### Price chart

### Company Overview

VGC is the leading firm in building materials sector with a wide range of products including ceramics tiles, terracotta, construction glass and sanitary war, which contributes up to 75% of revenue. Besides, VGC also owns a land bank of 3,850 hectares of industrial park, concentrating mainly in the Northern provinces, selected by many FDI enterprises and many residential real estate projects.

### Other reports

## TRANSFERING STOCK EXCHANGE AND DIVESTMENT

### Valuation

We recommend TRACKING for VGC shares with a target price for 2019 of VND 18,510 based on sum of the parts valuation for the two main segments (1) construction materials (P/E method with the target multiple of 9x) and (2) real estate and industrial parks (IPs) (P/B method, target P/B of 1x).

### Business results forecast

BSC forecasts that VGC's net revenue in 2019 will reach VND 9,247 billion (+ 2.9% YoY), profit after tax is VND 622.7 billion (+ 10.9% YoY), equivalent to EPS = 1,242 VND/share, P/E fw = 16.3x

### Investment Highlights

**(1) Industrial parks leasing is potential, with the forecasted occupied area in 2019 is 90 hectares, revenue + 7% YoY.** As of June 30, 2018, VGC owns 9 industrial parks with the total area of 1,800 ha; the vacant area make up for 63% (over 1,100 ha), of which 350 ha is clearance site and 190 ha having infrastructure is ready for lease . In 2019, the company plans to invest in Yen My IP (Hung Yen, 280ha, expected to start construction in Q1/2019) and Yen Phong IIC (Bac Ninh, 200 hectares, expected to start Q2/2019) increasing the total IP area by 30% to capture the growing demand for IPs due to the shifting wave of production from China to Vietnam. The increase in the rent area will also favor IP operation segment (+12.9% YoY) with relatively high and stable profit margin (nearly 30%).

**(2) VGC has a diversified list of building material products with considerable scale** such as building glasses; tiles (3% market share of ceramic tiles and 12% with granite tiles), terracotta ; sanitary ware (11% of market share). Although the material market is not as favorable as 1-2 years ago, we assess that the fuel price (oil and gas) is expected to decrease (from 8-10%) in 2019 will help the company to improve profit margin.

### Catalyst

- Listed in HOSE in 2019.
- Divestment of state capital: The state ownership in Viglacera must be reduced to 0% in 2019 as planned.

### Investment Risk

- Rising competition in the building material segment.
- Fluctuating material prices
- Dependence on the real estate market.

### Company Update

**(1) Business results 2018:** Net revenue reached VND 8,984 billion (- 2.3% YoY), NPAT for parent company shareholders reached VND 561.6 billion (-6.4% YoY), equivalent to EPS = VND 1,253/share (not taking the bonus and welfare fund into account).

**(2) Business plan 2019:** Consolidated revenue is 9,300 billion (+ 3.2% YoY), EBT is 950 billion (+ 12.7% YoY), expected dividend payout is 10%.

**Business update**

**(1) Business results 2018:**

- Net revenue reached VND 8,984 billion (-2.3% YoY), 80% comes from construction materials (tiles, terracotta, building glass and sanitary wares), the rest comes from residential real estate and industrial parks.

Segment	Revenue 2018 (billion)	% YoY		Gross profit margin	Gross profit margin	
<b>Tiles</b>	2,631	29%	Capacity increased by 2.5 million m2 (+ 11% YoY) from the new line of Viglacera Hanoi. Selling prices of some product types decreased by 3-7%, but the average price increased due to higher contribution of high quality	23.6%	22.2%	Decline selling price and rising fuel price (gas and coal)
<b>Terracotta</b>	2,211	-2%	High level of competition, especially in building bricks	18.4%	16.2%	
<b>Glass</b>	1,067	-19%	Average selling price -20% YoY due to more tense competition and high base of 2017 due to supply shortage.	31.5%	14.6%	Lower selling price, FO price (35-40% of cost) + 12% YoY
<b>Sanitary ware</b>	1,051	4%		29.9%	25.8%	
<b>Residential real estate</b>	513	-41%	The company mainly sold the remaining area in Dang Xa, Xuan Phuong, Bac Ninh, and some building for IP workers so the revenue is moderate	12.6%	33.3%	Recorded in low - rise with higher gross margin.
<b>Industrial parks</b>	720	-28%	Area rented 102 ha (+ 4% YoY), the average rent decreased due to concentrated in the newly-invested industrial parks with low rent in Dong Van	28.8%	38.2%	
<b>IPs operation</b>	451	34%	High growth, stable according to the leased area	29.1%	28.8%	High and relatively stable gross margin

**Company Update**

**(1) Business results 2018:**

- The ratio of SG&A expenses was stable at 12.3% of revenue, which keep operating profit margin (EBIT) far from falling sharply (decline from 10.9% to 10.1%).
- Net profit after minority interests reached VND 561.6 billion (-6.4% YoY), equivalent to EPS of VND 1,253/share (not taking bonus and welfare fund into consideration).

**(2) Business plan 2019:**

- Consolidated revenue will be 9,300 billion dong (+ 3.2% YoY), EBT reaches 950 billion (+12.7% YoY), and expected dividend is 10%.
- Operating Phu My ultra white floating glass project in Q4 / 2019, and investing in energy saving glass in Dap Cau in Q3/2019

**(3) Divestment plan:** The valuation process has been completed, the company is waiting for a final decision from the Ministry of Construction about:

- Option: (1) matching orders in the stock exchange; or (2) auction
- Divestment rate: Currently, the Ministry has not approved to divest all the state owned capital in one time or to divest to 36% first and then to 0% in 2019.

**Business results forecast:**

**BSC forecasts that VGC's net revenue in 2019 will reach VND 9,247 billion (+ 2.9% YoY),** the growth motivation comes from sanitary ware segment (+ 42.7%) after My Xuan porcelain factory operates stably; building glass (+ 12.7%) thanks to low-e output +50%, industrial parks operation (+12.9%) thanks to stable leasing area, industrial park leasing +6.7% with the assumption that occupied area increases by 90ha in 2019.

The gross profit margin will rise to 22.9% thanks to the support of lower oil prices, an increase in the average selling price of some construction materials such as glass and porcelain as a result of higher contribution of high quality products. **Net income is expected to reach VND 622.7 billion (+ 10.9% YoY), EPS = 1,242 VND / share** (under the assumption that the company will allocate 9% NI to bonus and welfare fund).

General and administrat	5.2%	5.7%	6.8%	6.2%	5.2%
Net profit margin	4.6%	5.2%	7.6%	7.9%	7.4%

- Revenue -2.3% YoY due to the main decline from real estate - IPs (-22.7% YoY) while construction materials segment increased slightly by 4.82%.

- Financial revenue + 80% YoY due to deposit + 71% YoY and dividends and profit increased sharply over the same period.

- SG&A expenses in the year remained at 12.3% of revenue: increasing selling expenses was offset by the declining G&A.

- Net profit -7.6% YoY, fulfilling 89% of the plan due to the decline in revenue and profit margin.

- Term deposits increased 2.5 times, accounting for 3.8% of total assets, helping financial revenue increase sharply in the year.

- Inventories + 4.5% YoY, remained stable at 18.4% of total assets.

- The ratio of uncompleted assets increased from 57.7% to 63.3%, due to the value of investment assets + 15.2% YoY from 120 ha IPs in 2018.

- Construction in progress + 28.6% YTD, mainly due to additional investments in Dong Van IV and Dong Mai industrial parks, autoclaved BTK brick projects.

- Short-term borrowings + 12.7% YTD, long-term loans - 22.1% YTD.

- As before 2016, the company recognized revenue from IPs throughout the lease term, so there are 3,096 billion unearned revenue on the balance sheet.

- Gross profit margin decreased due to difficulties in construction materials segment (1) glass segment: margin decreased from 31.5% to 14.6% due to selling price -20%, FO oil price (35-40% of total cost) + 12% ; (2) GPM of tiles segment decreased from 23.6% to 22.2% because selling price decreased by 7-8%.

EPS					

- The liquidity ratios decreased over the same period due to cash - 47%, receivables -16% whereas short-term debt + 4.5%

- The assets structure has shifted from short-term assets to long-term assets as the company increased its investment in industrial park infrastructure to meet rising demand.

- Debt ratio remained stable at 58%, equivalent to 2017 leverage ratio. The structure of short and long-term debt is relatively stable.

- Operational capacity indicators are stable compared to 2017.

-The average cash cycle increased slightly by 3%.

- Profitability ratios decreased over the same period due to the impact of lowering prices, increasing fuel costs as well as sales activities in some uncompleted areas.

**Technical highlights:**

- Current tren: Short-term accumulation.
- MACD trend indicator: Positive convergence.
- RSI indicator: about to touch overbought area.
- MA line: MA20 and MA50 both cut MA200.

**Outlook:**

VGC is in the middle-term recovery trend from the price range of 17. Current stocks have returned to the support level of the previous period. Stock liquidity fell below the 20-day average level when hitting this level, indicating a weak momentum. RSI ticked the overbought threshold and the MACD entered the converging cycle also supported the cumulative trend. 3 MA lines showed that the stock is in mid-term recovery trend with a strong support level at the price range of 18.5. Thus, VGC will accumulate in the price range of 18.5-20.5 before forming a new trend.

**Recommendations:**

Investors can open positions at the price range of 18.5-19 and take profit at the price of 24. Hold loss if the stock loses the price threshold of 18.
