NOTES TO COLECTED THE MID - YEAR FINANCIAL STATEMENTS

(These notes form part of and should be read in conjunction
with the accompanying financial statements)

Form B09-DN
(Issued together with Circular No.
99/2025/TT-BTC dated 27 October 2025 of
the Minister of Finance)

1. Operating Characteristics

1.1. Form of Ownership

Central Container Joint Stock Company (hereinafter referred to as the “Company”) was converted from Central Container Limited Liability Company (the Limited Liability Company was initially granted its Business Registration Certificate by the Da Nang Department of Planning and Investment on 13 June 2002). Since its establishment, the Company has amended its Business Registration Certificate ten (10) times. Its current Enterprise Registration Number is 0400424349, with the most recent amendment made on 03 July 2025. The Company is an independent accounting entity and operates in accordance with the Law on Enterprises, the Company's Charter, and other applicable laws and regulations.

The Company's shares have been listed on the Hanoi Stock Exchange under the stock ticker VSM. The first trading date was 17 July 2017.

1.2. Principal Business Activities: Support service activities related to transportation.

1.3. Business Lines

- Warehouse operation and management;
- Container agency services, shipping agency services, multimodal freight forwarding agency services, and organization of consolidated transportation for import-export and transit goods;
- International multimodal transportation;
- Airline ticket agency services;
- Maritime brokerage for domestic and international shipping lines;
- Container cleaning services.

1.4. Normal Operating Cycle: The Company's normal operating cycle is 12 months.

1.5. Enterprise structure

The Company has one dependent branch and one subsidiary, i.e. Qui Nhon Container Joint Stock Company, as detailed below:

Branch/Subsidiary	Address	Business Sector	Ownership and voting rights
Branch in Quy Nhon	83 Hai Ba Trung Street, Quy Nhon Ward, Gia Lai Province, Vietnam	Provision of transportation-related support services	
Qui Nhon Container Joint Stock Company – Subsidiary	83 Hai Ba Trung Street, Quy Nhon Ward, Gia Lai Province, Vietnam	Provision of transportation-related support services	83,8%

1.6. Comparability of Information Presented in the Financial Statements::

On 27 October 2025, the Ministry of Finance issued Circular No. 99/2025/TT-BTC providing guidance on the Corporate Accounting Regime (effective from 1 January 2026 and applicable to accounting periods beginning on or after 1 January 2026), replacing Circular No. 200/2014/TT-BTC dated 22 December 2014 and its amendments and supplements.

NOTES TO COLECTED THE MID - YEAR FINANCIAL STATEMENTS

(These notes form part of and should be read in conjunction with the accompanying financial statements)

Except for cases where Circular No. 99/2025/TT-BTC requires retrospective application, other items presented in the accompanying Financial Statements have been applied by the Company on a non-retrospective basis. Material changes in the Company's accounting policies and their impacts on the Financial Statements, if any, are presented in the following Notes to the Financial Statements:

Foreign currency transactions (Note 4.1)

Investments held to maturity (Note 4.3)

2. Accounting Period and Accounting Currency Used

The Company's annual accounting period begins on 1 January and ends on 31 December every year.

The currency used for accounting records and presentation of the Financial Statements is Vietnamese Dong (VND).

3. Accounting Standards and Accounting Regime Applied

The Company applies the Vietnamese Accounting Standards System and the Vietnamese Corporate Accounting Regime as guided under Circular No. 99/2025/TT-BTC dated 27 October 2025 issued by the Ministry of Finance.

4. Accounting Policies, Accounting Estimates and Applicable Relevant Legal Regulations

4.1 Foreign Exchange Rates Applied in Accounting

Foreign currency transactions are translated into Vietnamese Dong using the actual transaction exchange rate (the average of the bank's transfer buying and selling rates) at the transaction date of the commercial bank where the Company regularly conducts transactions.

At the end of the accounting period, monetary assets and liabilities denominated in foreign currencies (except for a portion of receivables for which bad debt provisions have been made, non-term bank deposits, and loans for which foreign exchange risk provisions have been made through financial instruments) are revalued using the average of the transfer buying and selling rates of the commercial bank where the Company regularly conducts transactions. Foreign currency non-term bank deposits are revalued using the average of the transfer buying and selling rates of the commercial bank where the Company opens such foreign currency deposit accounts.

Foreign exchange differences arising during the period and foreign exchange differences arising from the revaluation of foreign currency monetary items at the end of the period are recognized in the statement of income during the period.

4.2 Cash and Cash Equivalents

Cash includes cash on hand and demand deposits.

Cash equivalents are short-term investments with a maturity of no more than three months from the investment date, which are readily convertible into a known amount of cash and subject to insignificant risk of changes in value at the end of the accounting period.

4.3 Demand deposits and cash equivalents are only recognized under the item "Cash and Cash Equivalents" when the Company is not restricted from using such funds.

4.4 Financial Investments

Investments Held to Maturity

NOTES TO COLECTED THE MID - YEAR FINANCIAL STATEMENTS

(These notes form part of and should be read in conjunction with the accompanying financial statements)

Investments held to maturity are investments held until maturity for the purpose of earning periodic interest income, including: term deposits, valuable papers (such as treasury bills, promissory notes, certificates of deposit), bonds, preferred shares classified as liabilities, loans, other investments held to maturity or investments with similar characteristics, and excluding derivative instruments.

Investments held to maturity are initially recognized at the actual amount paid to acquire the investment. In cases where discounts/premiums arise upon acquisition, the Company allocates such discounts/premiums to financial income using the straight-line method over the investment term. In cases where the periodic allocation of the premium of an investment held to maturity is greater than the periodic interest income calculated based on the investment's nominal interest rate, the difference is recognized as financial expenses.

Provision for investments held to maturity is made at the end of the accounting period when there are indications or evidence that the Company's investments held to maturity may be impaired.

Investments in Subsidiaries

A subsidiary is an entity controlled by the Company. The control relationship is generally demonstrated through the Company's direct or indirect ownership of more than 50% of voting rights and the ability to govern the financial and operating policies of the subsidiary in order to obtain economic benefits from its activities.

Investments in subsidiaries are initially recognized at cost less provisions. Dividends and profits distributed in cash or in non-cash form relating to the period before the investment date are deducted from the carrying value of the investment.

Provision

Provision for investments in subsidiaries is made when such investments are impaired or when the subsidiaries incur losses resulting in the possibility of loss of the Company's invested capital.

For investees that are required to prepare consolidated financial statements, impairment provisions are made based on the consolidated financial statements. In other cases, provisions are made based on the financial statements of the investee companies.

4.5 Receivables

Receivables include: Trade receivables and other receivables.

- Trade receivables are receivables of a commercial nature arising from purchase and sale transactions between the Company and buyers;
- Other receivables are receivables of a non-commercial nature and are not related to purchase and sale transactions or internal transactions.

Receivables are recognized at an amount not exceeding their recoverable value, which is determined as the original value less provision for doubtful debts. Provision for doubtful debts represents the estimated loss arising at the end of the accounting period for receivables that are overdue or not yet due but there is evidence indicating that the receivables may be impaired due to the debtor's death, disappearance, absconding, or inability/lack of ability to repay debts; being in bankruptcy status; undergoing bankruptcy or dissolution procedures; being prosecuted, detained, or tried; being subject to enforcement of judgments; suffering from serious illness; having requested enforcement of judgment but such enforcement cannot be carried out; having initiated legal proceedings for debt recovery but the case has been suspended; or for other reasons,...

For overdue receivables, the Company estimates the provision amount based on a specific aging analysis as follows:

NOTES TO COLECTED THE MID - YEAR FINANCIAL STATEMENTS

(These notes form part of and should be read in conjunction with the accompanying financial statements)

- 30% of the value for receivables overdue from 6 months to less than 1 year.
- 50% of the value for receivables overdue from 1 year to less than 2 years.
- 70% of the value for receivables overdue from 2 years to less than 3 years.
- 100% of the value for receivables overdue for 3 years or more.

4.6 Inventories

Inventories are recognized at the lower of cost and net realizable value.

The cost of inventories comprises purchase costs, processing costs, and other directly attributable costs incurred to bring the inventories to their present location and condition.

Net realizable value is the estimated selling price less estimated costs to complete the inventories and estimated costs necessary for their sale.

Inventories issued are determined in terms of quantity and value for each transaction and accounted for using the weighted average method.

Provision for decline in value of inventories is made for each item when its net realizable value is lower than its cost.

4.7 Tangible Fixed Assets

Historical Cost

Tangible fixed assets are stated at cost less accumulated depreciation.

Cost comprises the purchase price and all costs incurred by the Company to acquire the tangible fixed asset and bring it to the location and condition necessary for it to be capable of operating in the manner intended by the Company.

Subsequent expenditures incurred after initial recognition are added to the cost of tangible fixed assets only when it is probable that such expenditures will increase future economic benefits from the use of the asset beyond its originally assessed standard of performance. Other expenditures that do not meet the above conditions are recognized as production and business expenses.

Depreciation

Tangible fixed assets are depreciated using the straight-line method based on their estimated useful lives. The depreciation periods are in accordance with Circular No. 45/2013/TT-BTC dated 25 April 2013 issued by the Ministry of Finance. Details are as follows:

Type of Asset	Depreciation Period (Years)
Buildings and Structures	8 - 25
Machinery and Equipment	5 - 10
Transportation Vehicles	5 - 10
Management Equipment and Tools	4 - 10

4.8 Intangible Fixed Assets

Historical Cost

Intangible fixed assets are stated at cost less accumulated amortization.

The cost of an intangible fixed asset comprises all costs incurred by the Company to acquire the intangible fixed asset up to the time the asset is ready for use in the manner intended by the Company.

NOTES TO COLECTED THE MID - YEAR FINANCIAL STATEMENTS

(These notes form part of and should be read in conjunction with the accompanying financial statements)

Subsequent expenditures related to intangible fixed assets after initial recognition are capitalized as an increase in the asset's cost when it is probable that such expenditures will increase the future economic benefits of the intangible fixed asset beyond its originally assessed level of performance. Other subsequent expenditures related to intangible fixed assets are recognized as production and business expenses.

Depreciation

Amortization of intangible fixed assets is calculated using the straight-line method based on the estimated useful lives of the assets. The amortization periods are in accordance with Circular No. 45/2013/TT-BTC dated 25 April 2013 issued by the Ministry of Finance.

<u>Type of Asset</u>	<u>Depreciation Period (Years)</u>
Computer Software	2 - 5

4.9 Prepaid Expenses

Prepaid expenses are classified into short-term prepaid expenses and long-term prepaid expenses. These are actual costs incurred by the Company that are related to the operating results of multiple accounting periods; therefore, such costs are allocated appropriately to each accounting period. The main prepaid expenses of the Company include:

- Land rental expenses are allocated using the straight-line method over the lease term.
- Tools and equipment that have been put into use are allocated using the straight-line method over a maximum period of up to 3 years.
- Other prepaid expenses: Based on the nature and amount of expenses, the Company selects appropriate allocation methods and criteria over the period during which the related economic benefits are expected to be generated.

4.10 Liabilities

Liabilities include: Trade payables and other payables.

- Trade payables are liabilities of a commercial nature arising from purchase and sale transactions between suppliers and the Company;
- Other payables are liabilities of a non-commercial nature and are not related to purchase and sale transactions or internal transactions.

Liabilities are recognized at cost, not lower than the amount of obligation to be settled, and are classified into current liabilities and non-current liabilities based on the remaining repayment term at the end of the accounting period.

The Company monitors liabilities in detail by individual creditor, original maturity, remaining repayment term, and currency.

4.11 Leases

Operating leases are leases of fixed assets whereby substantially all risks and rewards incidental to ownership of the assets remain with the lessor. Lease payments under operating leases are recognized in the statement of income on a straight-line basis over the lease term.

NOTES TO COLECTED THE MID - YEAR FINANCIAL STATEMENTS

(These notes form part of and should be read in conjunction with the accompanying financial statements)

4.12 Accrued Expenses

Accrued expenses are recognized for amounts payable in the future relating to goods or services received from suppliers or provided to customers during the reporting period but not yet actually paid due to the lack of sufficient accounting documents, records, or supporting materials.

4.13 Equity

Owners' Contributed Capital

Owners' contributed capital reflects the actual amount of capital contributed by shareholders.

Profit distribution

Undistributed after-tax profit reflects the Company's business results (profit or loss) after corporate income tax and the situation of profit distribution or loss settlement of the Company.

After-tax profit is appropriated to funds and distributed to shareholders in accordance with the Company's Charter or resolutions of the General Meeting of Shareholders.

Dividends and profits distributed to shareholders shall not exceed the undistributed after-tax profit and shall take into consideration non-cash items included in undistributed after-tax profit that may affect cash flows and the Company's ability to pay dividends.

4.14 Revenue and Other Income

- Revenue from sale of goods and rendering of services is recognized when the Company has obtained or will obtain economic benefits, and the revenue amount can be measured reliably, while the following conditions are satisfied:
 - ✓ Revenue from sale of goods is recognized when significant risks and rewards of ownership of the products have been transferred to the buyer, and there is no longer any significant uncertainty that may affect the decisions of both parties regarding the selling price or the possibility of product returns;
 - ✓ Revenue from rendering of services is recognized when the services have been completed. In cases where services are performed over multiple accounting periods, revenue recognized in each period is determined based on the percentage of completion of the service at the end of the accounting period.
- Financial income is recognized when the amount can be measured reliably and it is probable that economic benefits will be obtained from the transaction:
 - ✓ Interest income is recognized on a time basis using the actual interest rate;
 - ✓ Dividends and distributed profits are recognized when the Company has the right to receive dividends or profits from its capital contribution. Dividends received in the form of shares are not recognized as financial income. Dividends received relating to the period before the investment date are recorded as a reduction in the carrying amount of the investment.
- Other income represents income arising outside the Company's production and business activities, which is recognized when it can be measured reliably and it is probable that economic benefits will be obtained.

4.15 Cost of Goods Sold

The cost of products, goods, and services sold is recognized in the appropriate accounting period, in accordance with the matching principle with revenue and the prudence principle.

NOTES TO COLECTED THE MID - YEAR FINANCIAL STATEMENTS

(These notes form part of and should be read in conjunction with the accompanying financial statements)

Abnormal costs of inventories and services provided are recognized immediately in cost of goods sold in the period and are not included in the cost of products or services.

The value of inventory shortages and losses, after deducting any compensation received (if any), is recognized in cost of goods sold in the period.

4.16 Financial Expenses

Financial expenses reflect financial operating costs, including expenses or losses related to financial investment activities, costs of purchasing trading securities, borrowing costs that are not capitalized in accordance with regulations, losses from the disposal of financial investments, transaction costs for the sale of financial investments; the difference between the repurchase price of issued bonds before maturity and the carrying amount of such bonds; provisions for impairment of trading securities and provisions for losses on investments in other entities; foreign exchange losses arising from the sale of foreign currencies or the revaluation of monetary items denominated in foreign currencies at the end of the period; payment discounts granted to customers, and other related expenses.

4.17 Selling Expenses and General and Administrative Expenses

Selling expenses reflect actual expenses incurred during the process of selling products, goods, and rendering services.

General and administrative expenses reflect actual expenses incurred relating to the general administration and management of the Company.

4.18 Corporate Income Tax Expenses

Corporate income tax expenses comprise current corporate income tax expenses and deferred corporate income tax expenses.

Current corporate income tax expenses include current corporate income tax expenses in accordance with the Law on Corporate Income Tax and additional corporate income tax expenses in accordance with the Global Minimum Tax regulations.

Deferred corporate income tax expenses represent the amount of corporate income tax payable in the future arising from the recognition of deferred income tax liabilities during the period or the reversal of deferred income tax assets recognized in previous periods.

4.19 Tax Rates and Fees Payable to the State Budget Applied by the Company

- Value Added Tax (VAT): A tax rate of 10% is applied to transportation services. From 1 January 2026 to 30 June 2026, this activity is subject to a reduced VAT rate of 8% in accordance with Resolution No. 174/2024/QH15 dated 30 November 2024 and Resolution No. 204/2025/QH15 dated 17 June 2025 issued by the National Assembly.
- Corporate Income Tax (CIT): A tax rate of 20% is applied.
- Other taxes and fees: Payable in accordance with current regulations.
