encompass all actual costs incurred by the Group directly related to the land used, including: money spent to acquire land use rights, costs for compensation, land clearance, land leveling, registration fees, etc. Land use rights are depreciated using the straight-line method over 20-49 years.

Map planning costs

The cost of map planning is depreciated using the straight-line method over 25 years.

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

Computer software program

Costs associated with computer software programs are not a component of the related hardware that is capitalized. The original cost of a computer software program is the total cost incurred by the Corporation up to the point the software is put into use. Computer software programs are depreciated using the straight-line method over a period of 2 to 10 years.

11. Investment properties

The investment property is a factory owned by the Group . Used for the purpose of generating rental income. Investment property for rental purposes. It is expressed at original cost less accumulated depreciation. The original cost of an investment property is the total cost incurred by the Group or the fair value of the amounts given in exchange for acquiring the investment property up to the time of purchase or completion of construction.

Costs related to investment properties that arise after initial recognition are recognized as expenses, unless these costs are likely to cause the investment property to generate more future economic benefits than initially assessed, in which case they are added to the original cost.

When investing in real estate When an asset is sold, its original cost and accumulated depreciation are written off, and any resulting profit or loss is accounted for as income or expense in the period.

The conversion of owner-occupied or inventory real estate to investment real estate only occurs when the owner ceases to use the property and begins leasing it to another party or upon completion of the construction phase. The conversion of investment real estate to owner-occupied or inventory real estate only occurs when the owner begins to use the property or begins to develop it for sale. The conversion of investment real estate to owner-occupied or inventory real estate does not alter the original cost or residual value of the property at the date of conversion.

Investment properties used for lease are depreciated using the straight - line method based on their estimated useful life . The depreciation period for the factory building is 25 years.

12. Construction in progress costs

Construction in progress costs reflect the costs directly related (including relevant interest expenses in accordance with the Group 's accounting policy) to assets under construction and machinery and equipment being installed. These assets are recorded at their original cost and are not depreciated. This is to cover the costs associated with the production, leasing , and management of the fixed assets, as well as the costs related to ongoing repairs.

13. Business consolidation and goodwill

The business combination is accounted for using the purchase method. The cost of the business combination includes: the fair value at the date of the exchange of the assets being exchanged, any liabilities incurred or assumed, and any equity instruments issued by the Group in exchange for control of the acquired entity, and any costs directly related to the business combination. The acquired assets, identifiable liabilities, and contingent liabilities incurred in the business combination are recognized at their fair value at the date of acquisition of control.

For multi-stage business combination transactions, the business combination cost is calculated as the sum of the cost of the investment at the date of acquisition of control of the subsidiary plus the cost of the investment from previous exchanges revalued at fair value at the date of acquisition of control of the subsidiary. The difference between the revalued price and the original cost of the investment is recognized in the operating results if, prior to the date of acquisition of control, the Group had no significant influence over the subsidiary and the investment is presented using the cost method . If,

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

prior to the date of acquiring control, the Group had significant influence and the investment was presented using the equity method, the difference between the revaluation price and the equity value of the investment is recognized in the operating results, and the difference between the equity value of the investment and the original cost of the investment is recognized directly in the " Undistributed Net Profit " item on the consolidated balance sheet.

The excess of the business combination cost over the Group 's share in the net fair value of identifiable assets, liabilities, and contingent liabilities recognized at the date of acquisition of control of the subsidiary is recognized as goodwill . If the Group's share in the net fair value of identifiable assets, liabilities, and contingent liabilities recognized at the date of acquisition of control of the subsidiary exceeds the business combination cost, the excess is recognized in operating results.

Goodwill is allocated to expenses using the straight-line method. When there is evidence that the loss of goodwill is greater than the allocated amount, the amount allocated for the period is the loss incurred.

The non-controlling shareholder's interest at the initial business combination date is determined on the basis of the non-controlling shareholder's share in the fair value of the recognized assets, liabilities, and contingent liabilities.

14. Liabilities and payables

Liabilities and accrued expenses are recognized for amounts due in the future relating to goods and services received. Accrued expenses are recognized based on reasonable estimates of the amounts due.

The classification of payables into accounts payable to suppliers, accrued expenses, and other payables is done according to the following principle:

- Accounts payable to suppliers reflect trade-related liabilities arising from transactions involving the purchase of goods, services, and assets, where the supplier is an independent entity from the Group .
- Accrued expenses reflect amounts payable for goods and services received from sellers or provided to buyers but not yet paid due to the lack of invoices or insufficient accounting records, as well as amounts payable to employees for vacation pay and production and business expenses that must be accrued in advance.
- Other payables reflect non-commercial liabilities that are not related to transactions involving the purchase, sale, or provision of goods or services.

Liabilities and expenses are classified as short-term and long-term on the consolidated balance sheet based on the remaining term at the end of the accounting period.

15. Provisions for liabilities

Provisions are recognized when the Group has a present liability (legal or joint liability) resulting from an event that has occurred, the settlement of which would likely result in a reduction of economic benefits, and the value of that liability can be reliably estimated.

If the effect of time is material, the provision will be determined by discounting the future amount required to settle the debt obligation at the pre-tax discount rate and reflecting current market assessments of the time value of money and the specific risks of that debt. The increase in the provision due to the passage of time is recognized as a financing expense.

The Group 's provisions for liabilities only cover the costs of periodic repair and maintenance of fixed assets. The provision for periodic repair and maintenance costs is based on the fixed asset repair

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

and maintenance plan. If the actual repair and maintenance costs are higher than the provisioned amount, the difference is fully accounted for as an expense. If the actual repair and maintenance costs are less than the provisioned amount, the difference is accounted for as a reduction in expenses.

16. Equity

Owner's equity contribution

Owner's equity is recorded based on the actual amount of capital contributed by the company's shareholders.

Share premium

Share premium is recognized as the difference between the issue price and the par value of shares upon initial or supplementary issuance, the difference between the reissue price and the book value of treasury shares, and the equity component of convertible bonds upon maturity. Direct costs related to supplementary share issuance and reissue of treasury shares are recorded as a reduction in share premium.

17. Profit distribution

Profits after corporate income tax are distributed to shareholders after provisions for funds have been set aside in accordance with the Company's Articles of Association and legal regulations, and after approval by the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-monetary items within undistributed after-tax profits that may affect cash flow and dividend payment capacity, such as gains from the revaluation of contributed assets, gains from the revaluation of monetary items, financial instruments, and other non-monetary items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders and when the Board of Directors announces the dividend payment.

18. Record revenue and income

Revenue from the sale of goods and finished products.

Revenue from the sale of goods and finished products is recognized when the following conditions are simultaneously met:

- The corporation has transferred most of the risks and benefits associated with ownership of the goods and products to the buyer.
- The corporation no longer holds the right to manage or control the goods and products as the owner of those goods and products.
- Revenue is determined with relative certainty. When the contract stipulates that the buyer has the right to return the purchased goods or products under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer no longer has the right to return the goods or products (except in cases where the customer has the right to return the goods or products in exchange for other goods or services).
- The corporation has received, or will receive, economic benefits from the sale transaction.
- Identify the costs associated with the sales transaction.

Revenue from providing services

Revenue from providing services is recognized when the following conditions are simultaneously met:

- Revenue is relatively certain. When the contract stipulates that the buyer has the right to return the purchased service under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer no longer has the right to return the service provided.

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

- The corporation has already obtained, or will obtain, economic benefits from the service provision transaction.
- Determine the portion of work completed at the time of reporting.
- Identify the costs incurred for the transaction and the costs to complete the transaction for providing that service.

If a service is performed over multiple periods, the revenue recognized in the period is based on the results of the work completed as of the end of the accounting period.

Dividends are distributed.

Dividends are recognized when the Group has They are entitled to receive dividends from their capital contribution. Dividends received in the form of shares are only tracked by the number of additional shares received , not the value of the shares received.

Interest

Interest is recognized based on the time period and the actual interest rate for each period.

19. Borrowing costs

Borrowing costs include interest on loans and other expenses directly related to the loans.

Borrowing costs are recognized as expenses when incurred. If borrowing costs are directly related to the investment in construction or production of an asset under construction that requires a sufficiently long period (over 12 months) to be put into use for its intended purpose or sold, then these borrowing costs are included in the value of that asset. For loans specifically used for the construction of fixed assets or investment properties, interest is capitalized even if the construction period is less than 12 months. Income arising from temporary investments in loans is recorded as a reduction in the original cost of the related asset.

For general loans used for the purpose of investing in or producing assets under construction, the capitalized borrowing cost is determined by the capitalization rate of the weighted average cumulative cost incurred for the investment in the construction or production of that asset. The capitalization rate is calculated based on the weighted average interest rate of outstanding loans during the period, excluding specific loans used for the formation of a particular asset.

20. Expenses

Costs are amounts that reduce economic benefits, recognized at the time a transaction occurs or when there is a relatively certain likelihood of them occurring in the future, regardless of whether the money has been spent or not.

The expenses and the revenue they generate must be recognized simultaneously according to the matching principle. In cases where the matching principle conflicts with the prudence principle, expenses are recognized based on the nature and provisions of accounting standards to ensure that the transaction is reflected fairly and reasonably.

21. Corporate income tax

Corporate income tax expenses include both current and deferred income tax.

Current income tax

Current income tax is the tax calculated based on taxable income. The difference between taxable income and accounting profit is due to adjustments for temporary differences between tax and accounting, non-deductible expenses, as well as adjustments for non-taxable income and losses carried forward.

DONG NAI WATER JOINT STOCK COMPANY

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

Deferred income tax

Deferred income tax is corporate income tax payable or refundable due to temporary differences between the book value of an asset and a liability for financial reporting purposes and the income tax basis. Deferred income tax payable is recognized for all taxable temporary differences. Deferred income tax assets are only recognized when it is certain that taxable profits will be available in the future to utilize these deductible temporary differences.

The carrying value of deferred corporate income tax assets is reviewed at the end of the accounting period and is written down to the extent that there is sufficient taxable profit to allow the use of part or all of the deferred income tax asset. Previously unrecognized deferred corporate income tax assets are reviewed at the end of the accounting period and recognized when there is sufficient taxable profit to utilize these previously unrecognized deferred income tax assets.

Deferred income tax assets and deferred income tax liabilities are determined at the tax rate expected to apply in the year the asset is recovered or the liability is settled, based on the tax rates in effect at the end of the accounting period. Deferred income tax is recognized in the Statement of Income and is only directly recorded in equity when the tax relates to items that are directly recorded in equity.

Deferred income tax assets and deferred income tax liabilities are offset when:

- The corporation has the legal right to offset current income tax assets against current income tax payable; and
- These deferred income tax assets and deferred income tax liabilities relate to corporate income tax administered by the same tax authority:
 - For the same taxable entity; or
 - The corporation intends to settle current income tax liabilities and current income tax assets on a net basis or by asset recovery concurrently with the settlement of liabilities in each future period when material amounts of deferred income tax liabilities or deferred income tax assets are settled or recovered.

22. Stakeholders

Parties are considered related if one party has the ability to control or exert significant influence over the other party in making decisions regarding financial and operational policies. Parties are also considered related if they are subject to common control or significant common influence.

When considering the relationship between the parties involved, the nature of the relationship is given more emphasis than its legal form.

23. Departmental Report

A business unit is a distinctly identifiable part involved in the production or provision of products or services, and which has risks and economic benefits different from other business units.

A geographically specific segment is a distinctly identifiable part involved in the production or provision of products or services within a particular economic environment, and which experiences different economic risks and benefits compared to business segments in other economic environments.

The segment information is prepared and presented in accordance with the accounting policies applicable to the preparation and presentation of the Group's consolidated financial statements.

Address: 48 Cach Mang Thang Tam Street, Tran Bien Ward, Dong Nai Province

CONSOLIDATED FINANCIAL STATEMENTS

Three months of the fiscal year ending December 31, 2026

Notes to the Consolidated Financial Statements (continued)

The determination of corporate income tax payable by companies within the Group is based on current tax regulations. However, these regulations change periodically, and tax regulations for different types of transactions may be interpreted in various ways. Therefore, the tax amount presented in the consolidated financial statements may change during a tax audit.

Resource tax

The corporation is required to pay resource tax for water resource exploitation activities at a rate of 1% on surface water extraction output and 5% on groundwater extraction output. The tax base is determined according to Decision No. 07/2022/QĐ-UBND dated January 25, 2022, of the People's Committee of Dong Nai province.

Other types of taxes

Companies within the Group declare and submit their taxes as required.
