Thai Duong Bac Joint Stock Company	278 Tran Phu Street, Dak Cam Ward, Quang Ngai Province	Power generation	36,82%	36,82%	36,82%

7. Number of employees as at 30/06/2026

Total number of employees of the Company as at 30/06/2026 is 55 persons (as at 31/12/2025: 51 persons)

8. Statement on comparability of information in the Consolidated Financial Statements

The Company consistently applies accounting policies in accordance with Circular No. 99/2025/TT-BTC dated October 27, 2025 issued by the Ministry of Finance guiding corporate accounting regimes. Accordingly, the information and figures presented in the Consolidated Financial Statements are comparable.

II. Accounting period and accounting currency

1. Accounting period: From January 01 to December 31 of the calendar year.
2. Accounting currency: Vietnamese Dong (VND).

III. Applicable accounting standards and system

1. The Company applies the Corporate Accounting Regime issued under Circular No. 99/2025/TT-BTC dated October 27, 2025 issued by the Ministry of Finance.
2. Statement of compliance with accounting standards and system:

The Board of General Directors ensures full compliance with Vietnamese Accounting Standards and the Vietnamese Corporate Accounting Regime in force relating to the preparation and presentation of these Consolidated Financial Statements

IV. Accounting policies, accounting estimates and relevant applicable regulations

The following are the principal accounting policies applied in preparing the Financial Statements:

1. Foreign currency translation principles

The accompanying Financial Statements are presented in Vietnamese Dong (VND), under the historical cost convention and in accordance with Vietnamese Accounting Standards, Vietnamese Corporate Accounting Regime, and relevant legal regulations

2. Exchange rates applied in accounting

- Actual transaction exchange rate;
- Book exchange rate;
- Exchange rate for revaluation of monetary items in foreign currencies: weighted average transfer buying and selling rate of the commercial bank where the enterprise regularly transacts at the reporting date.

3. Principles for determining effective interest rate used for discounting cash flows.**4. Recognition principles for cash and cash equivalents.**

- Cash includes cash on hand and bank deposits
- Principle for the recognition of cash equivalents: Short-term investments with an original maturity of no more than three months from the date of investment, which are readily convertible into known amounts of cash and are subject to an insignificant risk of changes in value at the end of the accounting period.

5. Accounting principles for financial investments

- a) Trading securities;
- b) Held-to-maturity investments;
- c) Investments in subsidiaries, joint ventures, and associates;

Investments in subsidiaries over which the Company has control, investments in associates and joint ventures in which the Company has significant influence are presented under the cost method in the separate financial statements.

Distributions of profits received by the Company from the accumulated profits of subsidiaries after the date on which the Company obtains control are recognised in the Company's results of operations for the year. Other distributions are considered as a recovery of investment capital and are deducted from the carrying amount of the investment.

Distributions of profits received by the Company from the accumulated profits of associates after the date on which the Company obtains control are recognised in the Company's results of operations for the year. Other distributions are considered as a recovery of investment capital and are deducted from the carrying amount of the investment.

Investments in subsidiaries, joint ventures, associates, and other investments are presented in the balance sheet at cost less impairment provisions (if any).

d) Investments in other entities:

Are recognised at cost, including purchase price and directly attributable acquisition costs. After initial recognition, these investments are measured at cost less provision for impairment of investments.

e) Accounting methods for other transactions related to financial investments.

6. Accounting principles for receivables

- Receivables are amounts that can be collected from customers or other parties. Receivables are presented at carrying amount less provision for doubtful debts.
- Provision for doubtful debts is assessed and recognised for receivables that are overdue and have difficulty in collection, or receivables for which the debtor is unlikely to be able to pay due to liquidation, bankruptcy, or similar difficulties.

7. Principles of inventory recognition

- Inventories are measured at the lower of cost and net realisable value. The cost of inventories includes direct material costs, direct labour costs, and manufacturing overheads, if any, incurred to bring the inventories to their present location and condition.
- Net realisable value is determined as the estimated selling price less the estimated costs of completion and the estimated costs necessary to make the sale, including marketing, selling, and distribution expenses incurred. Inventories are accounted for using the perpetual inventory system and are valued using the weighted average method applied on a continuous basis.
- The Company's allowance for decline in value of inventories is recognised when there is reliable evidence of a decrease in net realisable value compared to the cost of inventories.

8. Accounting principles and depreciation of tangible fixed assets (including perennial crops producing periodic yields and working livestock), intangible fixed assets, finance lease fixed assets, and investment property: Accounting principles and depreciation of tangible fixed assets

- Tangible fixed assets are recorded at cost and presented at cost less accumulated depreciation. The cost of a tangible fixed asset includes all expenditures incurred by the Company to acquire the asset up to the time it is ready for use.
- Tangible fixed assets are depreciated using the straight-line method based on estimated useful lives. The specific depreciation periods are as follows:

Type of assets	Years
Hydropower plant dam system	47 - 48
Buildings and structures	10 - 48
Power generating units	20 - 48
Machinery and equipment	03 - 10
Transportation vehicles	06 - 08
Office equipment and tools	03 - 05

- 9. Accounting principles for biological assets.
- 10. Accounting principles for business cooperation contracts.
- 11. Accounting principles for prepaid expenses.

Prepaid expenses include actual costs incurred but relating to the business results of multiple accounting periods. The Company's prepaid expenses include tools and instruments, insurance expenses, asset repair expenses, and other expenses.

Tools and instruments put into use are allocated to expenses on a straight-line basis over a period not exceeding 36 months.

Insurance expenses are allocated over the insurance coverage period.

Asset repair expenses and other one-off expenses with significant value are allocated to expenses on a straight-line basis, with the allocation period depending on the nature of each type of expense.

12. Accounting principles for trade payables.

Payables are tracked in detail by payment term, creditor, currency type, and other factors according to the Company's management requirements.

13. Accounting principles for dividends and profit payables.

14. Accounting principles for accrued expenses.

Actual expenses not yet incurred but estimated in advance are recognised in production and business costs during the year to avoid significant fluctuations in costs, ensuring the matching principle between revenue and expenses.

The Company records accrued expenses under the following main categories:

- Accrued loan interest expenses: accrued based on loan contracts.
- Other expenses: accrued based on cost estimates on the basis of contracts and completed work volumes.

15. Accounting principles for deferred revenue.

16. Accounting principles for provisions.

17. Accounting principles for deferred corporate income tax.

18. Accounting principles for borrowings and finance lease liabilities.

Includes loan amounts, excluding borrowings in the form of bond issuance or preference shares with mandatory redemption obligations at a certain future date.

The Company tracks borrowings in detail by creditor and classifies them as short-term or long-term according to repayment period.

Directly attributable borrowing costs are recognised as financial expenses, except for borrowings used specifically for investment, construction, or production of qualifying assets, which are capitalised in accordance with the accounting standard on borrowing costs.

19. Accounting principles for recognition and capitalisation of borrowing costs.

20. Accounting principles for convertible bonds.

21. Accounting principles for equity.

Owner's contributed capital is recognised based on the actual contributed capital of shareholders.

Share premium is recognised as the difference between the issuance price and par value of shares in cases of initial issuance, additional issuance, or treasury share reissuance.

Dividends are recognised as a liability in the Company's separate balance sheet after the Board of Directors announces dividend distribution and the Vietnam Securities Depository and Clearing Corporation announces the record date.

After-tax profit is distributed to shareholders after appropriations to funds in accordance with the Company's Charter and legal regulations, and after approval by the General Meeting of Shareholders.

22. Principles and methods of revenue and other income recognition.

The Company's revenue includes electricity sales revenue.

Electricity sales revenue is recognised based on the monthly "Meter reading confirmation and electricity output statement" with the Northern Power Corporation - Vietnam Electricity

Revenue from interest, dividends, profit distributions, and other income

Revenue from interest, dividends, profit distributions, and other income is recognised when the Company is able to obtain economic benefits and such revenue can be reliably measured.

23. Accounting principles for revenue deductions.

24. Accounting principles for cost of goods sold.

Includes cost of products, goods, and services recognised in accordance with revenue during the year.

25. Accounting principles for financial expenses.

- Losses related to financial investment activities.

- Borrowing costs: recognised monthly based on loan principal, interest rate, and actual number of borrowing days.

26. Accounting principles for selling expenses and general and administrative expenses.
27. Accounting principles for disposal and liquidation of fixed assets and investment properties.
28. Principles and methods of recognition of current corporate income tax expense (including additional corporate income tax under global minimum tax regulations) and deferred corporate income tax.

Corporate income tax expense (or income tax benefit) is the total of current tax expense and deferred tax expense (or current tax income and deferred tax income) when determining profit or loss for a period.

- Current corporate income tax expense: is the amount of corporate income tax payable calculated on taxable income for the year at the applicable tax rate. Current tax is calculated based on taxable income and tax rates applicable during the tax period. Taxable income differs from accounting profit due to adjustments between accounting profit and taxable income under current tax regulations.

- Deferred corporate income tax expense: is the corporate income tax payable in the future arising from: recognition of deferred tax liabilities in the year; reversal of deferred tax assets recognised in prior years; non-recognition of deferred tax assets or deferred tax liabilities arising from transactions directly recorded in equity.

The Parent Company is subject to corporate income tax at the rate of 20% on taxable income.

The subsidiary enjoys corporate income tax incentives for hydropower plant investment projects in Son La province, a region with especially difficult socio-economic conditions, in accordance with Decree No. 118/2015/ND-CP.

Therefore, it is entitled to corporate income tax incentives under Article 15 of the Investment Law No. 67/2014/QH13. According to Investment Certificate No. 363884504 (first issued on 10/6/2010, amended for the first time on 06/11/2017), the subsidiary is entitled to:

- A tax rate of 10% for 15 years from 2018 to 2032.
- Tax exemption for 4 years from 2018 to 2021.
- A 50% reduction of payable tax for the following 9 years from 2022 to 2030.

The year 2026 is the 9th year the subsidiary enjoys the 10% corporate income tax rate and the 4th year of the 50% tax reduction incentive.

Corporate income tax determination is based on current tax regulations. However, these regulations are subject to periodic changes, and the final determination of corporate income tax depends on the results of inspections by competent tax authorities.

29. Other accounting principles and methods.

Basic earnings per share.

Basic earnings per share for ordinary shares are calculated by dividing profit or loss attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the year.
