The figures presented in the Consolidated Financial Statements for period ended 30 June 2026 are comparable to the corresponding figures for the previous year.

1.7. The number of employees

The number of employees of the Group at as 30 June 2026 was 2.466 people (as at 30 June 2025 was 2.679 People).

2. ACCOUNTING PERIOD AND ACCOUNTING CURRENCY**2.1. Fiscal year**

The financial year of the Group is from January 01 to December 31 annually.

2.2. Accounting currency

The Company maintains its accounting records in Vietnamese Dong (VND) due to the revenues and expenditures are made primarily by currency VND.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

3. APPLICABLE ACCOUNTING STANDARDS AND REGIME

3.1. Applicable Accounting Standards and Regimes

The consolidated financial statements are prepared and presented in accordance with the Enterprise Accounting Regime issued under Circular No. No. 99/2025/TT-BTC dated 27 October 2025 of the Ministry of Finance, Circular No. 202/2014/TT-BTC dated 22 December 2014 of the Ministry of Finance guiding the method of preparing and presenting consolidated financial statements and Vietnamese Accounting Standards.

The Group applies the Vietnamese enterprise accounting regime issued under Circular No. No. 99/2025/TT-BTC and Circular No. 202/2014/TT-BTC. These circulars are effective for fiscal years beginning on or after 01 January 2026. The Group applies the accounting standards, these circulars and other circulars guiding the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of the Consolidated Financial Statements.

3.2. Comply with the Vietnamese Accounting Standards and Vietnamese Accounting Regime

The Board of General Directors ensures that it has complied with the requirements of accounting standards, the Vietnamese Enterprise Accounting Regime issued under Circular No. 99/2025/TT-BTC, Circular No. 202/2014/TT-BTC as well as circulars guiding the implementation of accounting standards of the Ministry of Finance in preparing the consolidated financial statements .

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

4.1. Basis for preparing the financial statements

The consolidated financial statements are prepared on the accrual basis of accounting (except for information relating to cash flows).

4.2. Basis of financial statement consolidation

The consolidated financial statements include the financial statements of the parent company and its subsidiaries. A subsidiary is an entity that is controlled by the parent company. Control exists when the parent company has the power, directly or indirectly, to govern the financial and operating policies of a subsidiary so as to obtain benefits from its activities. In assessing control, potential voting rights that are currently exercisable or convertible are taken into account.

The results of operations of subsidiaries acquired or sold during the year are presented in the consolidated statement of income from the date of acquisition or up to the date of sale of the investment in that subsidiary.

In case the accounting policy of a subsidiary is different from the accounting policy applied consistently in the Group, the Financial Statements of the subsidiary will be appropriately adjusted before being used for preparing the consolidated financial statements.

Balances of accounts on the Balance Sheet between companies in the same Group, intra-group transactions, unrealized intra-group profits arising from these transactions are eliminated when preparing the consolidated financial statements. Unrealized losses arising from intra-group transactions are also eliminated unless the costs creating such losses are unrecoverable.

The non-controlling interest in the net assets of a consolidated subsidiary is identified as an item in the equity section of the consolidated balance sheet. The non-controlling interest consists of the amount of the non-controlling interests at the date of the original business combination and the non-controlling interest in changes in equity since the date of the business combination. Losses arising at the subsidiary must be allocated in proportion to the non-controlling interest, even if such losses are greater than the non-controlling interest in the net assets of the subsidiary .

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

Business combination

The assets, liabilities and contingent liabilities of a subsidiary are measured at their fair values at the date of acquisition. Any Totalitional difference between the purchase price and the fair value of the assets acquired is recognised as goodwill. Any negative difference between the purchase price and the fair value of the assets acquired is recognised in the income statement for the year in which the subsidiary is acquired.

Non-controlling interests at the date of the initial business combination are measured based on the non-controlling interest's share of the fair value of the assets, liabilities and contingent liabilities recognised.

4.3. Accounting estimates

The preparation of consolidated financial statements in accordance with Vietnamese Accounting Standards, Accounting Systems for enterprises and legal regulations related to the preparation and presentation of consolidated financial statements requires the Board of General Directors to make estimates and assumptions that affect the reported figures on liabilities, assets and the presentation of contingent liabilities and assets at the date of the consolidated financial statements as well as the reported figures on revenues and expenses during the period. Although the accounting estimates are made with all the knowledge of the Board of General Directors, the actual figures may differ from the estimates and assumptions made.

4.4. Foreign currency transactions

Transactions denominated in foreign currencies are translated at the actual exchange rates at the transaction dates or the book exchange rates at the dates of the transactions. Monetary items denominated in foreign currencies at the end of the financial period are translated at the exchange rates prevailing at that date.

- The actual exchange rate at the transaction date is the average transfer buying and selling rate of the commercial bank where the Company regularly conducts transactions.

- The book exchange rate includes specific identification rates or weighted average rates:

+ Specific identification exchange rate is the rate determined upon collection of receivables, other assets, or settlement of payables in foreign currencies, based on the actual exchange rate at each transaction date (if no revaluation has been performed) or the revalued rate at the end of the previous period for each item (if revaluation has been performed).

+ Weighted average exchange rate is determined based on the average of the translated values in the accounting currency at actual transaction exchange rates for debit entries of cash, receivables, and other assets, or credit entries of payables, divided by the foreign currency balances at the beginning of the period and increases during the period for each item. The weighted average exchange rate may be determined at the end of the period or at each settlement date.

Exchange differences arising during the period from foreign currency transactions are recognized in financial income or financial expenses. Exchange differences arising from the revaluation of monetary items denominated in foreign currencies at the end of the financial year, after offsetting gains and losses, are recognized in financial income or financial expenses.

The actual exchange rates applied to foreign currency transactions are determined as follows:

- For purchases and sales of foreign currencies (spot, forward, futures, options, and swap contracts), the exchange rate is the rate agreed upon in the contracts between the Company and the commercial bank.

- Where the contract does not specify the settlement exchange rate, the actual exchange rate shall be applied in the following cases:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

+ For accounts reflecting revenue and other income. In cases where goods are sold, services are rendered, or income relates to advance receipts from customers, the revenue corresponding to the advance received is translated at the exchange rate at the date of receipt (not at the rate at the revenue recognition date).

+ For accounts reflecting production and business costs and other expenses. In cases where prepaid expenses are allocated to expenses during the period, such expenses are recognized at the exchange rate at the prepayment date (not at the rate at the allocation date).

+ For accounts reflecting assets. Where assets are acquired in relation to advance payments to suppliers, the asset value corresponding to the advance is translated at the exchange rate at the prepayment date (not at the rate at the asset recognition date).

+ Debit side of cash and other asset accounts; debit side of receivable accounts; debit side of payable accounts when advance payments are made to suppliers.

+ Credit side of payable accounts; credit side of receivable accounts when advances are received from customers.

+ Equity accounts.

Exchange rate used for conversion at the time of date:

30/06/2025:	0,8291 VND/LAK for the BS
	0,8858 VND/LAK for the P&L,CFS
31/12/2025:	0,8252 VND/LAK for the BS
	0,8544 VND/LAK for the P&L,CFS
30/06/2026:	0,8305 VND/LAK for the BS
	0,8248 VND/LAK for the P&L,CFS

4.5. Cash and cash equivalents

Cash includes cash, cash in banks. Cash equivalents are short-term investments with a maturity of no more than 3 months from the date of investment, which are easily convertible to a known amount of cash and are subject to an insignificant risk of change in value at the reporting date.

4.6. Accounts Receivable

Accounts receivable are stated at carrying amount less allowance for doubtful debts.

The classification of receivables as trade receivables and other receivables is carried out according to the following principles :

- Trade receivables reflect commercial receivables arising from purchase-sale transactions between the Company and buyers who are independent entities of the Company , including receivables for export sales entrusted to other entities.
- Other receivables reflect non-commercial receivables not related to purchase and sale transactions.

The allowance for doubtful debts represents the estimated loss due to non-payment of receivables arising on the receivables balance at the balance sheet date .

Increases and decreases in the balance of the provision for doubtful debts that must be set up at the end of the fiscal year are recorded in business administration expenses.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

4.7. Inventory

Inventories are stated at the lower of cost and net realizable value.

The cost of inventories is determined as follows:

- Raw materials and goods: include purchase costs and other directly related costs incurred in bringing inventories to their present location and condition.
- Finished goods: include the cost of raw materials, direct labor and directly related general manufacturing costs allocated based on normal levels of activity .
- Work in progress costs: only include the cost of main raw materials.

Net realizable value is the estimated selling price of inventories in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Inventories are valued using the weighted average method and accounted for using the perpetual inventory method.

Provision for inventory decline is made for each inventory item whose cost is greater than its net realizable value.

Provision for inventories is created for the estimated loss due to the impairment of inventories of materials, finished goods, and merchandise owned by the Group that may arise (reduction in value, deterioration in quality, obsolescence, etc.) based on appropriate evidence of impairment at the end of the financial year. Increases or decreases in this provision are recorded in the cost of goods sold in the consolidated income statement.

4.8. Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation. The cost of tangible fixed assets includes all costs incurred to acquire the fixed assets up to the date when the assets are ready for use. Expenditures incurred after initial recognition are only recorded as an increase in the cost of fixed assets if it is certain that these costs will increase future economic benefits from the use of the assets. Expenditures that do not satisfy the above conditions are recorded immediately as expenses.

When tangible fixed assets are sold or disposed of, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is included in income or expenses for the period.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives. The depreciation years for various types of tangible fixed assets are as follows:

<u>Type of fixed asset</u>	<u>Year</u>
Houses, buildings	20 years
Machinery and equipment	05 – 10 years
Means of transport, transmission	08 – 10 years
Management equipment and tools	06 – 08 years
Perennial garden	According to mining output

4.9. Intangible fixed assets

Intangible fixed assets are stated at cost less accumulated depreciation. The Group's intangible fixed assets include:

Land use rights

Land use rights are all actual costs that the Group has spent directly related to the land used, including: money spent to obtain land use rights, costs for compensation, site clearance, site leveling, registration fees, etc.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

The land use rights of the Group are legally transferred, the land use rights have indefinite term so they are not depreciated.

Computer software

The cost of computer software that is not an integral part of related hardware is capitalized. The cost of computer software is all costs incurred up to the date the software is put into use. Computer software is amortized on a straight-line basis over 05 years.

ISO Certificate

ISO certification includes costs directly related to building the system and obtaining ISO certification. This cost is amortized over 10 years.

4.10. Deferred expenses

Tools, instruments

Tools and equipment put into use are allocated to expenses using the straight-line method with an allocation period of no more than 03 years.

4.11. Accounts Payable and Accrued Expenses

Liabilities and accruals are recognized for amounts to be paid in the future for goods and services received. Accruals are recognized based on reasonable estimates of the amounts to be paid.

The classification of payables as trade payables, accrued expenses and other payables is made according to the following principles:

- Trade payables reflect commercial payables arising from transactions of purchasing goods, services, assets and the seller is an independent entity of the Group, including payables when importing through consignees.
- Payable expenses reflect amounts payable for goods and services received from sellers or provided to buyers but not yet paid due to lack of invoices or insufficient accounting records and documents, and amounts payable to employees for leave wages, production and business expenses that must be accrued in advance.
- Other payables reflect non-commercial payables not related to the purchase, sale or provision of goods and services.

4.12. Equity

Owner's equity

Owner's equity is recorded according to the actual capital contributed by shareholders.

Capital surplus

Share capital surplus is recorded as the difference between the issue price and the par value of shares when first issued, Totalitional issued, the difference between the reissue price and the book value of treasury shares and the equity component of convertible bonds at maturity. Direct costs related to the Totalitional issuance of shares and reissue of treasury shares are recorded as a decrease in share capital surplus.

Other owners' equity

Other capital is formed by supplementing from business results, revaluation of assets and the remaining value between the fair value of donated, presented, and sponsored assets after deducting taxes payable (if any) related to these assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

Treasury stock

When shares issued by the Parent Company are repurchased, the amount paid, including transaction-related expenses, is recorded as treasury shares and reflected as a deduction in equity. When reissued, the difference between the reissue price and the book value of treasury shares is recorded in the item "Share premium".

4.13. Profit distribution

Profit after corporate income tax is distributed to shareholders after setting aside funds according to the Parent Company's Charter as well as legal regulations and approved by the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-monetary items in undistributed profits after tax that may affect cash flow and the ability to pay dividends such as interest on revaluation of contributed assets, interest on revaluation of monetary items, financial instruments and other non-monetary items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders.

4.14. Revenue and income recognition

Revenue from sales of goods and finished products

Revenue from the sale of goods and finished products is recognized when all of the following conditions are simultaneously satisfied:

- The Group has transferred to the buyer the significant risks and rewards of ownership of the products or goods.
- The Group no longer holds the right to manage the goods as the owner of the goods or the right to control the goods.
- Revenue is determined with relative certainty. When the contract stipulates that the buyer has the right to return the purchased products or goods under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer is not entitled to return the products or goods (except in cases where the customer has the right to return the goods in exchange for other goods or services);
- It is probable that the economic benefits associated with the transaction will flow to the Group.
- Identify the costs associated with a sales transaction.

Service revenue

Revenue from a service transaction is recognised when the outcome of the transaction can be measured reliably. In cases where the service is performed over several periods, revenue is recognised in each period based on the results of the work completed at the end of the accounting period. The outcome of a service transaction is recognised when all of the following conditions are met:

- Revenue is measured reliably. When a contract provides that the buyer has the right to return the services purchased under specific conditions, revenue is recognized only when the specific conditions no longer exist and the buyer is not entitled to return the services provided.
- It is possible to obtain economic benefits from the transaction of providing that service.
- Determine the portion of work completed as at the end of the fiscal year.
- Identify the costs incurred for the transaction and the costs to complete the transaction to provide that service.

Interest

Interest is recognized on an accrual basis, determined on the deposit account balance and the actual interest rate for each period.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

Dividends and profits distributed

Dividends and profits received are recognized when the Group is entitled to receive dividends or profits from capital contributions. Dividends received in shares are only tracked by the number of shares increased, not the value of shares received.

4.15. Borrowing costs

Borrowing costs include interest and other costs incurred in connection with borrowing.

Borrowing costs are recognized as expenses when incurred. Where borrowing costs are directly attributable to the construction or production of an asset that takes a substantial period of time (over 12 months) to get ready for its intended use or sale, these borrowing costs are included in the cost of that asset. For loans specifically used to construct fixed assets or investment properties, interest is capitalized even if the construction period is less than 12 months. Income from temporary investment of loans is recorded as a reduction in the cost of the relevant asset.

For general borrowings used for the purpose of investment in construction or production of unfinished assets, the capitalized borrowing costs are determined according to the capitalization rate for the weighted average cumulative costs incurred for investment in basic construction or production of that asset. The capitalization rate is calculated according to the weighted average interest rate of the

outstanding borrowings during the year, except for separate borrowings serving the purpose of forming a specific asset.

4.16. Operating lease

A lease is classified as an operating lease when the lessor retains a majority of the rewards and is subject to the risks of ownership of the asset.

Operating lease costs are recognized in the income statement over the lease term on a straight-line basis over the term of the lease.

4.17. Corporate income tax

Corporate income tax expense includes current income tax and deferred income tax.

Current income tax

Current income tax is the tax that is calculated on taxable income. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses as well as adjustments for non-taxable income and losses carried forward.

Deferred income tax

Deferred income tax is the income tax payable or recoverable in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their taxable amounts. Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized only when it is probable that future taxable profits will be available against which the deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each financial year and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Previously unrecognised deferred tax assets are reviewed at the end of each financial year and recognised to the extent that it is probable that sufficient taxable profit will be available to utilise the unrecognised deferred tax assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability settled, based on tax rates that have been enacted at the balance sheet date. Deferred tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

The Company's tax reports will be examined by the tax authorities. Due to the application of tax laws to each type of business and the interpretation, understanding and acceptance in many different ways, the figures in the financial statements may differ from the figures of the tax authorities.

4.18. Report by department

Segment is a distinguishable component that is engaged in providing products or services and that is subject to risks and returns that are different from those of other business segments.

A geographical segment is a distinguishable component that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments.

4.19. Financial instruments

Financial assets

The classification of these financial assets depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. The Group's financial assets include cash and cash equivalents, trade receivables and other receivables.

At initial recognition, financial assets are recorded at cost plus transaction costs that are directly attributable to the acquisition of the financial asset.

Financial liabilities

The classification of financial liabilities depends on the nature and purpose of the financial liability and is determined at the time of initial recognition. The Group's financial liabilities include trade payables, loans and borrowings, and other payables.

At the time of initial recognition, except for liabilities related to financial leases and convertible bonds which are recorded at amortized cost, other financial liabilities are initially recorded at cost less transaction costs directly related to such financial liabilities.

The amortised cost is determined as the amount at which the financial liability is initially recognised minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Equity instruments

An equity instrument is a contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities.

Offsetting of financial instruments

Financial assets and financial liabilities are offset against each other and presented at net value in the Balance Sheet when and only when the Group :

- Has a legal right to set off the amount recorded; and
- Intend to settle on a net basis or to realise the asset and settle the liability simultaneously.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the period from 1 January 2026 to 30 June 2026

4.20. Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

In considering any related party relationship, attention is directed more to the substance of the relationship than to the legal form.

The following companies/entities are considered related parties:

Company / subject	Relationship
Dak Lak Rubber Joint Stock Company	Major shareholder
The Board of Administrators, the Board of Supervisors, the Board of General Directors	Key members

DakLak, 27 July 2026

DakLak, July 2026

No.:
“V/v: *Explanation of profit discrepancies*”

To: - **STATE SECURITIES COMMISSION OF VIETNAM;**
 - **HANOI STOCK EXCHANGE**

Daklak Rubber Investment Joint Stock Company was established under Business Registration Certificate No. 6001 271719 first issued by Department of Planning and Investment of Daklak Province (now the Department of Finance) on 24/02/2012, with the 10th amendment registered on 26/06/2026.

We would like to provide an explanation regarding the profit discrepancies in the parent company’s financial statements and the consolidated financial statements for the second quarter of 2026 compared to the same period in 2025.

1. Financial Statements of the Parent Company:

Profit after tax for the second quarter of 2026 in the Company’s separate financial statements reached VND 55,699,340,401, decreasing by VND 26,820,732,650, equivalent to a decrease of 32.5% compared to the same period of 2025 (reaching VND 82,520,073,051). The main reason was the decrease in financial income, particularly the remaining after-tax profit distributed by the subsidiary in Laos and transferred to the Parent Company in 2026, which was VND 39.32 billion lower than the after-tax profit for 2024 transferred in 2025.

2. Consolidated Financial Statements:

Profit after tax according to the consolidated financial statements for Q2/2026 reached VND 68,185,000,611, increasing by VND 47,273,693,848, equivalent to an increase of 226% compared to the same period of 2025 (reaching VND 20,911,306,763). The main reason was the strong growth in sales revenue, which increased by 85.45% due to a 59.82% increase in sales volume. Meanwhile, cost of goods sold increased by only 56.14%, lower than the growth rate of revenue, resulting in an improved gross profit margin and being the key factor contributing to the significant increase in consolidated profit after tax compared with the same period last year.

The above presents the main factors affecting the fluctuation in profit for the second quarter of 2026 compared to the same period in 2025 of the Company. The Company respectfully reports to the State Securities Commission, the Hanoi Stock Exchange, and all shareholders of the Company.

Sincerely!

Recipients:

- As above;
- Board of Directors, Executive Board, Supervisory Board;
- Filed in the archives.
