3.1 Applicable Accounting Standards and Regime

The Group applies the Vietnamese Enterprises accounting systems.

The Group applies Vietnamese Accounting Standards (VAS) and the Vietnamese Enterprise Accounting Regime as guided by Circular No. 99/2025/TT-BTC dated 27 October 2025 and Circular No. 43/2026/TT-BTC dated 20 April 2026 issued by the Ministry of Finance, which provide guidance on the preparation and presentation of interim consolidated financial statements, together with other Circulars guiding the implementation of Accounting Standards issued by the Ministry of Finance in the preparation and presentation of the interim consolidated financial statements.

3.2 Comply with the Vietnamese Accounting Standards and Vietnamese Accounting Regime

The Board of Management ensures that the interim consolidated financial statements have been prepared in compliance with Vietnamese Accounting Standards (VAS) and the Vietnamese Enterprise Accounting Regime as guided by Circular No. 99/2025/TT-BTC dated 27 October 2025 and Circular No. 43/2026/TT-BTC dated 20 April 2026 issued by the Ministry of Finance, as well as other Circulars guiding the implementation of Accounting Standards issued by the Ministry of Finance in the preparation and presentation of the interim consolidated financial statements.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

4.1 Basis of preparation the Consolidated financial statements

Subsidiaries are fully consolidated from the date of acquisition, which is the date on which the Group acquires control of the subsidiary, and continue to be consolidated until the date on which the Group ceases

The financial statements of the Parent Company and its subsidiaries used for consolidation are prepared for the same financial year and uniform accounting policies have been applied.

The balances of accounts on the consolidated balance sheet between entities in the Group, income and expenses, and unrealized internal gains or losses arising from these transactions are eliminated completely.

Non-controlling shareholder interests

Interests of non-controlling shareholders are those interests in profit or loss, and in the net assets of a subsidiary that are not held by the Group and are presented separately in the consolidated statement of income and presented separately from the equity portion of the Group's shareholders in the equity portion of the consolidated balance sheet.

Business combinations and Goodwill

Business combinations are accounted for using the purchase price method. The business combination fee includes the fair value at the date of exchange of the assets exchanged, liabilities incurred or accepted, and equity instruments issued by the buyer party in exchange to gain control of the acquiree and the costs directly attributable to the business combination. The acquiree's identifiable assets, liabilities, and contingent liabilities in a business combination are all recognized at fair value at the date of the business combination.

Goodwill arising from a business combination is initially recognized at cost, which is the difference between the cost of the business combination and the acquirer's equity of the fair value of the assets and liabilities identifiable and recognized contingent liabilities. If the business combination fee is less than the fair value of the acquiree's net assets, the difference is recognized in the consolidated statement of income. After initial recognition, goodwill is measured at cost less accumulated amortization. Goodwill is amortized on a straight-line basis no more than 10 years.

4.2 Foreign currency transactions

Foreign currency transactions are converted with the exchange rate at the time of transaction. Balances of items with foreign currency at the ending day of the fiscal year are converted with the exchange rate on this

Foreign exchange differences arising during the year from transactions in foreign currencies are recognized in the financial income or expenses. Exchange differences arising from revaluation of monetary items denominated in foreign currencies as at the end of fiscal year after offsetting between increase and decrease difference is recognized in the financial income or expenses.

Exchange rate is applied to convert foreign currency transactions is actual exchange rate arising at the time of transaction. Actual exchange rate applied for foreign currency transactions is determined as following:

- Actual exchange rate when buying or selling (spot contracts, forward contracts, future contracts, option contracts, swap contracts): rate which is signed in the purchasing foreign currency contracts between the Group and banks.
- If there's no exchange rate determined in contracts:
 - + For receivables: buying exchange rate of the commercial bank where the Group requests its customers to pay at the time of arising transaction.
 - + For payables: selling exchange rate of the commercial bank where the Group expects to deal at the time of arising transaction.
 - + For purchasing assets transaction or expenses which is paid immediately with currency (not recorded in liabilities): buying exchange rate of the commercial bank where the payment is performed.

Exchange rate applied to reevaluate items with foreign currency balances on the ending date of the fiscal period is determined as followed:

- For foreign currency deposited in banks: buying exchange rate of the commercial bank where the Group deposits.
- For foreign currency borrowed in banks: selling exchange rate of the commercial bank where the Group deposits.
- For items with foreign currency classified as other assets: buying exchange rate of the Banks for Investment and Development of Vietnam (The Bank where the Group deals regularly).
- For items with foreign currency classified as other liabilities: selling exchange rate of the Banks for Investment and Development of Vietnam and Vietcombank (The Bank where the Group deals regularly).

4.3 Cash and cash equivalents

Cash comprises cash on hand, cash in banks (demand deposits) and cash in transit. Cash equivalents are short-term highly liquid investments with an original maturity of three months or less from the date of investment, which are readily convertible into known amounts of cash and which are subject to an insignificant risk of change in value at the report date.

4.4 The financial investments

Loan receivables

Loan receivables are determined at cost less provision for doubtful debts. Provisions for doubtful debts of loans are stated based on the occurred estimated losses.

Investment in Joint-venture and associates

Investments in associates are accounted for using the equity method. An associate is an entity in which the Group has significant influence, but is neither a subsidiary nor a joint venture of the Group. Generally, the Group is considered to have significant influence if it owns more than 20% of the voting rights in the investee.

Under the equity method, investments are initially recognized in the Consolidated Balance Sheet at cost, then adjusted for changes in the Group's owned part of net assets of the affiliated company after purchase. Goodwill arising from the acquisition of an investment in a joint venture or associate is included in the carrying amount of the investment. The Group is not allowed to gradually allocate this goodwill. The consolidated income statement reflects the Group's owned part in the results of the associate's activities after the acquisition.

The investor's owned part in the post-acquisition profit/(loss) of the associate is reflected in the consolidated statement of income and the investor's owned part in the post-acquisition change of the associate's funds of associates is recognized in the funds. The cumulative change after an acquisition is adjusted for the carrying amount of the investment in the associate. Dividend profits from the associate are offset against the investment in the associate.

The financial statements of associates are prepared for the same period as the Group's consolidated financial statements and using accounting policies that are consistent with those of the Group. Appropriate consolidated adjustments have been made to ensure that the accounting policies are applied consistently

Investments in equity of other companies

Investments in equity of other companies include investments which the Group have no control, co-control or significant influence on the investee.

Investments in equity of other companies are initially recorded at cost, including purchase price or capital contributions plus the costs directly related to investment. Dividends and profits from previous periods of the investments before being purchased are accounted for the decrease in value of the investments. Dividends and profits of the following period are after being purchased is recognized in revenue. Dividends which received by shares are only followed up by the number of shares increases without recognizing the value of

Provision for diminution in value of long-term investments

Provision for diminution in value of long-term investments in equity of other companies is appropriated as

- For investments in listed shares or the fair value of the investments is determined reliably, the provision is based on the market value of shares.
- For investments have not determined the fair value at the time of reporting, the provision are made based on the loss of the investment at the rate equal to the difference between actual capital companies in other company and the equity ratio multiplied with the Group's capital contribution to the total actual capital contributions of all parties in other investee enterprise.

Increase or decrease in provision for diminution in value of long-term investments have recorded at the closing date, and is recognized in the financial expenses.

4.5 Receivables

Trade and other receivables are stated at cost less provision for doubtful debts. The classification of receivables are trade receivables and other receivables, which complied with the following principles:

- Trade receivables reflect the nature of the receivables arising from commercial transactions with purchase - sale between the Group and an independent purchaser.
- Other receivables reflect the nature of the receivables arising from non-commercial transactions, and to be related to the purchase – sale transactions.

The provision for doubtful debts represents the estimated loss due to non-payment arising on receivables that were outstanding at the consolidated balance sheet date.

The increase or decrease in the balance of provision for doubtful bad debts that need to be made at the end of the fiscal period is recognized as administrative expenses.

4.6 Inventories

Inventories are presented at the lower of cost and net realizable value.

The cost of inventories is determined as follows:

- Materials and goods: comprising all costs of purchase and related expenses directly incurred in bringing the inventories to their present location and condition.
- Finished goods: including the cost of materials, direct labour and general manufacturing costs related to allocate on normal levels.
- Work-in-progress: include the cost of raw materials, direct labor cost and production overhead, land use right cost and directly related costs incurred in construction process.

Net realizable value represents the estimated selling price of inventory during the normal production and business minus the estimated costs to completion and the estimated costs necessary to consume them.

Cost is determined on a weighted average method and the periodic method is used to record inventories.

Provision for impairment of inventories is made for each inventory with the cost greater than the net value realizable. For service in progress, the provision for impairment is calculated for each type of service has a separate price. Increase or decrease in the balance of provision for impairment of inventories should be set aside at the fiscal period end and is recognized in cost of goods sold.

4.7 Expenses pending allocation

Prepaid expenses comprise actual costs incurred that relate to the operating results of multiple accounting periods. The Group's prepaid expenses include the following:

Tools and equipment

The tools and equipment have been put into use and are amortized to expense under the straight-line method to time allocation in 3 years.

Repair costs of fixed assets

Repair costs of fixed assets incurred once to have a large value are amortized to expense under the straight-line method not too 3 years.

4.8 Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation. The initial cost of a tangible fixed asset comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures for additions, improvements and renewals are capitalised on fixed assets accounts, expenditures for maintenance and repairs are charged to the income statement.

When assets are sold or retired, their cost and accumulated depreciation are removed from the balance sheet and any gain or loss resulting from their disposal is included in the income statement. Depreciation of tangible fixed assets is calculated on a straight-line basis over the estimated useful life of these assets.

Depreciation of tangible fixed assets such as:

	Time (Years)
Building, structures	05 – 50
Machinery and equipment	15 – 20
Transportation	10
Office equipment	05 – 10

4.9 Intangible fixed assets

Intangible fixed assets are stated at cost less accumulated depreciation.

The initial cost of an intangible fixed asset comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures for additions, improvements and renewals are capitalised on fixed assets accounts, expenditures for maintenance and repairs are charged to the income statement.

When assets are sold or liquidated, their cost and accumulated amortization are removed from the sheet and any gain or loss resulting from their disposal is included in the income statement.

The Group's intangible fixed assets include:

Land use right

The land use right reflects all the actual expenses related to the used land such as expenses to obtain the land use right, expenses for house removal and land clearance, expenses on ground levelling, registration fees, etc.

The Group's land use rights are amortized over the straight-line method based on the land use time period from 28 years to 40 years, and indefinite land use rights are not amortized.

Accounting software

The buying expenses of computer software which are not an integral part of related hardware are capitalized. Initial cost of computer software includes all the expenses paid until the date the software is put into use. Computer software is amortized in line with the straight-line method in 05 years.

4.10 Construction in progress

Construction in progress presents costs directly related to (including interest expenses suitable for relevant accounting policies of the Group) fixed assets are constructing, equipments, machines are installing for production, leasing and management as well as the cost of unfinished construction. These assets are initially recognized at cost and not amortized.

4.11 Accounts payable and accrued expense payables

Accounts payable and accrued expenses are recognized for amounts to be paid in the future, which related to receive the goods and services. Accrued expenses are recorded based on reasonable estimates payment.

The classification of liabilities is payable to suppliers, accrued expenses and other payables, which complied with the following principles:

- Trade payable reflects the nature of the payables arising from commercial transactions with purchase of goods, services, property between the Group and independent sellers.
- Accrued expenses reflect the payables for goods and services received from the seller or provided with the purchaser but have not been paid until having invoices or having insufficient billing records, accounting records, and payables to employees including salary, production costs, sales must accruals.
- Other payables reflects the nature of the payables of non-commercial, not related to the purchase, sale, rendering service transactions.

4.12 Owner's equity

Capital is recorded according to the amount actually invested by shareholders.

4.13 Distribution of net profits

Profit after tax is distributed to shareholders after an appropriation of funds under the Charter of the Group as same as the law and is approved by the General Meeting of Shareholders.

The distribution of profits to shareholders is considered to non-cash items in undistributed profit may affect cash flow and ability to pay dividends as profit from revaluation of assets contributed as capital, interest due to the revaluation of monetary items, the financial instruments and other non-cash items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders.

4.14 Revenue and income recognition

Revenue from sales of goods, finish goods

Sale of merchandise shall be recognized if it simultaneously meets the following conditions:

- The Group has transferred the majority of risks and benefits associated with the right to own the products or goods to the buyer;
- The Group no longer holds the right to manage the goods as the goods owner, or the right to control the goods;
- Turnover has been determined with relative certainty;
- The Group has gained or will gain economic benefits from the good sale transaction;
- It is possible to determine the costs related to the goods sale transaction.

Revenue from rendering of service

Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. In case that a transaction involves the rendering of services is attributable to several years, revenue is recognised in each year by reference to the percentage of completion of the transaction at the balance sheet date of that year. The outcome of a transaction can be

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Group;
- The percentage of completion of the transaction at the balance sheet date can be measured reliably;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Interest

Interest is recognized on an accrual basis, are determined on the balance of cash in bank and the actual interest rate for each period.

Dividends and profits received

Dividends and profit shared are recognized when the Group receive the notice of dividends or profit from the capital contribution. Dividends which received by shares, only follow up the number of shares increases, no recognition of the value of shares received.

4.15 Borrowing costs

Borrowing costs include interest and other costs incurred directly related to the borrowings.

Borrowings costs are recognized as expenses when incurred. Where the borrowing costs directly attributable to the acquisition, construction or production of uncompleted assets requires a substantial period (over 12 months) to get ready for use or sales, borrowing costs can be capitalized.

For specific loan serves the construction of fixed assets and real estate, interest is capitalized, regardless the period of construction is less than 12 months. The income arising from the temporary investment of the borrowings is deducted from the related asset.

For general loans including use for purposes of the construction or production of uncompleted assets, the capitalization of borrowing costs is determined in proportion to the cost capitalization weighted average arising for basic construction or production of that asset. The capitalization rate is calculated in proportion to the weighted average rate of borrowings outstanding during the year, except for specific borrowing serving the purpose of a specific property.

4.16 Corporate income tax

Corporate income tax for the year comprises current income tax. Corporate income taxes are recognized in the consolidated statement of income unless they are related to items that are credited directly to equity, in which case, these income taxes are also credited directly to equity.

Current income tax is the expected tax payable based on taxable income for the period, used effective or basic tax rates that are effective at the end of the accounting period, and the amounts adjusted for payable tax related to previous periods.

Tax settlement of the Company and subsidiaries will be assessed by the Tax Department. Due to the application of laws and regulations on taxes for different incurred transactions which can be explained in many different ways, tax payable presented in the consolidated financial statements can be immediately

8. FINANCIAL INSTRUMENTS

The Group may have financial assets such as trade receivables and other receivables, other long-term investments cash and short-term deposits that arise directly from the operations of the Group. Financial liabilities of the Group mainly consist of loans, trade payables and other payables. The main purpose of these financial liabilities is to gather the financial resources to serve the activities of the Group.

The Group incurs from market risk, credit risk and liquidity risk.

Operational risk management is indispensable operations for the entire business operations of the Group. The Group has developed control system to ensure balance at a reasonable level between the costs when incurred

Board of General Directors considered and uniformly applied policies to manage each of these risks are

i Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk has four types of risk: interest rate risk, currency risk, goods price risk and other price risk, such as share price risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Market risk for changes in interest rates of the Group primarily correlates to cash, short term deposits, bonds, and loans of the Group.

The Group manages interest rate risk by analyzing the competitive situation in the market to acquire beneficial interest for company's purposes, but still remain within the limits of their risk management.

Foreign currency risk

The Group bears the risk of exchange rate due to fluctuation in fair value of future cash flows of a financial instrument according to changes in exchange rates. The Group is exposed to the risk of exchange rate changes directly related to its business operations.

The Group has foreign exchange risk from the purchase, sale and borrowings denominated in other currencies, which are different from the accounting currency of the Group. The Group manages foreign currency risk by considering the current market situation and expected when the Group plans to buy and sell in foreign currency

Credit risk

Credit risk is the risk that one party of a financial instrument or contract not performing its obligations, resulting in financial losses. The Group has credit risk from its operating activities (primarily for trade receivables account), and from its financial activities, including bank deposits, foreign exchange transactions and the other financial instruments.

Trade receivables

The Group regularly keeps track of the receivables, which is not yet collected. For big customers, the Group considered the decline in the credit quality of each customer at the reporting date. The Group seeks the way to remained the tight control of the receivables and arranging credit control staff to minimize credit risk. On this basis and the trade receivables of the Group related to various customers, credit risk is not significantly concentrated in a certain customer.

Cash in bank

The Group mainly maintained deposit balances at well-known banks in Vietnam. Credit risk of the deposit balances at banks is managed by the treasury department of the Group policies. The maximum credit risk of the Group for the items on the balance sheet at the end of the financial year is the value book presented in note No. 5.1. The Group found that the level of concentration of credit risk on bank deposits is low.

ii Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulties in implementing their financial obligations due to lack of funds. Liquidity risk of the Group mainly arises from maturity mismatches of financial assets and financial liabilities.

The Group minimizes the liquidity risk by maintaining an amount of cash and cash equivalents and bank loans at a level that the Board of General Directors believes it is sufficient to meet the Group's operations and minimize the risks due to the volatility of cash flows. The table below summarizes the maturity of the financial liabilities of the Group based on expected payments on undiscounted basic contracts:

	Within 1 year VND	Over 1 year to 5 years VND	Total VND
As at 31 March 2026			
Loans and debts	833.123.414.101	-	833.123.414.101
