IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Hereunder are applicable significant accounting policies in Financial Statement's Preparation

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**FORM B09-DN**

These notes are an integral part of and should be read in conjunction with the attached financial statement

Accounting estimates

The preparation of financial statements in accordance with Vietnamese Accounting Standards, the Vietnamese Accounting System, and relevant current regulations in Vietnam requires the Management Board to make estimates and assumptions that affecting the reported amounts of receivables, assets, and the disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the fiscal year. Actual results may differ from those estimates.

Financial instrumentsInitial Notes*Financial Assets*

At initial notes, financial liabilities are noted at fair value less any directly attributable transaction costs.

The Company's financial assets include cash, short-term deposits, receivables from customers and other receivables, and deposits and guarantees.

Financial Liabilities

At initial notes, financial liabilities are calculated at base cost and deducted any directly attributable transaction costs.

The Company's financial liabilities include the accounts payable and other payables, borrowings, loans, and accrued expenses.

Reassess after initial recognition

Currently, there is no regulations on the re-appraisal of financial instruments after initial notes.

Cash

Cash includes cash on hand and bank deposits

Provision for doubtful receivables

Provision for doubtful receivables is represented for overdue receivables for six months or more, or for the unable-to-pay receivables due to liquidation, bankruptcy or similar difficulties.

Inventories

Inventories are stated at the lower of cost incurred between the historical cost and net realisable value. The cost of inventories comprises cost of direct raw materials, direct labor cost, and general manufacturing overheads incurred, if any, in bringing the inventories to their present location and condition. The historical cost of inventories is determined using the weighted-average basis monthly for stone materials and the first-in, first-out method for other materials and tools. Net realizable value is the estimated by selling price deducting the estimated costs to completion and the estimated arising costs of marketing, selling, and distribution.

The Company inventory devaluation provision is created in accordance with current accounting regulations. Accordingly, the Company is allowed to create the inventory provision when inventories are expired, obsolescence, damage or become useless and in cases when the cost of inventories exceeds the net realizable value at the end of the accounting period.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less the accumulated depreciation.

The cost of a tangible fixed assets comprises of its purchase price and any directly attributable costs of bringing the tangible fixed asset and expenditures for maintenance and repairs are charged to the income statement as incurred. The cost of tangible fixed assets due to self-constructed and self-built includes actual construction costs, assembling costs incurred shall be added the. The tangible fixed assets are depreciated in accordance with straight-line basis over the estimated useful life of each asset, details are as follows:

	Year 2026
	(Number of years)
Building and structures	5 - 32
Machinery and equipment	3 - 10
Means of transportation	6 - 8
Office equipment	3 - 8

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**FORM B09-DN***These notes are an integral part of and should be read in conjunction with the attached financial statement***Intangible fixed assets and depreciation**

Intangible fixed assets are stated at the value of permanent land use rights and computer software subject to the cost deducting accumulated amortization. Permanent land use rights are not amortized and the computer software is amortized on the straight-line basis according to the estimated utilization time.

Long-term prepaid expenses

Long-term prepaid expenses include small tools, used components and supplies that generate future economic benefits more than one year or one ordinary course of business cycle, and the large amount of allocated repairing cost of fixed assets. These costs are capitalized as long-term prepaid expenses allocated to the statement of profit or loss using the straight-line basis over three years in accordance with current accounting regulations.

Revenue recognition

The revenue from sales of inventory property is recognised when 5 below criteria are satisfied as follows:

- (a) The Company has transferred the significant risks and rewards of ownership of the properties or goods to the buyer.
- (b) The Company retains neither continuing managerial involvement as the ownership nor effective control over the goods sold;
- (c) The revenue can be reliably measured;
- (d) It is probable that the economic benefits associated with the transaction will flow to the Company; and
- (e) The costs incurred or to be incurred in respect of the transaction can be reliably measured.

Revenue from service transactions is recognized when the outcome of the transaction can be reliably estimated. For service transactions that related to multiple periods, revenue is recognized in each period subject to the completion of the work as of the balance statement date. The outcome of a service transaction can be recognized when satisfying all four (4) of the following conditions:

- (a) The revenue can be reliably measured;
- (b) It is probable that the economic benefits associated with the transaction will flow to the Company;
- (c) The completion of works at the balance sheet date can be reliable measured;
- (d) The costs incurred for the transaction and the costs to complete the service transaction can be measured reliably.

For completed real estate projects sold by the Company, revenue and cost of sales are recognized when the significant risks and rewards related to the real estate have been transferred to the buyer. For real estate sold before completion, where the Company is obligated to construct and complete the real estate project and the buyer makes payments based on the construction progress and accepts market risks and rewards, revenue and cost of sales are recognized based on the percentage of completion of the construction work as of the balance sheet date.

Revenue from construction contracts is recognized in accordance with the Company's accounting policies for construction contracts (see details below).

Deposit interest income is recognized on an accrual basis, determined based on the outstanding balance of deposit accounts and the applicable interest rates

Interest income from investments is recognized when the Company has right to receive the interest.

Construction Contract

Where the outcome of a construction contract can be reliably estimated, contract revenue and costs are recognized by reference to the work completion of the contract activity at the balance sheet date, determined by the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs, except where the costs do not reflect the stage of completion. These costs may include incremental expenses, the agreed-upon compensation and contract performance bonuses.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognized only to the extent of contract costs incurred that it is certainly to be recoverable.

Loan interest expenses

All other loan interest expenses are recognized in the financial statement in the incurred period.

Provisions

Provisions are recognised when the Company has a present obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Provisions are measured at the Board of Management's best estimation of the expenditure required to settle the present obligation at the balance sheet date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**FORM B09-DN***These notes are an integral part of and should be read in conjunction with the attached financial statement***Taxes**

Corporate income tax represents the total value of current tax payable and deferred tax.

Current tax payable is calculated based on taxable income for the year. Taxable income differs from net profit presented in the financial statement as the taxable income excludes tax-deductible income or expenses in other years (including loss carryforwards, if any) and also excludes non-taxable or non-deductible items.

Deferred income tax is calculated on the differences between the carrying amount and the tax base of assets or liabilities on the financial statements and is recognized using the balance sheet method. Deferred tax liabilities must be recognized for all temporary differences, while deferred tax assets are only recognized when it is probable that sufficient taxable profit will be available in the future to offset the temporary differences.

Deferred income tax is determined using the tax rate expected to apply in the year when the asset is recovered or the liability is settled. Deferred income tax is recognized in the income statement and only recognized in equity when the tax relates to items charged directly to equity.

Deferred tax assets and deferred tax liabilities are offset when the Corporate has a legally enforceable right to offset current tax assets against current tax payable and when the deferred tax assets and deferred tax liabilities relate to corporate income tax administered by the same tax authority and the Corporate intends to settle current tax on a net basis.

The determination of the Corporate's income tax is based on current tax regulations. However, these regulations change from time to time, and the final determination of corporate income tax depends on the inspection results of the competent tax authorities.

Other taxes are applied according to current tax laws in Vietnam.

V. APPLICATION OF NEW ACCOUNTING GUIDELINES**Applied accounting policies**

On October 27th, 2025, the Ministry of Finance issued the Circular No. 99/2025/TT-BTC guiding the Corporate Accounting Policies. This Circular replaces the Circular No. 200/2014/TT-BTC dated December 22nd, 2014 of the Minister of Finance

Guidelines for the management, use, and depreciation of fixed assets

On April 25, 2013, the Ministry of Finance issued the Circular No. 45/2013/TT-BTC ("Circular 45") guiding the management, use, and depreciation of fixed assets. This Circular replaces the Circular No. 203/2009/TT-BTC ("Circular 203") dated October 20, 2009 of the Ministry of Finance guiding the management, use, and depreciation of fixed assets. The Circular 45 takes effect from June 10, 2013 and applies to the fiscal year 2013 onwards; On October 13, 2016, the Ministry of Finance issued Circular No. 147/2016/TT-BTC ("Circular 147") amending and supplementing some articles of Circular No. 45/2013/TT-BTC. This Circular takes effect from November 28, 2016 and applies from the fiscal year 2016.

New guidance on provision for impairment of long-term investments in enterprises

On August 8, 2019, the Ministry of Finance issued the Circular No. 48/2019/TT-BTC ("Circular 48") of the Ministry of Finance guiding the policy for setting up and using provisions for impairment of inventories, losses on financial investments, bad debts, and product warranties, goods, and construction services at enterprises. The Circular 48 takes effect from October 10, 2019.
