Pursuant to Circular No. 96/2020/TT-BTC dated 16 November 2020 issued by the Ministry of Finance on information disclosure in the securities market, Tasco Joint Stock Company hereby provides an explanation for the change in profit after tax presented in the reviewed financial statements for the first six months of 2026 compared with the same period of the previous year, as follows:

1. In the 2026 six-month consolidated financial statements, the Company recorded revenue of VND 22,310 billion, equivalent to 145% of the same period last year, while profit after tax reached VND 310 billion, representing an increase of 172% year-on-year. These results reflected positive growth across the Company's core business segments, including automobile distribution and insurance... Newly launched strategic vehicle models received a positive market response, contributing to the Company's growth. In addition, the consolidation of DNP since December 2025 has incorporated the business results of the clean water and manufacturing segments, contributing to an expansion in revenue and an improvement in consolidated profitability during the period.
2. In the separate financial statements, the Parent Company recorded revenue of VND 131 billion and profit after tax of VND 44.5 billion, equivalent to 356% of the same period last year. This result was mainly attributable to the performance of investments in subsidiaries, which was reflected in financial income recognized during the period.

In addition, profit after tax as presented in the reviewed financial statements remained unchanged from the pre-review figures, demonstrating the consistency and transparency of the financial information presented.

The above is Tasco Joint Stock Company's explanation of the reasons for the change in profit after corporate income tax as presented in the statement of income for the first six months of 2026 compared with the same period of the previous year.

We sincerely thank you./.
